

## INDEX TO VOLUME 18

- Ahn, Jae Moon, *Notes on the analytic Yeh-Feynman integrable functionals*, 157.  
Alikakos, N.D., *An invariance principle for a class of monotone systems and application to degenerate parabolic equations*, 215  
Allgower, E.L., *Resolving singular nonlinear equations*, 225.  
Bates, P.W., see Alikakos, N.D.  
Beer, Gerald, *On a theorem of Cellina for set valued functions*, 37.  
Böhmer, K., see Allgower, E.L.  
Bremner, Andrew, *The rational cuboid and a quartic surface*, 105.  
Brown, J.E., *A coefficient estimate for nonvanishing  $H$  functions*, 707.  
Buskes, G.J.H.M., *The support of certain Riesz pseudo-norms and the order-bound topology*, 167.  
Cantrell, Robert Stephen, *On the simplicity and uniqueness of positive eigenvalues admitting positive eigenfunctions for weakly coupled elliptic systems*, 269.  
Capri, O.N., *Weighted inequalities for a vector-valued strong maximal function*, 565.  
Chang, Kun Soo, see Ahn, Jae Moon.  
Chang, Joo Sup, see Ahn, Jae Moon.  
Charatonik, J.J., *Generalized homogeneity of finite and of countable topological spaces*, 195.  
Charatonik, W.J., see Charatonik, J.J.  
Conway, J.B., *Linear combinations of hyponormal operators*, 695.  
Cosner, Chris, *On the geometry of level sets of positive solutions of semilinear elliptic equations*, 277.  
Curtis, W.D., *Global uniformly expanding finite amplitude waves*, 13.  
De Figueiredo, Djairo G., *On superlinear elliptic problems with nonlinearities interacting only with higher eigenvalues*, 287.  
Dugas, Manfred, *On socles of abelian  $p$ -groups in  $L$* , 733.  
Eklof, Paul C., *On  $\omega$ -filtered vector spaces and their application to abelian  $p$ -groups: II*, 123.  
Fuentes, F., *On weighted orlicz sequence spaces and their subspaces*, 585.  
Grone, Robert, *Cones in the group algebra related to Schur's determinantal inequality*, 137.  
Gutierrez, C.E, see Capri, O.N.  
Hamaker, C., *A range for homogeneous, hyperbolic partial differential equations*, 571.  
Han, Chong Kyu, *Regularity and uniqueness of certain systems of functions annihilated by a formally integrable system of vector fields*, 767.  
Hatzenbuehler, J., *Non-scattered zero-dimensional remainders*, 635.  
Hausrath, Alan R., *Periodic solutions of periodically forced non-degenerate systems*, 785.  
Hernandez, F.L., see Fuentes, F.  
Horwitz, A.L., *Two theorems on inverse interpolation*, 645.  
Huber, Martin, see Eklof, Paul C.  
Huibregtse, Mark E., *Translation by torsion points and rational equivalence of 0-cycles on abelian varieties*, 147.  
Ikawa, T., *Product complex submanifolds of indefinite complex space forms*, 601.  
Isaacs, I.M., *Dual modules and group actions on extra-special groups*, 505.  
Ize, Jorge, *Necessary and sufficient conditions for multiparameter bifurcation*, 305.  
Julian, William H., *The intermediate value theorem: preimages of compact sets under uniformly continuous functions*, 25.

- Knightly, George H., *Structure parameters in rotating Couette-Poiseuille channel flow*, 339.
- Knopfmacher, Arnold, *Two concrete new constructions of the real numbers*, 815.
- Knopfmacher, John, see Knopfmacher, Arnold.
- Kuiper, Hendrick J., *On spurious numerical solutions for nonlinear eigenvalue problems*, 357.
- Lane, Mark, *Fully invariant submodules of  $p$ -local balanced projective groups*, 835.
- Livingston, Albert E., *Weakly close-to-convex-functions*, 719.
- Luna, George, *Local connectedness of support points*, 179.
- Manasevich, Raul F., see Hausrath, Alan R.
- Mattson, D.A., see Hatzenbuehler, J.
- Merris, Russel, see Grone, Robert.
- Milnes, P., *Ergodic sequences and a subspace of  $B(G)$* , 681.
- Mines, Ray, see Julian, William H.
- Mittleman, H.D., *Multi-grid continuation and spurious solutions for nonlinear eigenvalue problems*, 387.
- Nakagawa, H., see Ikawa, T.
- O'Regan, *A note on the application of topological transversality to nonlinear differential equations in Hilbert spaces*, 803.
- Othmer, Hans G., *On the collapse of the resonance structure in a three-parameter family of coupled oscillators*, 403.
- Patterson, A.L.T., see Milnes, P.
- Pedersen, Steen, *Groups of isometries on operator algebra II*, 753.
- Peitgen, Heinz-Otto, *Newton flows for real equations*, 433.
- Prüfer, Michael, see Peitgen, Heinz-Otto.
- Rana, S.S. *Convergence of a class of deficient interpolatory splines*, 827.
- Renardy, Michael, *Inflow boundary conditions for steady flows of viscoelastic fluids with differential constitutive laws*, 445.
- Renardy, Yuriko, *Instabilities in steady flows of two fluids*, 455.
- Richardson, G.D. *Convergence in probabilistic semimetric spaces*, 617.
- Richman, Fred, see Julian, William H.
- Rubel, L.A., see Horwitz, A.L.
- Sampson, G., *Local estimates that lead to weighted estimates for oscillating kernels in two dimensions*, 535.
- Sather, D., see Knightly, George H.
- Schechter, M., *Boundary value problems for semilinear elliptic equations of arbitrary order in unbounded domains*, 519.
- Schmitt, Klaus, *Nonlinear partial differential equations conference*, 213.
- Schmitt, Klaus, see Cosner, Chris.
- Schmitt, Klaus, see Peitgen, Heinz-Otto.
- Smith, Donald R., *Single-layer solutions for the Dirichlet problem for a quasilinear singularly perturbed second order system*, 67.
- Szymanski, W., see Conway, J.B.
- Tomastik, E.C., *Comparison theorems for focal points of systems of  $n$ -th order non-selfadjoint differential equations*, 1.
- Vergohsen, Rene, see Dugas, Manfred.
- Walker, J.B., see Brown, J.E.
- Ward, James R., Jr, *Bounded and almost periodic solutions of semi-linear parabolic equations*, 479.
- Watanabe, Masaji, see Othmer, Hans G.
- Watkins, William, see Grone, Robert.

- Weder, R., *Absence of eigenvalues of the acoustic propagator in deformed wave guides*, 495.
- Weinberg, D.A. *The affine classification of cubic curves*, 655.
- Weinberg, D.A. *The topological classification of cubic curves*, 665.
- Wnuk, Witwold, *Orlicz spaces which are Riesz isomorphic to  $\ell^\infty$* , 185.
