

# ADVANCES IN DIFFERENTIAL EQUATIONS

Volume 26, Numbers 1-2

January/February 2021

---

<b>Xiaoming Wang and Hao Wu</b> , Global weak solutions to the Navier–Stokes–Darcy–Boussinesq system for thermal convection in coupled free and porous media flows .....	1
<b>Yanan Li and Zhijian Yang</b> , Strong attractors and their continuity for the semilinear wave equations with fractional damping .....	45
<b>Zhihong Chen and Dongsheng Li</b> , Existence and $W^{1,p}$ estimates of certain Maxwell type equations in Reifenberg domains .....	83
