BIBLIOGRAPHY

Publications of T. E. Harris

1947

[1] Note on differentiation under the expectation sign in the fundamental identity of sequential analysis. *Ann. Math. Statist.* **18** 294–295.

1948

[2] Branching processes. *Ann. Math. Statist.* **19** 474–494.

[3] On the theory of age-dependent stochastic branching processes (with R. Bellman). *Proc. Natl. Acad. Sci. USA* **34** 601–604.

[4] *Mathematical Theory of Zero-Sum Two-Person Games With a Finite Number or a Continuum of Strategies* (with H. Bohnenblust, M. Dresher, M. A. Girshick, O. Helmer, J. C. C. McKinsey, L. S. Shapley and R. N. Snow). The Rand Corporation, Santa Monica, CA. iv+47 pp.

1950

[5] Timing of the distribution of events between observations: A contribution to the theory of follow-up studies (with P. Meier and J. W. Tukey). *Human Biology* **22** 249–270.

1951

[6] Optimal inventory policy (with K. T. Arrow and J. Marschak). *Econometrica* **19** 250–272.

[7] Recurrence times for the Ehrenfest model (with R. Bellman). *Pacific J. Math.* **1** 179–193.

[8] Estimation of particle transmission by random sampling (with H. Kahn). In *Monte Carlo Method. Natl. Bur. Stand. Appl. Math. Ser.* **12** 27–30.

[9] Some mathematical models for branching processes. In *Proceedings of the Second Berkeley Symposium on Mathematical Statistics and Probability, 1950* 305–328. Univ. California Press, Berkeley and Los Angeles.

1952

[10] On age-dependent binary branching processes (with R. Bellman). *Ann. of Math. (2)* **55** 280–295.

[11] First passage and recurrence distributions. *Trans. Amer. Math. Soc.* **73** 471–486.

1953

[12] Ergodic theory of Markov chains admitting an infinite invariant measure (with H. Robbins). *Proc. Natl. Acad. Sci. USA* **39** 860–864.

1955

[13] On chains of infinite order. *Pacific J. Math.* **5** 707–724.

1956

[14] The existence of stationary measures for certain Markov processes. In *Proceedings of the Third Berkeley Symposium on Mathematical Statistics and Probability, 1954–1955, Vol. II* 113–124. Univ. California Press, Berkeley and Los Angeles.

1957

[15] The random functions of cosmic-ray cascades. *Proc. Natl. Acad. Sci. USA* **43** 509–512.

[16] Transient Markov chains with stationary measures. *Proc. Amer. Math. Soc.* **8** 937–942.

1959

[17] On one-dimensional neutron multiplication. Research Memorandum RM-2317, The RAND Corporation, Santa Monica, CA.

[18] A mathematical model for multiplication by binary fission. In *The Kinetics of Cellular Proliferation* (F. Stohlman, Jr., ed.). Grune and Stratton, New York.

1960

[19] A lower bound for the critical probability in a certain percolation process *Proc. Cambridge Philos. Soc.* **56** 13–20.

1963

[20] *The Theory of Branching Processes. Die Grundlehren der Mathematischen Wissenschaften* **119**. Springer, Berlin; Prentice-Hall Inc., Englewood Cliffs, NJ. (Republished by Dover, Minolta, NY, 2000.)

1965

[21] Diffusion with "collisions" between particles. *J. Appl. Probab.* **2** 323–338.

1968

[22] Infinite-product Markov processes. *Trans. Amer. Math. Soc.* **130** 141–152.

[23] Counting measures, monotone random set functions. *Z. Wahrsch. Verw. Gebiete* **10** 102–119.

1969

[24] Correction to a proof. *Z. Wahrsch. Verw. Gebiete* **12** 172.

1971

[25] Random measures and motions of point processes. *Z. Wahrsch. Verw. Gebiete* **18** 85–115.

1972

[26] Nearest-neighbor Markov interaction processes on multidimensional lattices. *Adv. Math.* **9** 66–89.

1974

[27] Contact interactions on a lattice. *Ann. Probab.* **2** 969–988.

1975

[28] On a class of set-valued Markov processes. *Ann. Probab.* **4** 175–194.

1977

[29] A correlation inequality for Markov processes in partially ordered state spaces. *Ann. Probab.* **5** 451–454.

1978

[30] Additive set-valued Markov processes and graphical methods. *Ann. Probab.* **6** 355–378.

1981

[31] Brownian motions on the homeomorphisms of the plane. *Ann. Probab.* **9** 232–254.

1984

[32] Coalescing and noncoalescing stochastic flows in R^1. *Stochastic Process. Appl.* **17** 187–210.

1986

[33] Isotropic stochastic flows (with P. Baxendale). *Ann. Probab.* **14** 1155–1179.

438

[34] Isotropic stochastic flows and a related property of nonrandom potential flows. In *Stochastic Processes and their Applications (Nagoya, 1985). Lecture Notes in Math.* **1203** 66–74. Springer, Berlin.

1991

[35] Interacting systems, stirrings, and flows. In *Random Walks, Brownian Motion, and Interacting Particle Systems. Progress in Probability* **28** 283–293. Birkhäuser, Boston, MA.

1997

[36] Albert Leon Whiteman (1915–1995) (with S. Golomb and J. Seberry). *Notices Amer. Math. Soc.* **44** 217–219.
