

STATISTICAL THEORY AND METHOD ABSTRACTS

A Journal of the International Statistical Institute

The object of this abstracting service is to cover published papers concerned with statistical theory, including relevant aspects of probability and mathematical methods, and new contributions to statistical method. These abstracts provide valuable information on new developments for studying problems in many fields: such as frequency distributions, estimating and testing problems, sampling and experimental designs, variance analysis, spectral theory and other methods in time-series analysis, queueing theory, reliability and acceptance inspection. Journals appearing in all parts of the world, on mathematics and statistics, or on other fields and possible contribution of interest are regularly scanned for suitable papers. Abstracts are also prepared from collections of papers such as reports of conferences, symposia and seminars: technical reports of experiment and research stations are covered.

The abstracts do not exceed 400 words, with occasional "double abstracts" for papers where this size is not sufficient to represent the paper. The language is English; the language of the original paper is indicated. The headings give the name and address of the author together with the Journal in which the paper is published moreover a note is added on the number of references, tables and figures.

The classification scheme which is used in this Journal supplies a division of all abstracts in twelve main sections. The pages of the Journal are colour-tinted in accordance with these main sections. Each section is further sub-divided to indicate the main topic of the paper; a secondary number denotes the most important additional topic referred to by the author. A special index in each part links together these two classifications. This scheme is arranged to facilitate transfer to punch cards. Papers containing new statistical tables are listed in a separate index.

The abstracts are numbered serially, the volume number being inserted as a prefix. The Journal is published four times a year and contains approximately 1,000 abstracts. An author index, the secondary classification index and the new statistical tables index are published in issue and combined in a yearly supplement which also contains a list of all Journals represented in the volume by one or more abstracts.

<i>Annual Subscription</i>	£7. 10s. (U.S.A. \$24.00)
<i>Single Number</i>	£2. 5s. (U.S.A. \$ 7.00)
<i>Loose Leaf Binders for Single Abstract Sheets</i>	16s. 3d. including postage and packing.

TECHNOMETRICS

*A Journal of Statistics
for the Physical, Chemical and Engineering Sciences*

CONTENTS

TECHNOMETRICS, Vol. 10, No. 4 November, 1968

Errors of Measurement in Statistics	William G. Cochran
Bayesian Single Sampling Attribute Plans for Continuous Prior Distributions	Anders Hald
The Average Sample Number for Truncated Single and Double Attributes Acceptance Sampling Plans	C. C. Craig
Single-Stage Procedures for Ranking Multiply-Classified Variances of Normal Populations	Robert E. Bechhofer
Multiple Comparisons with a Control for Multiply-Classified Variances of Normal Populations	Robert E. Bechhofer
Sampling Distributions of Variance Components II. Empirical Studies of Unbalanced Nested Designs	Fred C. Leone, L. S. Nelson, N. L. Johnson, and Stan Eisenstat
Response Surface Designs for Mixture Problems	Raymond H. Myers and William O. Thompson
On Testing for the Degree of a Polynomial	Paul G. Hoel
Efficient Calculations of All Possible Regressions	Marion S. R. S. Titterton and R. Tsao
Testing the Mean and Standard Deviation of a Normal Distribution Using Quantiles	Isidore Eisenberger
A Linear Approximator for the Class Marks of a Grouped Frequency Distribution with Reference to the Unequal Interval Case	Dennis J. Aigner
Optimal Experimental Designs for Estimating the Independent Variable in Regression	R. T. O'Neil, Raymond H. Myers, and S. S. Shapiro
The Joint Assessment of Normality of Several Independent Variables	Harold R. Huggins and S. S. Shapiro
NOTES	
The Round Robin	Dick DeGray
Application of a Modification of Davidson's Method to Nonlinear Regression Problems	Patrick A. Vitale and G. Taylor
A Note on Prediction Intervals Based on Partial Observations in Certain Life Test Experiments	John E. Hewitt

Censored Sampling in Curtailed Sampling Plans by Attributes

Approximations for the Null Distribution of the W Statistic

QUERIES	Answered by William B. Smith
Bivariate Samples with Missing Values, 11

Book Reviews

The REVIEW OF THE ISI is published three times per year. The annual subscription is \$11.50 post free.

Orders should be sent to: *International Statistical Institute, 2, Oostduinlaan, The Hague, Netherlands.*

JOURNAL OF THE ROYAL STATISTICAL SOCIETY

THE JOURNAL OF THE ROYAL STATISTICAL SOCIETY is published in three series, **SERIES A (GENERAL)**, four issues a year, annual subscription, post free, £5 4s. U. S. \$15: price each part 30s: **SERIES B (METHODOLOGICAL)**, three issues a year, annual subscription post free, £4 2s. U. S. \$12: price each part 35s: **SERIES C (APPLIED STATISTICS)**, three issues a year, annual subscription 30s.; U. S. \$5, price each part 15s.

Reviews; Current Notes; Library Accessions

Contents of SERIES B (METHODOLOGICAL), Vol. 30, PART 2, 1968

- A generalization of Bayesian inference (with Discussion) A. P. DEMPSTER
- A general definition of residuals (with Discussion) D. R. COX AND E. J. SNELL
- A relatively simple form of the distribution of the multiple correlation coefficient J. GURLAND
- A note on the efficiency of least squares estimates D. R. COX AND D. V. HINKLEY
- The occurrence of replications in optimal designs of experiments to estimate parameters in non-linear models M. J. BOX
- The combination of information in generally balanced designs J. A. NELDER
- Asymptotically efficient tests by the method of n rankings P. K. SEN
- A note on a modified exponentially weighted predictor B. J. N. BLIGHT
- Some applications of probability generating functionals to the study of input-output streams D. VERE-JONES
- An application of biorthonormal expansions in theory of stochastic processes C. B. MEHR
- The asymptotic powers of multivariate tests with grouped data D. R. McNEIL
- Models for the response of a mixture N. G. BECKER
- The mixed binomial distribution and the posterior distribution of ϕ for a continuous prior distribution A. HALD
- Note on χ^2 tests for matched samples B. M. BENNETT
- A unified approach for constructing non-orthogonal main effect plans in k^n factorials B. L. RAKTOE AND W. T. FEDERER
- On the linear control of a linear system having a normal stationary stochastic input D. C. DOWSON
- A Bayesian approach to censure J. R. DUNSMORE
- Estimator for mixtures of distributions K. CHOI

SANKHYĀ

The Indian Journal of Statistics

CONTENTS OF SERIES A, VOL. 30, PART 3, 1968

Optimal stochastic control.....	Herman Chernoff
On large deviation probabilities in the case of attraction to a non-normal stable law.....	C. C. Heyde
A note on a previous lemma in the theory of least squares and some further results.....	C. Radhakrishna Rao
Some results for the singular normal multivariate regression models.....	C. G. Khatri
Some results in estimation and tests of linear hypotheses under the Gauss-Markoff model.....	Sujit Kumar Mitra and C. Radhakrishna Rao
Selection procedures based on ranks: scale parameter case.....	Prem S. Puri and Madan L. Puri
Simultaneous test procedures for one-way anova and manova based on rank scores.....	K. R. Gabriel and P. K. Sen
Simultaneous reduction of a pair of quadratic forms.....	Sujit Kumar Mitra and C. Radhakrishna Rao
A new class of g -inverse of square matrices.....	Sujit Kumar Mitra
Sequential estimation of the mean vector of a multivariate normal distribution.....	Rasul A. Khan
Asymptotically best estimator of scale based on two symmetric quantiles.....	Z. Govindarajulu and J. N. K. Rao
Book Review	
Abstracts of technical reports	

Orders for the Journal for distribution outside India are to be sent to:

Pergamon Press Ltd., Headington Hill Hall, or Oxford, England	Pergamon Press Inc., 122 East 55th Street, New York 22, USA

JOURNAL OF THE AMERICAN STATISTICAL ASSOCIATION

Volume 63

September 1968

Number 323

Crossroad Choices for the Future Development of the Federal Statistical System.....	Raymond T. Bowman
Some Properties of Symmetric Stable Distributions.....	Richard Roll and Eugene F. Fama
Statistical Inference in the Classical Occupancy Problem Unbiased Estimation of the Number of Classes.....	Bernard Harris
Parameter Estimation for a Multivariate Exponential Distribution.....	Barry C. Arnold
Some Tests of Hypotheses Concerning the Three-Parameter Weibull Distribution.....	Lee J. Bain and Darrel R. Thoman
Estimation of the Larger of Two Normal Means.....	Cohen and Saul Blumenthal
Analysis of Extreme Value Data by Sample Quantiles.....	Khalab M. Hassanein
Maximum-Likelihood Estimation, from Doubly Censored Samples, at the Parameters of the First Asymptotic Distribution of Extreme Values.....	H. Leon Harter and Albert H. Moore
An Empirical Study into Factors Affecting the F -test Under Permutation for the Randomized Block Design.....	Frank B. Baker and Raymond O. Collier
Accuracy of an Approximation to the Power of the Chi-Square Goodness of Fit Test with Small but Equal Expected Frequencies.....	Michael E. Tarter and Richard A. Kronmal
Kolmogorov-Smirnov Tests of Fit Based on Some General Bounds.....	James R. Thompson
The Estimation of Probability Densities and Cumulatives by Fourier Series Methods.....	William A. Ericsson
Accuracy Borrowing in the Estimation of the Mean by Shrinkage to an Interval.....	James R. Conner and Dalane E. Welsh
Optimal Allocation in Stratified and Multistage Samples Using Prior Information.....	Mary H. Regier
Use of Domain Estimators with Unequal Probability in Sample Surveys.....	Richard B. McHugh and Paul W. Mielke, Jr.
A Two-State Markov Model for Behavioral Change.....	Marakatha Krishnan
Negative Variance Estimates and Statistical Dependence in Nested Sampling.....	William G. Bulgren and D. E. Amos
Series Representations of the Doubly Noncentral t -Distribution.....	Max Halperin and Joan Gurian
A Note on Representations of the Doubly Noncentral t -Distribution.....	Olive Jean Dunn
Confidence Bands in Linear Regression with Constraints on the Independent Variables.....	Dale M. Heien
A Note on Confidence Bands for a Regression Line Over a Finite Range.....	Rasul A. Khan
A Note on Log-Linear Regression.....	G. K. Eagleson
A Note on Estimating the Mean of a Normal Distribution with Known Coefficient of Variation.....	
A Note on Linear Regression in Trivariate Distributions.....

AMERICAN STATISTICAL ASSOCIATION

810 18th Street, N.W.

Washington, D. C. 20006

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

OFFICERS

President:

Wassily Hoeffding, Department of Statistics, University of North Carolina, Chapel Hill, North Carolina 27514

President-Elect:

Jack C. Kiefer, Department of Mathematics, Cornell University, Ithaca, New York 14850

Executive Secretary:

Leo Katz, Statistical Laboratory, Michigan State University, East Lansing, Michigan 48823

Program Secretary:

R. V. Hogg, Department of Statistics, University of Iowa, Iowa City, Iowa 52240

Treasurer:

George J. Resnikoff, Department of Statistics, California State College, Hayward, California 94542

Editor:

Z. W. Birnbaum, Department of Mathematics, University of Washington, Seattle, Washington 98105

Managing Editor:

Paul L. Meyer, Department of Mathematics, Washington State University, Pullman, Washington 99163

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

Membership dues including a subscription to the ANNALS of MATHEMATICAL STATISTICS are \$20.00 per year for residents of the United States or Canada and \$12.00 per year for residents of other countries. Special student rates of \$10.00 per year are available to students residing in the U.S. and Canada. Inquiries regarding membership in the Institute should be sent to the Treasurer of the Institute.

Membership in the Institute of Mathematical Statistics is not required of authors of papers in the *Annals of Mathematical Statistics* and the fact of membership or non-membership is given no weight in the consideration of submitted manuscripts.

Contents (Continued)

An elementary method for obtaining lower bounds on the asymptotic power of rank tests.....	JOSEPH L. GASTWIRTH AND STEPHEN WOLFF	2128
Representing finitely additive invariant probabilities....	RICHARD A. OLSEN	2131
Necessary conditions for almost sure extinction of branching process with random environment.....	WALTER L. SMITH	2136
Comparison tests for the convergence of martingales.....	BURGESS DAVIS	2141
A generalization of Ito's theorem concerning the pointwise ergodic theorem	CHOO-WHAN KIM	2145
Weak convergence of a sequence of quickest detection problems	DONALD L. IGLEHART AND HOWARD M. TAYLOR	2149
Bounds for the probability of a union of events, with applications	EUSTRATIOS G. KOUNIAS	2154
A note on the weak law.....	C. M. DEO AND D. R. TRUAX	2159
Correction Notes.....		2161
Book Reviews		
THOMAS S. FERGUSON: <i>Mathematical Statistics</i>	ROBERT A. WIJSMAN	2163-2167
J. G. KEMENY, L. J. SNELL AND A. W. KNAPP: <i>Denumerable Markov Chains</i>	STEVEN OREY	2168
J. J. MARTIN: <i>Bayesian Decision Problems and Markov Chains</i> .	B. R. BHAT	2169-2170
Abstracts.....		2171
News and Notices.....		2174
Report of the President.....		2177
Report of the Treasurer.....		2178
Report of the Program Secretary.....		2181
Report of the Editor.....		2182
Report of the Managing Editor.....		2183
Report of the Madison, Wisconsin meeting.....		2185
Publications Received.....		2187

MEETINGS OF THE INSTITUTE

ANNUAL MEETING—New York, New York, August 19-22, 1969
Laramie, Wyoming, late August, 1970
CENTRAL REGIONAL—Iowa City, Iowa, April 23-25, 1969
Dallas, Texas, Spring, 1970
WESTERN REGIONAL—Monterey, California, May 7-9, 1969

Abstracts should be submitted in duplicate to the Managing Editor, P. L. Meyer, Department of Mathematics, Washington State University, Pullman, Washington, on abstract blanks which may be obtained from him or from any Secretary or Associate Secretary. Abstracts must be received at least 50 days before the first day of the meeting at which they are to be presented, indicating whether presented by title or in person. (Only one contributed paper may be given in person at any one meeting.) They may be printed prior to the publication of the report of the meeting. Ordinarily, each issue will contain those abstracts received at least 75 days before it appears. Abstracts should be limited to 200 words or the equivalent and should avoid displayed expressions and complicated formulae. They can be accepted from non-members of the IMS only if introduced by members. Abstracts must follow the stylistic requests on the abstract blank, or they may be returned.
