

## STATISTICAL THEORY AND METHOD ABSTRACTS

A Journal of the International Statistical Institute

The object of this abstracting service is to cover published papers concerned with statistical theory, including relevant aspects of probability and mathematical methods, and new contributions to statistical method. These abstracts provide valuable information on new developments for studying problems in many fields: such as frequency distributions, estimating and testing problems, sampling and experimental designs, variance analysis, spectral theory and other methods in time-series analysis, queueing theory, reliability and acceptance inspection. Journals appearing in all parts of the world, on mathematics and statistics, or on other fields and possible contribution of interest are regularly scanned for suitable papers. Abstracts are also prepared from collections of papers such as reports of conferences, symposia and seminars: technical reports of experiment and research stations are covered.

The abstracts do not exceed 400 words, with occasional "double abstracts" for papers where this size is not sufficient to represent the paper. The language is English; the language of the original paper is indicated. The headings give the name and address of the author together with the Journal in which the paper is published moreover a note is added on the number of references, tables and figures.

The classification scheme which is used in this Journal supplies a division of all abstracts in twelve main sections. The pages of the Journal are colour-tinted in accordance with these main sections. Each section is further sub-divided to indicate the main topic of the paper; a secondary number denotes the most important additional topic referred to by the author. A special index in each part links together these two classifications. This scheme is arranged to facilitate transfer to punch cards. Papers containing new statistical tables are listed in a separate index.

The abstracts are numbered serially, the volume number being inserted as a prefix. The Journal is published four times a year and contains approximately 1,000 abstracts. An author index, the secondary classification index and the new statistical tables index are published in issue and combined in a yearly supplement which also contains a list of all Journals represented in the volume by one or more abstracts.

<i>Annual Subscription</i>	£7. 10s. (U.S.A. \$24.00)
<i>Single Number</i>	£2. 5s. (U.S.A. \$ 7.00)
<i>Loose Leaf Binders for Single Abstract Sheets</i>	16s. 3d. including postage and packing.

# TECHNOMETRICS

*A Journal of Statistics  
for the Physical, Chemical and Engineering Sciences*

## CONTENTS

TECHNOMETRICS, Vol. 11, No. 3, AUGUST 1969

A Method of Fitting Empirical Surfaces to Physical and Chemical Data.....	J. Mandel
Results on Factorial Designs of Resolution IV for the $2^n$ and $2^{n+3}$ Series.....	B. H. Margolin
Inferences on the Parameters of the Weibull Distribution.....	D. R. Thoman, L. J. Bain and C. E. Antle
Minimum Bias Estimation and Experimental Design for Response Surfaces.....	R. J. Hader, M. J. Karson and A. R. Manson
Sequences of Two-Level Fractional Factorial Plans.....	S. Adelman
Some Operators for ANOVA Calculations.....	E. B. Fowlkes
Investigation of Rules for Dealing with Outliers in Small Samples from the Normal Distribution: I: Estimation of the Mean.....	I. Guttman and D. E. Smith
Spearman Simultaneous Estimation for a Compartmental Model.....	J. J. Beauchamp and R. G. Cornell
A Survey of Coverage Problems Associated with Point and Area Targets.....	A. R. Eckler
Tables of Inverse Gaussian Percentage Points.....	M. T. Wasan and L. K. Roy
NOTES	
Classical and Inverse Regression Methods of Calibration in Extrapolation.....	R. G. Krutchkoff
Minimum Variance Unbiased Estimation of Reliability for the Truncated Exponential Distribution.....	S. D. Varde and Y. S. Sathe
Balanced Incomplete Block Designs with Sets of Identical Blocks.....	D. A. Preece
Constrained Maximization and the Design of Experiments.....	A. C. Atkinson
BOOK REVIEWS	
ERRATA	

The purpose of TECHNOMETRICS is to contribute to the development and use of statistical methods in the physical, chemical and engineering sciences. This objective places a high premium on succinct communication among the physical scientist, engineer, statistician and mathematician. The journal will accept for publication papers describing new statistical techniques expected to be useful in these sciences, papers illustrating the application of known statistical methods to new or novel environments, expository or tutorial papers on particular statistical methods, and papers dealing with the philosophy and problems of applying statistical methods to research, development, design and performance. Brief descriptions of problems requiring solution and short technical notes will also be accepted for publication.

For further information please contact TECHNOMETRICS Post Office Box 587 Benjamin Franklin Station Washington, D. C. 20004.

## JOURNAL OF THE AMERICAN STATISTICAL ASSOCIATION

Volume 64

June 1969

Number 326

Presidential Address.....	Geoffrey H. Moore
Validation of Consumer Financial Characteristics: Common Stock.....	Robert Ferber, John Forsythe, Harold W. Guthrie and E. Scott Maynes
Age Patterns of Mortality of American Negroes: 1900-02 to 1959-61.....	Marvin Zelnik
The Accuracy of International Trade Data.....	Seiji Naya and Theodore Morgan
Examples of Likelihoods and Comparison with Point Estimates and Large Sample Approximations.....	D. A. Sprott and John D. Kalbfleisch
Some Aspects of the Statistical Analysis of 'Split Plot' Experiments in Completely Randomized Layouts.....	Gary G. Koch
Integer Programming and the Theory of Grouping.....	H. D. Vinod
The Unrelated Question Randomized Response Model: Theoretical Framework.....	Bernard G. Greenberg, Abdel-Latif A. Abul-Ela, Walt R. Simmons and Daniel G. Horvitz
An Empirical Study of the Stabilities of Estimation and Variance Estimators in Unequal Probability Sampling of two units per stratum.....	D. L. Bayless and J. N. K. Rao
Planning Some Two-Factor Comparative Surveys.....	J. Sedransk and Gordon Booth
Comparison of Four Ratio-Type Estimates Under A Model.....	Poduri S. R. S. Rao
Spectral Properties of Non-Stationary Systems of Linear Stochastic Difference Equations.....	Richard E. Levitan and Gregory C. Chow
An Approximation to the Wilcoxon-Mann-Whitney Distribution.....	Charles H. Kraft, C. van Eeden and N. Buckle
A Recurrence Relation for Distribution Functions of Order Statistics from Bivariate Distributions.....	Chandan Kumar Mustafi
Discrete Distribution Estimators from the Recurrence Equation for Probabilities.....	C. McGilchrist
Two-Sided Tolerance Limits for Normal Populations—Some Improvements.....	W. G. Howe
Life Testing and Reliability Estimation for the Two Parameter Exponential Distribution.....	S. D. Varde
A Table for Estimating the Mean of a Lognormal Distribution.....	Hanspeter Thoni
Critical Values for Bivariate Student T-Tests.....	F. E. Steffens
New Chebyshev Polynomial Approximations to Mills' Ratio.....	Philip Rabinowitz
The Distribution of the Logarithm of the Sum of Two Log-Normal Variates.....	Joe Naus
Confidence Regions for Variance Ratios of Random Models.....	L. D. Broemeling
The Computation of the Unrestricted AOQL When Defective Material is Removed but not Replaced.....	Allen C. Endres

# JOURNAL OF THE ROYAL STATISTICAL SOCIETY

THE JOURNAL OF THE ROYAL STATISTICAL SOCIETY is published in three series, SERIES A (GENERAL), four issues a year, annual subscription, post free, £5 4s. U. S. \$15: price each part 30s; SERIES B (METHODOLOGICAL), three issues a year, annual subscription post free, £4 2s. U. S. \$12: price each part 35s; SERIES C (APPLIED STATISTICS), three issues a year, annual subscription 30s; U. S. \$5, price each part 15s.

Reviews; Current Notes; Library Accessions

## Contents of SERIES B (METHODOLOGICAL), Vol. 31, PART 2, 1969

- Subjective Bayesian Models in Sampling Finite Populations (with discussion) W. A. ERICSON  
An alternative to the simplex-lattice design for experiments with mixtures D. P. LAMBRAKIS  
A fiducial argument with application to survey sampling V. P. GODAMBE  
Exact Bayesian analysis of a two-by-two contingency table, and Fisher's "exact" significance test PATRICIA M. E. ALTHAM  
Some nonorthogonal fractions of  $2^n$  designs P. W. M. JOHN  
Estimated regression function of the  $q_1, q_2, \dots, q_n; m_1, m_2, \dots, m_n$  multiple-lattice design D. P. LAMBRAKIS  
A sequential Procedure for Testing a Null Hypothesis against a two sided alternative hypothesis L. BILLARD AND M. K. VAGHOLKAR  
On the distributions of the times between events in a stationary stream of events R. LEADBETTER  
Majorants of the chromatic number of a random graph P. HOLGATE  
Inference concerning probabilities and quantiles J. R. GREEN  
Structural probability and prediction for the multivariate model D. A. S. FRASER AND M. S. HAQ  
A note on the posterior mean of a population mean W. A. ERICSON  
Tests for specification errors in classical linear least-squares regression analysis J. B. RAMSEY  
The maximum likelihood solution to the problem of estimating a linear functional relationship MARY E. SOLARI  
Testing for linear contagion—inverse sampling E. SHLOM AND E. PERITZ

The Royal Statistical Society 21, Bentinck Street, London, W. 1

## The Indian Journal of Statistics

CONTENTS OF SERIES A, VOL. 31, PART 2, 1969

Nonparametric statistics: A personal review.....	<i>I. Richard Savage</i>
Nonparametric tests for multivariate interchangeability. Part Two: The problem of MANOVA in two-way layouts.....	<i>Pranab Kumar Sen</i>
Distribution-free tests of randomness.....	<i>C. B. Bell and John F. Donoghue</i>
On Wheeler and Watson's two-sample test on a circle.....	<i>K. V. Mardia</i>
The infinite divisibility of multivariate gamma distributions.....	<i>P. A. P. Moran and D. Vere-Jones</i>
On the fiducial distribution of the parameters of the bivariate normal distribution.....	<i>G. W. Bennett</i>
On some characterizations of statistics.....	<i>D. Basu and C. G. Khatri</i>
A note on the unbiasedness of the likelihood ratio tests for some normal covariance matrices.....	<i>Arthur Cohen</i>
A characterization of the inverse gaussian distribution.....	<i>L. K. Roy and M. T. Wasan</i>
Book Reviews	
Abstracts of technical reports

# TECHNOMETRICS

## A Journal of Statistics for the Physical, Chemical and Engineering Sciences

CONTENTS

TECHNOMETRICS, Vol. 11, No. 4, November 1969

Summary of Recent Work on Variables Acceptance Sampling with Emphasis on Non-normality.....	<i>D. B. Owen</i>
Modified Sampling, Binomial and Hypergeometric Cases.....	<i>W. C. Guenther</i>
Estimation of a Linear Function for a Calibration Line; Consideration of a Recent Proposal.....	<i>J. Berkson</i>
Direct Methods for Exact Truncated Sequential Tests of the Mean of a Normal Distribution.....	<i>L. A. Aroian and D. E. Robison</i>
Protection Against Assuming the Wrong Degree in Polynomial Regression.....	<i>K. Kussmaul</i>
Maximum Likelihood Estimation of the Parameters of the Gamma Distribution and Their Bias.....	<i>S. C. Choi and R. Wette</i>
Estimating the Degrees of Freedom for Linear Combinations of Mean Squares by Satterthwaite's Formula.....	<i>D. W. Gaylor and F. N. Hopper</i>
Unfolding Particle Size Distributions.....	<i>W. L. Nicholson and K. R. Merckx</i>
Chain-Pooling ANOVA for Two-Level Factorial Replication-Free Experiments.....	<i>A. G. Holms and J. N. Berrettoni</i>
Orthogonal Main-Effect Plans Permitting Estimation of All Two-Factor Interactions for the $2^2 3^m$ Factorial Series of Designs.....	<i>B. H. Margolin</i>
Restricted Least Squares Regression and Convex Quadratic Programming.....	<i>N. Mantel</i>
Adaptive Nonparametric Classification.....	<i>C. R. Pello</i>
Progressively Censored Samples from Log-Normal and Logistic Distributions.....	<i>A. V. Gajjar and C. G. Khatri</i>
Two Sample Tests in the Weibull Distribution.....	<i>D. R. Thoman and L. J. Bain</i>
Computer Evaluation of the Normal and Inverse Normal Distribution Functions.....	<i>R. C. Milton</i>
Some Applications of the Singular Decomposition of a Matrix.....	<i>I. J. Good</i>
QUERY Maximum Likelihood Estimate in Intraclass Correlation Model.....	<i>Answered by Chien-Pai Han</i>

# THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

## OFFICERS

*President:*

Jack C. Kiefer, Department of Mathematics, Cornell University, Ithaca, New York 14850

*President-Elect:*

William Kruskal, Department of Statistics, University of Chicago, Chicago, Illinois 60637

*Executive Secretary:*

Leo Katz, Statistical Laboratory, Michigan State University, East Lansing, Michigan 48823

*Program Secretary:*

R. V. Hogg, Department of Statistics, University of Iowa, Iowa City, Iowa 52240

*Treasurer:*

George J. Resnikoff, Department of Statistics, California State College, Hayward, California 94542

*Editor:*

Z. W. Birnbaum, Department of Mathematics, University of Washington, Seattle, Washington 98105

*Managing Editor:*

K. J. C. Smith, Department of Statistics University of North Carolina, Chapel Hill, North Carolina 27514

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

Membership dues including a subscription to the ANNALS of MATHEMATICAL STATISTICS are \$20.00 per year for residents of the United States or Canada and \$12.00 per year for residents of other countries. Special student rates of \$10.00 per year are available to students residing in the U.S. and Canada. Inquiries regarding membership in the Institute should be sent to the Treasurer of the Institute.

Membership in the Institute of Mathematical Statistics is not required of authors of papers in the *Annals of Mathematical Statistics* and the fact of membership or non-membership is given no weight in the consideration of submitted manuscripts.

## Contents (Continued)

On distinguishing translates of measures.....	MAREK KANTER 1773
Minimax results for IFRA scale alternatives.....	KJELL DOKSUM 1778
A robust point estimator in a generalized regression model P. V. RAO AND J. I. THORNBY	1784
On a class of nonparametric two-sample tests for circular distributions SIEGFRIED SCHACH	1791
Inadmissibility of the best invariate estimator of extreme quantiles of the normal under squared error loss.....	J. V. ZIDEK 1801
Asymptotically nearly efficient estimators of multivariate location parameters D. S. MOORE	1809
Limiting sets and convex hulls of samples from product measures....	LLOYD FISHER 1824
Notes	
Results from the relation between two statistics of the Kolomogorov-Smirnov type.....	M. A. STEPHENS 1833
A note on the test for the location parameter of an exponential distribution KEI TAKEUCHI	1838
Near-cyclic representations for some resolution VI fractional factorial plans D. A. PREECE	1840
Note on the three series theorem.....	DEAN ISAACSON 1844
A decomposition theorem for vector variables with a linear structure C. RADHAKRISHNA RAO	1845
A branching process without rebranching.....	I. R. SAVAGE AND I. N. SHIMI 1850
Divergence properties of some martingale transforms.....	BURGESS DAVIS 1852
Addendum	
Addendum to "A delicate law of the iterated logarithm for non-decreasing stable processes".....	LEO BREIMAN 1855
Correction Note	
Correction to "New conditions for central limit theorems"....	PERCY A. PIERRE 1855
Abstracts.....	1856
News and Notices.....	1884
Publications Received.....	1887

## MEETINGS OF THE INSTITUTE

ANNUAL MEETING—Laramie, Wyoming, late August, 1970  
EASTERN REGIONAL—Chapel Hill, North Carolina, May 5-7,  
1970  
CENTRAL REGIONAL—Dallas, Texas, Spring, 1970

**Abstracts** should be submitted in duplicate to the Managing Editor, K. J. C. Smith, Department of Statistics, University of North Carolina, Chapel Hill, North Carolina 27514, on abstract blanks which may be obtained from him or from any Secretary or Associate Secretary. Abstracts must be received at least 50 days before the first day of the meeting at which they are to be presented, indicating whether presented by title or in person. (Only one contributed paper may be given in person at any one meeting.) They may be printed prior to the publication of the report of the meeting. Ordinarily, each issue will contain those abstracts received at least 75 days before it appears. Abstracts should be limited to 200 words or the equivalent and should avoid displayed expressions and complicated formulae. They can be accepted from non-members of the IMS only if introduced by members. Abstracts must follow the stylistic requests on the abstract blank, or they may be returned.
