

THE ANNALS of MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938
EDITED BY S. S. WILKS, 1938-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE
OF MATHEMATICAL STATISTICS

Contents

	PAGE
Rates of convergence of estimates and test statistics	R. R. BAHADUR 303
Upper and lower probabilities induced by a multivalued mapping	A. P. DEMPSTER 325
Locally minimax tests	RICHARD E. SCHWARTZ 340
On the probability of large deviations of functions of several empirical cdf's	A. BRUCE HOADLEY 360
On an inequality of Hoeffding	BENGT ROSEN 382
Some sharp multivariate Techebycheff inequalities	GOVIND S. MUDHOLKAR AND PODURI S. R. S. RAO 393
The theory of experiment: operational definition of the probability space	MILTON PHILIP OLSON 401
Stirling behavior is asymptotically normal	L. H. HARPER 410
Characterizations of conditional expectations	J. PFANZAGL 415
Optimum invariant tests in unbalanced variance components models	EMIL SPIJØTVOLL 422
Distribution-free tests of independence	C. B. BELL AND K. A. DOKSUM 429
Stringent solutions to statistical decision problems	ROBERT COGBURN 447
Multistage sampling procedures based on prior distributions and costs	W. SCHÜLER 464
On the lack of a uniformly consistent sequence of estimators of a density function in certain cases	R. H. FARRELL 471
On the maximum deviation of the sample density	MICHAEL WOODROOFE 475
On estimating a density which is measurable with respect to a σ -lattice	TIM ROBERTSON 482
A sequential search procedure	MILTON C. CHEW, JR. 494
Expansions of t densities and related complete integrals	JAMES M. DICKEY 503
Matricovariate generalizations of the multivariate t distribution and the inverted multivariate t distribution	JAMES M. DICKEY 511
The treatment of ties in the Wilcoxon test	WOLFGANG J. BÜHLER 519
Multi-sample analogues of some one-sample tests	K. L. MEHRA AND M. L. PURI 523
Comparing distances between multivariate populations—the problem of minimum distances	M. S. SRIVASTAVA 550
Asymptotic variances and covariances of maximum-likelihood estimators, from censored samples, of the parameters of Weibull and gamma populations	H. LEON HARTER AND ALBERT H. MOORE 557

(Continued on back cover)

Vol. 38, No. 2—April 1967

THE ANNALS OF MATHEMATICAL STATISTICS

Subscription Rates. Current issues are \$30 per volume (six issues of one calendar year) in the U. S. and Canada, \$22.50 per volume elsewhere. Single issues are \$5.25. Back numbers for all issues up to and including 1956 (Vol. XXVII) are \$15 per volume, \$4.00 per issue; issues from 1957 through 1964 are \$20.00 per volume, \$5.25 per issue; from 1965 onward, \$30 per volume, \$5.25 per issue. Complete sets (Volumes I-XXVII) are \$250. If additional volumes are ordered at the same time the set is ordered, the price is \$15 for each additional volume. An index to Volumes I-XXXI is available for \$10.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning subscriptions, back numbers, payment of dues, membership, changes of address, etc., should be addressed to Professor George J. Resnikoff, Treasurer, Department of Statistics, California State College, Hayward, California 94542.

Papers to be submitted for publication should be sent to the Editor, D. L. Burkholder, Department of Mathematics, University of Illinois, Urbana, Illinois 61803. Abstracts and corrected galley proofs should be sent to the Managing Editor, P. L. Meyer, Department of Mathematics, Washington State University, Pullman, Washington 99163.

Preparation of manuscripts. Each manuscript should be typewritten, double spaced with wide margins at sides, top, and bottom, and the original should be submitted with one additional copy, on paper that will take corrections. Dittoed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or bibliography at the end of the paper; formulae in footnotes should be avoided. References should follow the style of **33** 313-314.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter l, numeral 1 used as superscript and prime ('), alpha and a, kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g., $\overline{\log x}$) and underlined letters (e.g., \underline{x}) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol \exp . In writing square roots the fractional exponent is preferable to the radical sign. Fractions are preferably written with the

solidus; thus $(a + b)/(c + d)$ rather than $\frac{a + b}{c + d}$, and ab/cd rather than $\frac{ab}{cd}$.

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

Mail to the *Annals of Mathematical Statistics* should be addressed to either the Editor, Managing Editor or the Treasurer, as described above. It should *not* be addressed to Waverly Press.

COMPOSED AND PRINTED AT THE
WAVERLY PRESS, INC., BALTIMORE, MARYLAND 21202 U.S.A.

Second-class postage paid at Baltimore, Maryland 21202
