SKEWNESS AND ASYMMETRY: MEASURES AND ORDERINGS

By H. L. MacGillivray

The Annals of Statistics (1986) **14** 994–1011

On page 1000 formula (2.10) is omitted. It should be placed immediately above Definition 2.5 and reads:

$$(2.10) \qquad \left(G^{-1}(u) - m_G\right)g(m_G) \geq \left(F^{-1}(u) - m_F\right)f(m_F).$$
