

TABLE OF CONTENTS

1.	Introduction and summary.	1
2.	Which graphs do we consider?	10
	2.1 Periodic graphs.	10
	2.2 Matching pairs.	16
	2.3 Planar modifications of matching pairs.	21
	2.4 Separation theorems and related point-set topological results.	29
	2.5 Covering graphs.	36
	2.6 Dual graphs.	37
3.	Periodic percolation problems.	40
	3.1 Introduction of probability. Site vs bond problems.	40
	3.2 Periodic site-percolation.	44
	3.3 Crossing probabilities and the principal theorem on percolative regions.	46
	3.4 Critical probabilities. Applications of the principal theorems.	51
4.	Increasing events.	69
	4.1 The FKG inequality.	72
	4.2 Pivotal sites and Russo's formula.	74
5.	Bounds for the distribution of $\#W$.	81
	5.1 Exponential fall off of $P\{\#W \geq n\}$.	83
	5.2 Estimates above the percolation threshold.	97
	5.3 Large crossing probabilities imply that percolation occurs.	121
6.	The RSW Theorem.	126
7.	Proofs of Theorems 3.1 and 3.2.	168
8.	Power estimates.	198
9.	The nature of the singularity at p_H .	238
10.	Inequalities for critical probabilities.	255
	10.1 Comparison of bond and site problems.	256
	10.2 Strict inequality for a graph and a subgraph.	261
	10.3 Derivation of Condition E from Condition D.	295
11.	Resistance of random electrical networks.	335
	11.1 Bounds for resistances of networks.	335
	11.2 Proof of Theorem 11.1.	343
	11.3 Properties of resistances.	351
	11.4 Proofs of Theorems 11.2 and 11.3.	371
12.	Unsolved problems.	380

Appendix.	386
