

THE ANNALS of MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938
EDITED BY S. S. WILKS, 1938-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE
OF MATHEMATICAL STATISTICS

Contents

	PAGE
Asymptotic normality of simple linear rank statistics under alternatives	
JAROSLAV HÁJEK	325
Some results on multitype continuous time Markov branching processes	
KRISHNA BALASUNDARAM ATHREYA	347
A random time change relating semi-Markov and Markov processes	JAMES YACKEL 358
A remark on hitting places for transient stable process	SIDNEY C. PORT 365
Transforms of stochastic processes	P. WARWICK MILLAR 372
Substitution in conditional expectation	R. R. BAHADUR AND P. J. BICKEL 377
On convergence in r -mean of normalized partial sums	
RONALD PYKE AND DAVID ROOT	379
The invariance principle for a lattice of random variables	J. KUELBS 382
A simpler proof of Smith's roulette theorem	LESTER E. DUBINS 390
A characterization of certain sequences of norming constants	
STEPHEN R. KIMBLETON	394
The probability that the sample distribution function lies between two parallel straight lines	J. DURBIN 398
Non-discounted denumerable Markovian decision models	SHELDON ROSS 412
On recurrent denumerable decision processes	LLOYD FISHER 424
Characterizations of independence in certain families of bivariate and multivariate distributions	KUMAR JOGDEO 433
Asymptotically optimal Bayes and minimax procedures in sequential estimation	
PETER J. BICKEL AND JOSEPH A. YAHAV	442
On the choice of design in stochastic approximation methods	VÁCLAV FABIAN 457
Concentration of random quotients	WILLIAM H. LAWTON 466
On the numerical representation of qualitative condition probability	
R. DUNCAN LUCE	481
Minimax estimation of a random probability whose first N moments are known	
MORRIS SKIBINSKY	492
Estimation of the larger translation parameter	
SAUL BLUMENTHAL AND ARTHUR COHEN	502
Estimation of two ordered translation parameters	
SAUL BLUMENTHAL AND ARTHUR COHEN	517
A comparison of the most stringent and the most stringent somewhere most powerful test for certain problems with restricted alternative	W. SCHAAFBSMA 531
Likelihood ratio tests for restricted families of probability distributions	
RICHARD E. BARLOW	547

Continued on back cover

Vol. 39, No. 2—April 1968

THE ANNALS OF MATHEMATICAL STATISTICS

Subscription Rates. Current issues are \$30 per volume (six issues of one calendar year) in the U.S. and Canada, \$22.50 per volume elsewhere. Single issues are \$5.75. Back numbers for all issues up to and including 1956 (Volume 27) are \$16.50 per volume, \$4.50 per issue; issues from 1957 through 1964 are \$22.00 per volume, \$5.75 per issue; from 1965 onward, \$33.00 per volume, \$5.75 per issue. Complete sets (Volumes 1 to 24) are \$275.00. If additional volumes are ordered at the same time complete sets are ordered, the price is \$16.50 per volume for Volume 28 to Volume 35, and \$22.00 per volume for Volume 36 onward.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning **subscriptions, back numbers, payment of dues, membership, changes of address, etc.**, should be addressed to Professor George J. Resnikoff, Treasurer, Department of Statistics, California State College, Hayward, California 94542.

Papers to be submitted for publication should be sent to the Editor, Z. W. Birnbaum, Department of Mathematics, University of Washington, Seattle, Washington 98105. **Abstracts and corrected galley proofs** should be sent to the Managing Editor, P. L. Meyer, Department of Mathematics, Washington State University, Pullman, Washington 99163.

Preparation of manuscripts. Each manuscript should be typewritten, double spaced with wide margins at sides, top, and bottom, and the original should be submitted with one additional copy, on paper that will take corrections. Dittoed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or bibliography at the end of the paper; formulae in footnotes should be avoided. References should follow the style of 33 313-314.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter *l*, numeral 1 used as superscript and prime ([']), alpha and a, kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g., $\log \bar{x}$) and underlined letters (e.g., \underline{x}) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol exp. In writing square roots the fractional exponent is preferable to the radical sign. Fractions are preferably written with the

solidus; thus $(a + b)/(c + d)$ rather than $\frac{a + b}{c + d}$, and ab/cd rather than $\frac{ab}{cd}$.

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

Mail to the *Annals of Mathematical Statistics* should be addressed to either the Editor, Managing Editor or the Treasurer, as described above. It should *not* be addressed to Waverly Press.

COMPOSED AND PRINTED AT THE
WAVERLY PRESS, INC., BALTIMORE, MARYLAND 21202 U.S.A.

Second-class postage paid at Baltimore, Maryland 21202
