

CONTENTS OF VOLUME 13

Articles

ALANYALI, MURAT. Asymptotically exact analysis of a loss network with channel continuity	1474–1493
ALVAREZ, LUIS H. R. On the properties of r -excessive mappings for a class of diffusions	1517–1533
ASSELAH, AMINE AND CASTELL, FABIENNE. Existence of quasi-stationary measures for asymmetric attractive particle systems on \mathbb{Z}^d	1569–1590
BÉRARD, J. AND BIENVENÜE, A. Sharp asymptotic results for simplified mutation-selection algorithms	1534–1568
BERKES, ISTVÁN AND HORVÁTH, LAJOS. Asymptotic results for long memory LARCH sequences	641–668
BIENVENÜE, A. AND BÉRARD, J. Sharp asymptotic results for simplified mutation-selection algorithms	1534–1568
BOOTH, LORNA, BRUCK, JEHOSHUA, FRANCESCHETTI, MASSIMO AND MEESTER, RONALD. Covering algorithms, continuum percolation and the geometry of wireless networks	722–741
BRUCK, JEHOSHUA, FRANCESCHETTI, MASSIMO, MEESTER, RONALD AND BOOTH, LORNA. Covering algorithms, continuum percolation and the geometry of wireless networks	722–741
BRUSS, F. THOMAS AND GRÜBEL, RUDOLF. On the multiplicity of the maximum in a discrete random sample	1252–1263
CAPUTO, PIETRO AND MARTINELLI, FABIO. Relaxation time of anisotropic simple exclusion processes and quantum Heisenberg models	691–721
CASTELL, FABIENNE AND ASSELAH, AMINE. Existence of quasi-stationary measures for asymmetric attractive particle systems on \mathbb{Z}^d	1569–1590
CHAN, HOCK PENG AND LAI, TZE LEUNG. Saddlepoint approximations and nonlinear boundary crossing probabilities of Markov random walks	395–429
CHASSAING, P., MARCKERT, J. F. AND YOR, M. A stochastically quasi-optimal search algorithm for the maximum of the simple random walk	1264–1295
CHEN, MU-FA AND WANG, YING-ZHE. Algebraic convergence of Markov chains	604–627
CHOW, YUNSHYONG AND ZHANG, YU. Large deviations in first-passage percolation	1601–1614
COHN, HARRY AND WANG, QIAO. Multitype branching limit behavior	490–500

COLLINS, E. J. AND LESLIE, DAVID S. Convergent multiple-timescales reinforcement learning algorithms in normal form games.....	1231–1251
COX, J. THEODORE AND KLENKE, ACHIM. Rescaled interacting diffusions converge to super Brownian motion	501–514
DETEMPLE, JEROME, FENG, SHUI AND TIAN, WEIDONG. The valuation of American call options on the minimum of two dividend-paying assets	953–983
DUFFIE, D., FILIPOVIĆ, D. AND SCHACHERMAYER, W. Affine processes and applications in finance	984–1053
DUFFY, KEN, LEWIS, JOHN T. AND SULLIVAN, WAYNE G. Logarithmic asymptotics for the supremum of a stochastic process	430–445
EIBECK, ANDREAS AND WAGNER, WOLFGANG. Stochastic interacting particle systems and nonlinear kinetic equations	845–889
EMBRECHTS, PAUL AND SAMORODNITSKY, GENNADY. Ruin problem and how fast stochastic processes mix	1–36
FENG, SHUI, TIAN, WEIDONG AND DETEMPLE, JEROME. The valuation of American call options on the minimum of two dividend-paying assets	953–983
FILIPOVIĆ, D., SCHACHERMAYER, W. AND DUFFIE, D. Affine processes and applications in finance	984–1053
FOSS, SERGUEI AND ZACHARY, STAN. The maximum on a random time interval of a random walk with long-tailed increments and negative drift.....	37–53
FRANCESCHETTI, MASSIMO, MEESTER, RONALD, BOOTH, LORNA AND BRUCK, JEHOOSHUA. Covering algorithms, continuum percolation and the geometry of wireless networks.....	722–741
FRICKER, CHRISTINE, ROBERT, PHILIPPE AND TIBI, DANIELLE. A degenerate central limit theorem for single resource loss systems	561–575
FRYDMAN, HALINA AND LAKNER, PETER. Maximum likelihood estimation of hidden Markov processes.....	1296–1312
GAIER, J., GRANDITS, P. AND SCHACHERMAYER, W. Asymptotic ruin probabilities and optimal investment	1054–1076
GAJ RAT, ALEXANDER, HORDIJK, ARIE AND RIDDER, AD. Large-deviations analysis of the fluid approximation for a controllable tandem queue	1423–1448
GANESH, AYALVADI, O'CONNELL, NEIL AND PRABHAKAR, BALAJI. Invariant rate functions for discrete-time queues ...	446–474
GAO, FUQING AND QUASTEL, JEREMY. Exponential decay of entropy in the random transposition and Bernoulli–Laplace models	1591–1600

- GOLL, THOMAS AND KALLSEN, JAN. A complete explicit solution to the log-optimal portfolio problem 774–799
- GRANDITS, P., SCHACHERMAYER, W. AND GAIER, J. Asymptotic ruin probabilities and optimal investment 1054–1076
- GRÜBEL, RUDOLF AND BRUSS, F. THOMAS. On the multiplicity of the maximum in a discrete random sample 1252–1263
- GUÉRIN, HÉLÈNE. Solving Landau equation for some soft potentials through a probabilistic approach 515–539
- GUO, XIANPING AND HERNÁNDEZ-LERMA, ONÉSIMO. Continuous-time controlled Markov chains 363–388
- HARRISON, J. MICHAEL. A broader view of Brownian networks 1119–1150
- HERNÁNDEZ-LERMA, ONÉSIMO AND GUO, XIANPING. Continuous-time controlled Markov chains 363–388
- HORDIJK, ARIE, RIDDER, AD AND GAJRAT, ALEXANDER. Large-deviations analysis of the fluid approximation for a controllable tandem queue 1423–1448
- HORVÁTH, LAJOS AND BERKES, ISTVÁN. Asymptotic results for long memory LARCH sequences 641–668
- HÜSLER, J., PITEROVÁ, V. AND SELEZNJEV, O. On convergence of the uniform norms for Gaussian processes and linear approximation problems 1615–1653
- JAKUBÉNAS, PAULIUS, LEVENTAL, SHLOMO AND RYZNAR, MICHAŁ. The super-replication problem via probabilistic methods 742–773
- JANSON, SVANTE AND TYSK, JOHAN. Volatility time and properties of option prices 890–913
- JELENKOVIĆ, PREDRAG AND MOMČILOVIĆ, PETAR. Asymptotic loss probability in a finite buffer fluid queue with heterogeneous heavy-tailed on-off processes 576–603
- JOYCE, PAUL, KRONE, STEPHEN M. AND KURTZ, THOMAS G. When can one detect overdominant selection in the infinite-alleles model? 181–212
- KALLSEN, JAN AND GOLL, THOMAS. A complete explicit solution to the log-optimal portfolio problem 774–799
- KLEIN, IRENE. Free lunch for large financial markets with continuous price processes 1494–1503
- KLENKE, ACHIM AND COX, J. THEODORE. Rescaled interacting diffusions converge to super Brownian motion 501–514

KOLTCHINSKII, VLADIMIR, PANCHENKO, DMITRIY AND LOZANO, FERNANDO. Bounding the generalization error of convex combinations of classifiers: Balancing the dimensionality and the margins	213–252
KONTOYIANNIS, I. AND MEYN, S. P. Spectral theory and limit theorems for geometrically ergodic Markov processes	304–362
KRAMKOV, D. AND SCHACHERMAYER, W. Necessary and sufficient conditions in the problem of optimal investment in incomplete markets	1504–1516
KRONE, STEPHEN M., KURTZ, THOMAS G. AND JOYCE, PAUL. When can one detect overdominant selection in the infinite-alleles model?	181–212
KRUK, LUKASZ, LEHOCZKY, JOHN, SHREVE, STEVEN AND YEUNG, SHU-NGAI. Multiple-input heavy-traffic real-time queues	54–99
KUNITOMO, NAOTO AND TAKAHASHI, AKIHIKO. On validity of the asymptotic expansion approach in contingent claim analysis	914–952
KURKOVA, I. A. AND SUHOV, Y. M. Malyshev's theory and JS-queues. Asymptotics of stationary probabilities	1313–1354
KURTZ, THOMAS G., JOYCE, PAUL AND KRONE, STEPHEN M. When can one detect overdominant selection in the infinite-alleles model?	181–212
KYPRIANOU, A. E. AND PISTORIUS, M. R. Perpetual options and Canadization through fluctuation theory	1077–1099
LACHAL, AIMÉ. Some probability distributions in modeling DNA replication	1207–1230
LAI, TZE LEUNG AND CHAN, HOCK PENG. Saddlepoint approximations and nonlinear boundary crossing probabilities of Markov random walks	395–429
LAKNER, PETER AND FRYDMAN, HALINA. Maximum likelihood estimation of hidden Markov processes	1296–1312
LAMBERTON, DAMIEN AND VILLENEUVE, STÉPHANE. Critical price near maturity for an American option on a dividend-paying stock	800–815
LATOUCHE, GUY, REMICHE, MARIE-ANGE AND TAYLOR, PETER. Transient Markov arrival processes	628–640
LEHOCZKY, JOHN, SHREVE, STEVEN, YEUNG, SHU-NGAI AND KRUK, LUKASZ. Multiple-input heavy-traffic real-time queues	54–99
LESLIE, DAVID S. AND COLLINS, E. J. Convergent multiple-timescales reinforcement learning algorithms in normal form games	1231–1251

LEVENTAL, SHLOMO, RYZNAR, MICHAŁ AND JAKUBĘNAS, PAULIUS. The super-replication problem via probabilistic methods	742–773
LEWIS, JOHN T., SULLIVAN, WAYNE G. AND DUFFY, KEN. Logarithmic asymptotics for the supremum of a stochastic process	430–445
LOZANO, FERNANDO, KOLTCHINSKII, VLADIMIR AND PANCHENKO, DMITRIY. Bounding the generalization error of convex combinations of classifiers: Balancing the dimensional- ity and the margins	213–252
MACPHEE, I. M. AND MENSHKOV, M. V. Critical random walks on two-dimensional complexes with applications to polling systems	1399–1422
MAHMOUD, HOSAM M. AND NEININGER, RALPH. Distribution of distances in random binary search trees	253–276
MALRIEU, FLORENT. Convergence to equilibrium for granular media equations and their Euler schemes	540–560
MARCKERT, J. F., YOR, M. AND CHASSAING, P. A stochastically quasi-optimal search algorithm for the maximum of the simple random walk	1264–1295
MARTINELLI, FABIO AND CAPUTO, PIETRO. Relaxation time of anisotropic simple exclusion processes and quantum Heisenberg models	691–721
MEESTER, RONALD, BOOTH, LORNA, BRUCK, JEHOSEA AND FRANCESCHETTI, MASSIMO. Covering algorithms, continuum percolation and the geometry of wireless networks	722–741
MENSHKOV, M. V. AND MACPHEE, I. M. Critical random walks on two-dimensional complexes with applications to polling systems	1399–1422
MEYN, S. P. AND KONTOYIANNIS, I. Spectral theory and limit theorems for geometrically ergodic Markov processes	304–362
MOMČILOVIĆ, PETAR AND JELENKOVIĆ, PREDRAG. Asymptotic loss probability in a finite buffer fluid queue with heterogeneous heavy-tailed on-off processes	576–603
MOSSEL, ELCHANAN AND PERES, YUVAL. Information flow on trees	817–844
NEININGER, RALPH AND MAHMOUD, HOSAM M. Distribution of distances in random binary search trees	253–276
NEY, P. E. AND VIDYASHANKAR, A. N. Harmonic moments and large deviation rates for supercritical branching processes	475–489

O'CONNELL, NEIL, PRABHAKAR, BALAJI AND GANESH, AYALVADI. Invariant rate functions for discrete-time queues	446–474
PANCHENKO, DMITRIY, LOZANO, FERNANDO AND KOLTCHINSKII, VLADIMIR. Bounding the generalization error of convex combinations of classifiers: Balancing the dimensionality and the margins	213–252
PENROSE, MATHEW D. AND YUKICH, J. E. Weak laws of large numbers in geometric probability	277–303
PERES, YUVAL AND MOSEL, ELCHANAN. Information flow on trees	817–844
PERGAMENSHCHIKOV, S. Limit theorem for Leland's strategy	1099–1118
PISTORIUS, M. R. AND KYPRIANOU, A. E. Perpetual options and Canadization through fluctuation theory	1077–1099
PITERBARG, V., SELEZNJEV, O. AND HÜSLER, J. On convergence of the uniform norms for Gaussian processes and linear approximation problems.....	1615–1653
PRABHAKAR, BALAJI, GANESH, AYALVADI AND O'CONNELL, NEIL. Invariant rate functions for discrete-time queues	446–474
