

INDEX

- adjoint basis, 9, 20
 adjoint operator, 4
 adjoint space, 1
 Ahués' iteration scheme, 199
 algebraic multiplicity, 97
 algorithm, 315
 analytic at infinity, 55
 analytic function, 44
 annihilator, 3
 Anselone's theorem, 234, 290
 ascent, 390
 averaging projection, 283

 Bauer-Fike-Jiang-Kahan-Parlett
 theorem, 212
 Bernstein polynomial, 287
 biorthogonal family, 33

 Cauchy's inequalities, 51
 Cauchy's integral formula, 50
 Cauchy's theorem, 50
 Cholesky factorization, 402
 coefficient matrix, 398
 collectively compact
 approximation, 230
 collocation method, 272
 condition number, 340, 344, 345,
 349, 407, 409
 conjugate curve, 58
 conjugate transpose, 10
 Courant-Fischer minimax
 characterization, 213
 cubic spline function, 281

 decomposition of an operator, 18
 decomposition of a space, 17
 degenerate kernel method, 285

 derivative, 44
 descent, 391
 diagonalizable, 160, 210
 diagonal matrix, 208
 discrete spectral value, 100, 396
 discrete spectrum, 100
 discretization, 330
 dominant spectral value, 200
 double annihilator, 6
 double precision, 330
 Drazin inverse, 111
 Dunford's theorem, 44

 eigenvalue, 79
 eigenvector, 79
 eigenspace, 80
 elementary matrix, 398
 Erdős-Turan theorem, 274
 essential singularity, 55
 essential spectrum, 397

 Fejér-Hermite interpolation, 273
 finite rank operator, 37, 303
 fixed point, 182
 fixed point iteration scheme, 186
 flop, 401
 floating-point number, 329
 Fredholm integral operator, 285
 Fredholm method, 290

 Galerkin method, 264
 gap, 24
 Gauss matrix, 399
 Gauss two point rule, 281, 298,
 355
 Gaussian elimination, 399
 with partial pivoting, 343, 345,
 349, 400
