

# STATISTICAL THEORY AND METHOD ABSTRACTS

## A Journal of the International Statistical Institute

The object of this abstracting service is to cover published papers concerned with statistical theory, including relevant aspects of probability and mathematical methods, and new contributions to statistical method. These abstracts provide valuable information on new developments for studying problems in many fields: such as frequency distributions, estimating and testing problems, sampling and experimental designs, variance analysis, spectral theory and other methods in time-series analysis, queueing theory, reliability and acceptance inspection. Journals appearing in all parts of the world, on mathematics and statistics, or on other fields and possible contribution of interest are regularly scanned for suitable papers. Abstracts are also prepared from collections of papers such as reports of conferences, symposia and seminars: technical reports of experiment and research stations are covered.

The abstracts do not exceed 400 words, with occasional "double abstracts" for papers where this size is not sufficient to represent the paper. The language is English; the language of the original paper is indicated. The headings give the name and address of the author together with the Journal in which the paper is published moreover a note is added on the number of references, tables and figures.

The classification scheme which is used in this Journal supplies a division of all abstracts in twelve main sections. The pages of the Journal are colour-tinted in accordance with these main sections. Each section is further sub-divided to indicate the main topic of the paper; a secondary number denotes the most important additional topic referred to by the author. A special index in each part links together these two classifications. This scheme is arranged to facilitate transfer to punch cards. Papers containing new statistical tables are listed in a separate index.

The abstracts are numbered serially, the volume number being inserted as a prefix. The Journal is published four times a year and contains approximately 1,000 abstracts. An author index, the secondary classification index and the new statistical tables index are published in issue and combined in a yearly supplement which also contains a list of all Journals represented in the volume by one or more abstracts.

<i>Annual Subscription</i>	£7. 10s. (U.S.A. \$24.00)
<i>Single Number</i>	£2. 5s. (U.S.A. \$ 7.00)
<i>Loose Leaf Binders for</i>	16s. 3d. including postage
<i>Single Abstract Sheets</i>	and packing.

# TECHNOMETRICS

## *A Journal of Statistics for the Physical, Chemical and Engineering Sciences*

### CONTENTS

#### TECHNOMETRICS, Vol. 9, No. 4, NOVEMBER 1967

Comparisons of Designs and Estimation Procedures for Estimating Parameters in a Two-stage Nested Process	R. L. Anderson and P. P. Crump
Sequential Designs for Spherical Weight Functions	N. R. Draper and W. E. Lawrence
Selection of the Best Subset in Regression Analysis	R. R. Hocking and R. N. Leslie
Analysis of Outliers with Adjusted Residuals	G. C. Tiao and Irwin Guttman
A Table for Rank Sum Multiple Paired Comparisons	Ethel Tobach, Mark Smith, George Rose and Donald Richter
Saturated Fractions of $2^n$ and $3^n$ Factorial Designs	R. L. Rechtschaffen
A Procedure to Estimate the Population Mean in Random Effects Models	G. G. Koch
Remarks on Large Sample Estimators for Some Discrete Distributions	L. R. Shenton and K. O. Bowman
Approximate Maximum Likelihood Estimates from Grouped Data	G. M. Tallis
Maximum Likelihood Estimation of the Parameters of the Beta Distribution from Smallest Order Statistics	R. Gnanadesikan, R. S. Pinkham and L. P. Hughes
Estimation of Parameters in the Weibull Distribution	L. J. Bain and C. E. Antle
Tables for Obtaining the Best Linear Invariant Estimates of Parameters of the Weibull Distribution	Nancy R. Mann

#### NOTES

A Useful Approximation to the Normal Distribution Function, with Application to Simulation	Irving W. Burr
A Study of Robust Estimators	Fred C. Leone, Toke Jayachandran and Stanley Eisenstat
A Minimum Cost Model of Spare Parts Inventory Control	Alvin D. Wiggins
Tables of the Distribution of the Mann-Whitney-Wilcoxon $U$ -Statistic Under Lehmann Alternatives	Roger A. Shorack

#### QUERIES

Bivariate Samples with Missing Values	Jack Nadler

#### INDEX TO VOLUME 9, 1967

The purpose of **TECHNOMETRICS** is to contribute to the development and use of statistical methods in the physical, chemical and engineering sciences. This objective places a high premium on succinct communication among the physical scientist, engineer, statistician and mathematician. The journal will accept for publication papers describing new statistical techniques expected to be useful in these sciences, papers illustrating the application of known statistical methods to new or novel environments, expository or tutorial papers on particular statistical methods, and papers dealing with the philosophy and problems of applying statistical methods to research, development, design and performance. Brief descriptions of problems requiring solution and short technical notes will also be accepted for publication.

For further information please contact **TECHNOMETRICS** Post Office Box 587 Benjamin Franklin Station Washington, D. C. 20004.

## JOURNAL OF THE AMERICAN STATISTICAL ASSOCIATION

Volume 62

September 1967

Number 319

Informative Stopping Rules and Inferences.....	Harry V. Roberts
The Assessment of Prior Distributions in Bayesian Analysis.....	Robert L. Winkler
Finite Sample Monte Carlo Studies: An Autoregressive Illustration.....	Hodson Thorner
An Appraisal of Least Squares Programs for the Electronic Computer from the Point of View of the User.....	James W. Longley
Random Walk Design in Bio-Assay.....	R. K. Tsutakawa
Approximating the Upper Binomial Confidence Limit.....	Theodore W. Anderson, Jr. and Herman Burstein
On the Interpretation of Age Distributors.....	Nathan Keyfitz, Dhruva Nagnur and Divakar Sharma
Schooling, Experience, and Gains and Losses in Human Capital Through Migration.....	Mary Jean Bowman and Robert G. Myers
Sampling Error in Consumer Price Index.....	Marvin Wilkerson
Exact Moments of the Order Statistics of the Geometric Distribution and their Relation to Inverse Sampling and Reliability of Redundant Systems.....	Barry H. Margolin and Herbert S. Winokur, Jr.
On Medians and Quasi Medians.....	E. L. Lehmann and J. L. Hodges, Jr.
Asymptotic Efficiency of the Two Sample Kolmogorov-Smirnov Test.....	Jerome Klotz
Asymptotic Efficiency of Two Nonparametric Competitors of Wilcoxon's Two Sample Test.....	Myles Hollander
Asymptotically Robust Estimation of Location.....	M. M. Siddiqui and K. Raghunandan
Efficiency Loss Due to Grouping in Distribution-Free Tests.....	D. R. McNeill
Distribution and Power of the Absolute Normal Scores Test.....	Z. Govindarajulu, Rory Thompson and Kjell A. Doksum
A Critical Comparison of Three Strategies of Collecting Data from Households.....	Joseph R. Hochstim
A Multi-Proportions Randomized Response Model.....	B. G. Greenberg, Abdel-Latif A. Abul-Ela and Daniel G. Horvitz
Generalized Multivariate Estimator for the Mean of Finite Populations.....	Poduri S.R.S. Rao and Govind S. Mudholkar
Estimates in Successive Sampling Using a Multi-Stage Design.....	D. Singh
An Optimum Property of the Horvitz-Thomson Estimate.....	Vijaya Hegde
On Fractional Powers of a Matrix.....	Martin E. Abel and Frederick V. Waugh
Orthonormal Bases of Error Spaces and Their Use for Investigation of the Normality and Variances of Residuals.....	William S. Mallios
A Structural Regression Approach to Covariance Analysis when the Covariable is Uncontrolled.....	Max Halperin, Suresh C. Rastogi, Irwin Ho and Y. Y. Yang
Shorter Confidence Bands in Linear Regression.....	Edward E. Cureton
The Normal Approximation to the Signed-Rank Sampling Distribution When Zero Differences are Present.....

# THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

## OFFICERS

*President:*

Theodore E. Harris, Department of Mathematics, University of Southern California, Los Angeles, California 90007

*President-Elect:*

Herman Chernoff, Department of Statistics, Stanford University, Stanford, California 94305

*Executive Secretary:*

G. E. Nicholson, Jr., Department of Statistics, University of North Carolina, Chapel Hill, North Carolina 27515

*Program Secretary:*

Joan Raup Rosenblatt, National Bureau of Standards, Washington, D.C. 20234

*Treasurer:*

George J. Resnikoff, Department of Statistics, California State College, Hayward, California 94542

*Editor:*

Z. W. Birnbaum, Department of Mathematics, University of Washington, Seattle, Washington 98105

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

Membership dues including a subscription to the ANNALS of MATHEMATICAL STATISTICS are \$20.00 per year for residents of the United States or Canada and \$12.00 per year for residents of other countries. Special student rates of \$10.00 per year are available to students residing in the U.S. and Canada. Inquiries regarding membership in the Institute should be sent to the Treasurer of the Institute.

Membership in the Institute of Mathematical Statistics is not required of authors of papers in the *Annals of Mathematical Statistics*, and the fact of membership or non-membership is given no weight in the consideration of submitted manuscripts.

## Contents (Continued)

Sample sequences of maxima.....	JAMES PICKANDS, III 1570
Notes	
On large deviation problems for sums of random variables which are not attracted to the normal law.....	C. C. HEYDE 1575
Sample functions of Gaussian random homogeneous fields are either continuous or very irregular.....	D. M. EAVES 1579
Monotone convergence of binomial probabilities with an application to maximum likelihood estimation.....	KUMAR JOGDEO 1583
On robust estimation in incomplete block designs	MADAN LAL PURI AND PRANAB KUMAR SEN 1587
A note on classification.....	ASHOK K. SAXENA 1592
Correction Note.....	1594
Abstracts of Papers.....	1595
News and Notices.....	1599
Report of the Missoula Meeting.....	1602
Publications Received.....	1604

## MEETINGS OF THE INSTITUTE

ANNUAL MEETING - Washington, D. C. - December 27-30, 1967

Abstracts should be submitted in duplicate to the Managing Editor, P. L. Meyer, Department of Mathematics, Washington State University, Pullman, Washington, on abstract blanks which may be obtained from him or from any Secretary or Associate Secretary. Abstracts must be received at least 50 days before the first day of the meeting at which they are to be presented, indicating whether presented by title or in person. (Only one contributed paper may be given in person at any one meeting.) They may be printed prior to the publication of the report of the meeting. Ordinarily, each issue will contain those abstracts received at least 75 days before it appears. Abstracts should be limited to 200 words or the equivalent and should avoid displayed expressions and complicated formulae. They can be accepted from non-members of the IMS only if introduced by members. Abstracts must follow the stylistic requests on the abstract blank, or they may be returned.
