THE ANNALS of MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930–1938
EDITED BY S. S. WILKS, 1938–1949

THE OFFICIAL JOURNAL OF THE INSTITUTE OF MATHEMATICAL STATISTICS

Contents

PAGE

Some invariance principles for functionals of a Markov chain...DAVID A. FREEDMAN 1

General proof of termination with probability one of invariant sequential probability ratio tests based on multivariate normal observations.....R. A. WIJSMAN 8

An occupation time theorem for the angular component of plane Brownian motion SIMEON M. BERMAN 25

Lipschitz behavior and integrability of characteristic functions.....R. P. BOAS 32

Random hydrodynamic forces on objects.....LEON E. BORGMAN 37

Asymptotic distribution of linear combinations of functions of order statistics with applications to estimation HERMAN CHERNOFF, JOSEPH L. GASTWIRTH AND M. V. JONES 52

The asymptotic theory of Galton's test and a related simple estimate of locaton P. J. BICKEL AND J. L. HODGES, JR. 73

Asymptotic efficiency of certain rank tests for comparative experiment K. L. MEHRA AND J. SARANGI 90

Limit theorems for functions of shortest two-sample spacings and a related test SAUL BLUMENTHAL 108

Sequential procedures for selection of the best one of several binomial populations EDWARD PAULSON 117

Some optimum properties of ranking procedures.....MORRIS L. EATON 124

Reconstructing patterns from sample data.....PAUL SWITZER 138

Adequate subfields and sufficiency.....MORRIS SKIBINSKY 155

A bivariate t distribution.....M. M. SIDDIQUI 162

Cylindrically rotatable designs of types 1, 2, and 3.....AGNES M. HERZBERG 167

A method for the construction of second order rotatable designs in k dimensions AGNES M. HERZBERG 177

An extension of the Robbins-Monro procedure.....J. H. VENTER 181

Stochastic approximation of minima with improved asymptotic speed VÁCLAV FABIAN 191

(Continued on back cover)

Vol. 38, No. 1—February 1967

Institute of Mathematical Statistics is collaborating with JSTOR to digitize, preserve, and extend access to *The Annals of Mathematical Statistics.* www.jstor.org

THE ANNALS OF MATHEMATICAL STATISTICS

Subscription Rates. Current issues are $30 per volume (six issues of one calendar year) in the U. S. and Canada, $22.50 per volume elsewhere. Single issues are $5.25. Back numbers for all issues up to and including 1956 (Vol. XXVII) are $15 per volume, $4.00 per issue; issues from 1957 through 1964 are $20.00 per volume, $5.25 per issue; from 1965 onward, $30 per volume, $5.25 per issue. Complete sets (Volumes I-XXVII) are $250. If additional volumes are ordered at the same time the set is ordered, the price is $15 for each additional volume. An index to Volumes I-XXXI is available for $10.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning **subscriptions, back numbers, payment of dues, membership, changes of address,** etc., should be addressed to Professor George J. Resnikoff, Treasurer, Department of Statistics, California State College, Hayward, California 94542.

Papers to be submitted for publication should be sent to the Editor, D. L. Burkholder, Department of Mathematics, University of Illinois, Urbana, Illinois 61803. **Abstracts and corrected galley proofs** should be sent to the Managing Editor, P. L. Meyer, Department of Mathematics, Washington State University, Pullman, Washington 99163.

Preparation of manuscripts. Each manuscript should be typewritten, double spaced with wide margins at sides, top, and bottom, and the original should be submitted with one additional copy, on paper that will take corrections. Dittoed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or bibliography at the end of the paper; formulae in footnotes should be avoided. References should follow the style of 33 313–314.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter l, numeral 1 used as superscript and prime (′), alpha and a, kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g., $\overline{\log x}$) and underlined letters (e.g., $\underline{x}$) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol exp. In writing square roots the fractional exponent is preferable to the radical sign. Fractions are preferably written with the solidus; thus $(a + b)/(c + d)$ rather than $\frac{a + b}{c + d}$, and ab/cd rather than $\frac{ab}{cd}$.

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

Mail to the *Annals of Mathematical Statistics* should be addressed to either the Editor, Managing Editor or the Treasurer, as described above. It should *not* be addressed to Waverly Press.

COMPOSED AND PRINTED AT THE

WAVERLY PRESS, INC., BALTIMORE, MARYLAND 21202 U.S.A.

Second-class postage paid at Baltimore, Maryland 21202
