

CORRECTION

INSTABILITY OF FIFO QUEUEING NETWORKS

BY MAURY BRAMSON

The Annals of Applied Probability (1994) 2 414–431

This paper contains misprints in the error bounds of displays (7), (8), (9) and (13). These misprints were due to printer's errors which occurred after the author last had access to the manuscript. The correct statements are as follows:

$$(7) \quad P(\xi_T(1, 1) \geq 100M, \xi_T(1, 1)^+ \leq M) \geq 1 - \exp(-\varepsilon_1 M),$$

$$(8) \quad P(\xi_T \geq M/4, \forall t \in [0, T]) \geq 1 - \exp(-\varepsilon_1 M),$$

$$(9) \quad P(\xi_t < M/4 \text{ for some } t \geq 0) \leq 2 \sum_{k=0}^{\infty} \exp[-\varepsilon_1 M(100)^k]$$

and

$$(13) \quad P(\beta_{S_1}(1, 1) > 3\eta M) \leq \exp(-\varepsilon_2 M).$$
