

SANKHYĀ

The Indian Journal of Statistics

CONTENTS OF SERIES A, VOL. 28, PARTS 2 & 3, 1966

Sufficient statistics in the case of non-constant carrier	E. W. Barankin
Sufficient statistics in the case of non-constant carrier II	E. W. Barankin
An analysis of some insect trap records	C. I. Bliss
Sufficiency for regular models	D. A. S. Fraser
On sufficiency and conditional sufficiency	D. A. S. Fraser
On the relation between a particular stochastic process and its two imbedded Markov processes	J. L. Gastwirth and S. S. Wolff
The comparison of multivariate tests of hypothesis by means of Bahadur efficiency	Leon J. Gleser
Some aspects of unified sampling theory	T. V. Hanurav
On some spectral properties of a transition matrix	Paul T. Holmes
Some invariants of some discrete distributions admitting sufficient statistics for parameters	V. S. Huzurbazar
On the multivariate generalised power series distribution and its application to the multinomial and negative multinomial	G. P. Patil
On minimum variance unbiased estimation for the logarithmic series distribution	G. P. Patil and Sheela Bildikar
Characterization of the distribution of random variables in linear structural relations	C. Radhakrishna Rao
Bayes risk consistency of classification procedures using density estimation	J. Van Ryzin
The role of probability in fiducial inference	J. S. Williams
An example of the misapplication of conditional densities	J. S. Williams
NOTES	
Multiple regression analysis of binary and multinomial variates	B. M. Bennett
Some remarks on the choice of systems of confidence intervals	H. S. Konijn
Alternative proofs of some theorems on characteristic functions	P. K. Pathak
On one sided distribution function	B. Ramachandran

Orders for the Journal for distribution outside India are to be sent to:

Pergamon Press Ltd., Pergamon Press Inc.,
Headington Hill Hall, or 122 East 57th Street,
Oxford, England New York 22, USA

Orders for the Journal for distribution within India are to be sent to:

Statistical Publishing Society,
204/1 Barrackpore Trunk Road,
Calcutta-35, India

ESTADÍSTICA

Journal of the Inter American Statistical Institute

Vol. XXIV, No. 90

BIOMETRIKA

Volume 53, Parts 3 & 4

Contents

December 1966

Memoirs

F. R. HODSON, P. H. A. SNEATH AND J. E. DORAN. Some experiments in the numerical analysis of archaeological data. J. C. GOWER. Some distance properties of latent root and vector methods used in multivariate analysis. C. R. RAO. Discriminant function between composite hypotheses and related problems. M. SCHATZOFF. Exact distributions of Wilke's likelihood ratio criterion. P. A. P. MORAN. Measuring the length of a curve. J. R. PHILIP. Some integral equations in geometrical probability. Z. A. LOMNICKI. A note on the Weibull Renewal Process. M. TEN HOOPEN AND H. A. REUVER. The superposition of random sequences of events. E. POLLAK. Some effects of fluctuating offspring distributions on the survival of a gene. J. H. POLLARD. On the use of the direct matrix product in analysing certain stochastic population models. J. S. MARITZ. Smooth empirical Bayes estimation for one-parameter discrete distributions. M. H. MYERS, M. A. SCHNEIDERMAN AND P. ARMITAGE. Boundaries for closed sequential t test plans. G. B. WETHERILL, H. CHEN AND R. B. VASUDEVA. Sequential estimation of quantal response curves: a new method of estimation. J. W. PRATT. The outer needle of some Bayes sequential continuation regions. R. BOHRER. On Bayes sequential design with two random variables. G. C. TIAO AND W. Y. TAN. Bayesian analysis of random-effect models in the analysis of variance. II. Effect of autocorrelated errors. D. A. PREECE. Some balanced incomplete block designs for two sets of treatments. E. R. MULLER. Balanced confounding of factorial experiments. N. R. DRAPER AND W. G. HUNTER. Design of experiments of parameter estimation in multiresponse situations. SHIRLEY E. HITCHCOCK. Tests of hypotheses about the parameters of the logistic function. D. R. MCNEIL. Consistent statistics for estimating and testing hypotheses from grouped samples. R. MEAD. A quick method of estimating the standard deviation. S. S. GUPTA AND M. GNANADESIKAN. Estimation of the parameters of the logistic distribution. J. N. K. RAO AND J. T. WEBSTER. On two methods of bias reduction in the estimation of ratios. U. R. MAAG. A k -sample analogue of Watson's U^2 statistics.

Miscellanea

Contributions by D. R. BRILLINGER; D. R. COX; N. H. DRAPER AND W. E. LAWRENCE; H. T. GONIN; J. C. GOWER; H. L. GRAY AND P. L. ODELL; A. W. KEMP AND C. D. KEMP; I. KOTLARSKI; A. M. KSHIRSAGAR; H. O. LANCASTER; J. G. SAW; B. K. SHAH; M. J. SLAKTER; M. D. SPRINGER AND W. E. THOMPSON; M. L. TIKU.

Correction: J. DURBIN.

Reviews: M. S. BARTLETT; J. AITCHISON.

New Publications in Statistics and Probability

The subscription, payable in advance, is £3.10s. (or \$10.00) per volume (including postage). Cheques should be made payable to *Biometrika*, crossed "*a/c Biometrika Trust*" and sent to the Secretary, *Biometrika Office*, University College, Gower Street, London, W.C.1. All foreign cheques must be drawn on a Bank having a London agency.

Issued by THE BIOMETRIKA OFFICE, University College, London

TRABAJOS DE ESTADISTICA y de INVESTIGACION OPERATIVA

Review published by the "Instituto de Investigaciones Estadísticas" of the "Consejo Superior de Investigaciones Científicas", Madrid 6, Spain.

VOL. XVII

CONTENTS

CUADERNO I

MAURICE FRECHET—Les diferentes hierchisations nulle (ou des probabilités nulles).

A. FERNANDEZ DE TROCONIZ—Caminos y circuitos hamiltonianos en gráficos fuertemente conexos.

C. B. BELL Y M. F. CHICARRO—Algunas generalizaciones del test no paramétrico de Siegel-Tukey.

M. B. BENNETT—On alternatives to the multinormal distribution.

K. P. SAXENA AND V. P. GUPTA—A note on asano's theorem on inference of variance.

NOTAS.

JUAN SOTO SERRANO—Medida de la entropía del idioma castellano escrito.

CLAUDIO SCALA—Le regioni ellittiche di confidenza congiunta como criterio dirimente in un problema tassonomico di geomorfología ipogea.

EJERCICIOS

CRONICA

BIBLIOGRAFIA

The annual suscription is 200 pts. for Spain or 360 pts. for all other countries. The Review is issued in three parts each year (about 350 pp.)

All communications concerning the publication of papers, interchanges and subscriptions should be addressed to Prof. S. Ríos, Serrano 123, Madrid-6 Spain.

TECHNOMETRICS

*A Journal of Statistics
for the Physical, Chemical and Engineering Sciences*

CONTENTS

TECHNOMETRICS, Vol. 8, No. 4, NOVEMBER 1966

- A Review of Response Surface Methodology: A Literature Survey..... *William J. Hill and William G. Hunter*
 Distribution-Free Life Test Sampling Plans..... *Richard E. Barlow and Shanti S. Gupta*
 Sequential Rank Tests II. Modified Two-Sample Procedures..... *Ralph A. Bradley, Sarla D. Merchant and Frank Wilcoxon*
 Use and Abuse of Regression..... *George E. P. Box*
 Binomial Group-Testing with an Unknown Proportion of Defectives..... *Milton Sobel and Phyllis A. Groll*
 Discriminant Analysis When the Initial Samples are Misclassified..... *Peter A. Lachenbruch*
 The Correct Use of the Sample Mean Absolute Deviation in Confidence Intervals for a Normal Variate..... *Richard G. Krutchkoff*
 An A Posteriori Probability Method for Solving an Overdetermined System of Equations..... *Wayne E. Smith*
 Percentage Points of the Beta Distribution for Use in Bayesian Analysis of Bernoulli Processes..... *Jerome Bracken*
- NOTES
 Testing for the Inclusion of Variables in Linear..... *Norman R. Draper*
 Regression by a Randomisation Technique..... *David M. Stoneman*
 A Note on the Variance of the Distribution of Sample..... *C. Philip Cox*
 Number in Sequential Probability Ratio Tests..... *Thomas D. Roseberry*
 On Addelman's 2¹⁷⁻⁹ Resolution V Plan..... *D. A. Preece*
- QUERIES
 Combining Values of Observed χ^2 's..... *Lloyd S. Nelson*
- BOOK REVIEWS
 LETTER TO THE EDITOR
 INDEX TO VOLUME 8, 1966

The purpose of TECHNOMETRICS is to contribute to the development and use of statistical methods in the physical, chemical and engineering sciences. This objective places a high premium on succinct communication among the physical scientist, engineer, statistician and mathematician. The journal will accept for publication papers describing new statistical techniques expected to be useful in these sciences, papers illustrating the application of known statistical methods to new or novel environments, expository or tutorial papers on particular statistical methods, and papers dealing with the philosophy and problems of applying statistical methods to research, development, design and performance. Brief descriptions of problems requiring solution and short technical notes will also be accepted for publication.

For further information please contact TECHNOMETRICS Post Office Box 587 Benjamin Franklin Station Washington 4, D. C.

STATISTICAL THEORY AND METHOD ABSTRACTS

A Journal of the International Statistical Institute

The object of this abstracting service is to cover published papers concerned with statistical theory, including relevant aspects of probability and mathematical methods, and new contributions to statistical method. These abstracts provide valuable information on new developments for studying problems in many fields; for example, reliability, quality control, experiments, surveys, queueing, congestion and forecasting. Approximately 500 journals are scanned for suitable papers. Abstracts are also prepared from collections of papers such as reports of conferences, symposia and seminars: technical reports of experiment and research stations are covered.

Approximately 400 words long, these literary informative abstracts are written in English; the language of the original paper is indicated. The heading not only gives the name and address of the author together with the journal in which the paper was published, but a note is given of references, tables, etc.

The revised classification scheme consists of three parts. The pages of the journal are colour-tinted in groups to provide visual indication of twelve main sections. Each section is further sub-divided to indicate the main topic of the paper; a secondary number denotes the most important additional topic referred to by the author. A special table in each part links together these two classifications. This scheme is arranged to facilitate transfer to punch cards. When papers are concerned with new statistical tables the relevant classification for the Greenwood/Hartley Guide (1962) is indicated in a special section.

The abstracts are numbered serially, the volume number being inserted as a prefix. The journal is published four times a year and contains approximately 1,250 abstracts. Relevant indexes are published in each issue and combined in a yearly supplement.

<i>Annual Subscription</i>	£7.10s. (U. S. A. \$24.00)
<i>Single Number</i>	£2.5s. (U. S. A. \$4.00)
<i>Loose Leaf Binders for Single Abstract Sheets</i>	16s.3d including postage and packing.

AMERICAN STATISTICAL ASSOCIATION

810 18th Street, N.W.

Washington, D. C. 20006

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

OFFICERS

President:

Theodore E. Harris, Department of Mathematics, University of Southern California, Los Angeles, California 90007

President-Elect:

Herman Chernoff, Department of Statistics, Stanford University, Stanford, California 94305

Executive Secretary:

G. E. Nicholson, Jr., Department of Statistics, University of North Carolina, Chapel Hill, North Carolina 27515

Program Secretary:

Joan Raup Rosenblatt, National Bureau of Standards, Washington, D.C. 20234

Treasurer:

George J. Resnikoff, Department of Statistics, California State College, Hayward, California 94542

Editor:

D. L. Burkholder, Department of Mathematics, University of Illinois, Urbana, Illinois 61803

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

Membership dues including a subscription to the ANNALS of MATHEMATICAL STATISTICS are \$20.00 per year for residents of the United States or Canada and \$12.00 per year for residents of other countries. Special student rates of \$10.00 per year are available to students residing in the U.S. and Canada. Inquiries regarding membership in the Institute should be sent to the Treasurer of the Institute.

Membership in the Institute of Mathematical Statistics is not required of authors of papers in the *Annals of Mathematical Statistics*, and the fact of membership or non-membership is given no weight in the consideration of submitted manuscripts.

Contents (Continued)

Quasi-linearly invariant prediction.....	J. TIAGO DE OLIVEIRA 1684
Sequential estimation of the mean of a log-normal distribution having a prescribed proportional closeness.....	S. ZACKS 1688
On randomized rank score procedure of Bell and Doksum.....	KUMAR JOGDEO 1697
Likelihood ratio computations of operating computations WILLIAM D. LAWING AND H. T. DAVID	1704
Estimation of the parameters of the exponential distribution based on optimum order statistics in censored samples.....	A. K. MD. EHSANES SALEH 1717
On confidence bounds associated with multivariate analysis of variance and non-independence between two sets of variates.....	GOVIND S. MUDHOLKAR 1736
On analysis of variance for the K-sample problem.....	DANA QUADE 1747
On a distribution-free method of estimating asymptotic efficiency of a class of non-parametric tests.....	PRANAB KUMAR SEN 1759
A bivariate sign test for location.....	SHOUTIR KISHORE CHATTERJEE 1771
A note on construction of partially balanced incomplete block designs with parameters $v = 28, n_1 = 12, n_2 = 15$ and $p^2_{11} = 4$	ESTHER SEIDEN 1783
Characterization of geometric and exponential distributions... ..	GORDON B. CRAWFORD 1790
Notes	
The probability that a random game is unfair.....	THOMAS M. COVER 1796
Convergence properties of convergence with probability one.....	J. L. DENNY 1800
On moments of cumulative sums.....	RAGNAR ERICSON 1803
Monotone convergence of moments in age dependent branching processes HOWARD J. WEINER	1806
On a theorem of Karlin regarding admissibility of linear estimates in exponential populations.....	RICHARD MORTON AND M. RAGHAVACHARI 1809
On the Hodges and Lehmann shift estimator in the two sample problem TERRENCE FINE	1814
Estimating the mean of a multivariate normal population with general quadratic loss function.....	P. K. BHATTACHARYA 1819
A multivariate central limit theorem for random linear vector forms..	F. EICKER 1825
A characteristic property of the multivariate normal distribution..	V. SESHADRI 1829
Comparison of combined estimators in balanced incomplete blocks..	V. SESHADRI 1832
On non-randomized fractional weighing designs.....	K. S. BANERJEE 1836
On identity relationships for 2^{n-r} designs having words of equal lengths PETER W. M. JOHN	1842
Note on a theorem of Kingman and a theorem of Chung....	D. VERE-JONES 1844
Correction Note.....	1847
Book Reviews	
D. R. COX and H. D. MILLER: <i>The Theory of Stochastic Processes</i>	N. U. PRABHU 1848
D. R. COX and P. A. W. LEWIS: <i>The Statistical Analysis of Series of Events</i> E. J. HANNAN	1852
G. DE LEVE: <i>Generalized Markovian Decision Processes</i>	CYRUS DERMAN 1854
