## Contents

### EDITORIAL

85 Editorial, *by Terry Goodman.*

### ARTICLES

87 In Search of ‘The Japanese Theorem’, *by Mangho Ahuja, Wataru Ue-gaki, and Kayo Matsushita.*

95 Diophantine Equations, Fibonacci Hyperbolas, and Quadratic Forms, *by Keith Brandt and John Koelzer.*

106 The Number of Admissible Sequences for Indecomposable Serial Rings, *by Joshua O. Hanes and Darren D. Wick.*

118 The Fundamental Theorem of Algebra - Proofs Via “The Creeping Lemma”, *by James E. Joseph and Myung H. Kwack.*

121 Absolute Extrema and the Baire Category Theorem, *by Kelly Jeanne Pearson and Tan Zhang.*

125 Asymptotics Analysis of Some Bounded Solution to the General Third Painlevé Equation, *by Hui-zeng Qin and Ni-na Shang.*

135 Integer Solutions of Linear Diophantine Equations Form a Group, *by Ajai Choudhry.*

142 The Determinant of the Wheel Graph and Conjectures by Yong, *by Iyad T. Abu-Jeib.*

### OTHER INFORMATION

147 Problems 161–164.

149 Solutions 152–156.
