

# THE ANNALS of MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938  
EDITED BY S. S. WILKS, 1938-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE  
OF MATHEMATICAL STATISTICS

## Contents

	PAGE
On the admissibility of invariant estimators of one or more location parameters LAWRENCE DAVID BROWN	1087
Some concepts of dependence.....E. L. LEHMANN	1137
Stopping time of a rank-order sequential probability ratio test on Lehmann alternatives.....I. RICHARD SAVAGE AND J. SETHURAMAN	1154
Most stringent somewhere most powerful tests against alternatives restricted by a number of linear inequalities.....W. SCHAAFMA AND L. J. SMID	1161
On the asymptotic efficiency of a sequential procedure for estimating the mean NORMAN STARR	1173
Bayes and minimax procedures for estimating the arithmetic mean of a population with two-stage sampling.....OM P. AGGARWAL	1186
Test procedures for possible changes in parameters of statistical distributions occurring at unknown time points.....Z. KANDER AND S. ZACKS	1196
A limit theorem for multidimensional Galton-Watson processes H. KESTEN AND B. P. STIGUM	1211
Some limit theorems for non-homogeneous Markov chains..MILLU ROSENBLATT-ROTH	1224
Spectral estimates using nonlinear functions.....EUGENE R. RODEMICH	1237
Asymptotic normality of bispectral estimates.....JOHN W. VAN NESS	1257
Perfect probability measures and regular conditional probabilities ROBERT H. RODINE	1273
A representation for conditional expectations given $\sigma$ -lattices.....TIM ROBERTSON	1279
On finding optimal policies in discrete dynamic programming with no discounting ARTHUR F. VEINOTT, JR.	1284
Statistical properties of the number of positive sums.....MICHAEL WOODROOFE	1295
A statistical test involving a random number of random variables J. L. ALLEN AND J. A. BEEKMAN	1305
On the moments of the trace of a matrix and approximations to its non-central distribution.....C. G. KHATRI AND K. C. S. PILLAI	1312

(Continued on back cover)

Vol. 37, No. 5—October 1966

# THE ANNALS OF MATHEMATICAL STATISTICS

**Subscription Rates.** Current issues are \$30 per volume (six issues of one calendar year) in the U. S. and Canada, \$22.50 per volume elsewhere. Single issues are \$5.25. Back numbers for all issues up to and including 1956 (Vol. XXVII) are \$15 per volume, \$4.00 per issue; issues from 1957 through 1964 are \$20.00 per volume, \$5.25 per issue; from 1965 onward, \$30 per volume, \$5.25 per issue. Complete sets (Volumes I-XXVII) are \$250. If additional volumes are ordered at the same time the set is ordered, the price is \$15 for each additional volume. An index to Volumes I-XXXI is available for \$10.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning **subscriptions, back numbers, payment of dues, membership, changes of address**, etc., should be addressed to Professor George J. Resnikoff, Treasurer, Department of Statistics, California State College, Hayward, California 94542.

**Papers** to be submitted for publication should be sent to the Editor, D. L. Burkholder, Department of Mathematics, University of Illinois, Urbana, Illinois 61803. **Abstracts and corrected galley proofs** should be sent to the Managing Editor, P. L. Meyer, Department of Mathematics, Washington State University, Pullman, Washington 99163.

**Preparation of manuscripts.** Each manuscript should be typewritten, double spaced with wide margins at sides, top, and bottom, and the original should be submitted with one additional copy, on paper that will take corrections. Dittoed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or bibliography at the end of the paper; formulae in footnotes should be avoided. References should follow the style of 33 313-314.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter l, numeral 1 used as superscript and prime ('), alpha and a, kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g.,  $\log x$ ) and underlined letters (e.g.,  $\underline{x}$ ) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol exp. In writing square roots the fractional exponent is preferable to the radical sign. Fractions are preferably written with the

solidus; thus  $(a + b)/(c + d)$  rather than  $\frac{a + b}{c + d}$ , and  $ab/cd$  rather than  $\frac{ab}{cd}$ .

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

---

Mail to the *Annals of Mathematical Statistics* should be addressed to either the Editor, Managing Editor or the Treasurer, as described above. It should *not* be addressed to Waverly Press.

---

COMPOSED AND PRINTED AT THE  
WAVERLY PRESS, INC., BALTIMORE, MARYLAND 21202 U.S.A.

Second-class postage paid at Baltimore, Maryland 21202
