CONTENTS.

	Page.
Preface	III
Bibliography	XIII
1. Introduction	3
2. The Two Interpretations of the Logical Calculus	3
3. Relation of Inclusion	4
4. Definition of Equality	6
5. Principle of Identity	8
6. Principle of the Syllogism	8
7. Multiplication and Addition	9
8. Principles of Simplification and Composition	11
9. The Laws of Tautology and of Absorption	12
10. Theorems on Multiplication and Addition	14
11. The First Formula for Transforming Inclusions into Equalities	15
12. The Distributive Law	16
13. Definition of 0 and 1	17
14. The Law of Duality	20
15. Definition of Negation	21
16. The Principles of Contradiction and of Excluded Middle ...	23
17. Law of Double Negation	24
18. Second Formula for Transforming Inclusions into Equalities	25
19. Law of Contraposition	26
20. Postulate of Existence	27
21. The Developments of 0 and of 1	28
22. Properties of the Constituents	29
23. Logical Functions	29
24. The Law of Development	30
25. The Formulas of De Morgan	32
26. Disjunctive Sums	34
27. Properties of Developed Functions	34
28. The Limits of a Function	37
29. Formula of Poretsky	38
30. Schröder's Theorem	39
31. The Resultant of Elimination	41
32. The Case of Indetermination	43

Page.

33. Sums and Products of Functions 44
34. The Expression of an Inclusion by Means of an Indeterminate 46
35. The Expression of a Double Inclusion by Means of an Indeterminate 48
36. Solution of an Equation Involving One Unknown Quantity ... 50
37. Elimination of Several Unknown Quantities 53
38. Theorem concerning the Values of a Function 55
39. Conditions of Impossibility and Indetermination 57
40. Solution of Equations Containing Several Unknown Quantities 57
41. The Problem of Boole 59
42. The Method of Poretsky 61
43. The Law of Forms 62
44. The Law of Consequences 63
45. The Law of Causes 67
46. Forms of Consequences and Causes 69
47. Example: Venn's Problem 70
48. The Geometrical Diagrams of Venn 73
49. The Logical Machine of Jevons 75
50. Table of Consequences 76
51. Table of Causes 77
52. The Number of Possible Assertions 79
53. Particular Propositions 80
54. Solution of an Inequation with One Unknown „ „ ... 81
55. System of an Equation and an Inequation 83
56. Formulas Peculiar to the Calculus of Propositions 84
57. Equivalence of an Implication and an Alternative 85
58. Law of Importation and Exportation 88
59. Reduction of Inequalities to Equalities 90
60. Conclusion 92
Index 95
