STATISTICAL THEORY AND METHOD ABSTRACTS

A Journal of the International Statistical Institute

The object of this abstracting service is to cover published papers concerned with statistical theory, including relevant aspects of probability and mathematical methods, and new contributions to statistical method. These abstracts provide valuable information on new developments for studying problems in many fields; for example, reliability, quality control, experiments, surveys, queueing, congestion and forecasting. Approximately 500 journals are scanned for suitable papers. Abstracts are also prepared from collections of papers such as reports of conferences, symposia and seminars: technical reports of experiment and research stations are covered.

Approximately 400 words long, these literary informative abstracts are written in English; the language of the original paper is indicated. The heading not only gives the name and address of the author together with the journal in which the paper was published, but a note is given of references, tables, etc.

The revised classification scheme consists of three parts. The pages of the journal are colour-tinted in groups to provide visual indication of twelve main sections. Each section is further sub-divided to indicate the main topic of the paper; a secondary number denotes the most important additional topic referred to by the author. A special table in each part links together these two classifications. This scheme is arranged to facilitate transfer to punch cards. When papers are concerned with new statistical tables the relevant classification for the Greenwood/Hartley Guide (1962) is indicated in a special section.

The abstracts are numbered serially, the volume number being inserted as a prefix. The journal is published four times a year and contains approximately 1,250 abstracts. Relevant indexes are published in each issue and combined in a yearly supplement.

Annual Subscription	£7.10s. (U. S. A. $24.00)
Single Number	£2.5s. (U. S. A. $4.00)
Loose Leaf Binders for Single Abstract Sheets	16s.3d including postage and packing.

JOURNAL OF THE AMERICAN STATISTICAL ASSOCIATION

Volume 61 June 1966 Number 314

A Life Table That Agrees with the Data ..... *Nathan Keyfitz*
A Favorable Side Bet in Nevada Baccarat ..... *William E. Walden and Edward O. Thorp*
Best k of $2k - 1$ Comparisons ..... *Herbert Maisel*
The Relative Sensitivity to Specification Error of Different k-Class Estimators ..... *Franklin M. Fisher*
A Large Sample Sequential Test, Using Concomitant Information for Discrimination between Two Composite Hypotheses ..... *Philip Cox and Thomas D. Roseberry*
A Simple Mathematical Relationship Among k-Class Estimators ..... *Asatoshi Maeshiro*
Computer Editing of Survey Data—Five Years of Experience in BLS Manpower Surveys ..... *Walter J. Stuart*
An Exact Formula for the Probability that Two Sample Drawn with Unequal Probabilities and without Replacement ..... *W. S. Connor*
Some Remarks on a Simple Procedure of Sampling without Replacement ..... *Des Raj*
A Note on the Estimation of Amplitude Spectra for Stochastic Processes with Quasi-Linear Residuals *L. H. Koopmans*
Assessing the Accuracy of Multivariate Observations ..... *Joseph Fleiss*
A Theorem on Least Squares and Vector Correlation in Multivariate Linear Regression ..... *Gregory C. Chow*
Sensitivity Comparisons Among Tests of the General Linear Hypothesis ..... *Martin Schatzoff*
A Computer Method for Calculating Kendall's Tau with Ungrouped Data ..... *William Knight*
Sampling Distribution of the Measure of Association ..... *Irene Rosenthal*
A Confidence Interval Comparison of Two Test Procedures Proposed for the Behrens-Fisher Problem *S. James Press*
Unbiased Estimation of the Common Mean of Two Normal Distributions Based on Small Samples of Equal Size ..... *S. Zacks*
Conditional-Normal Regression Models ..... *Robert F. Tate*
A Note on Taking a Covariable into Account ..... *Hans K. Ury*
Use of a Regression Technique to Produce Area Breakdowns of the Monthly National Estimates of Retail Trade *Ralph W. Woodruff*
Producer and Consumer Risks for Asymmetrical Test and Specification Limits ..... *H. R. Singh*
Exact Moments and Product Moments of the Order Statistics from the Truncated Logistic Distribution *Michael E. Tarter*

Book Reviews
Summaries of Papers Presented at 125th Annual Meeting
Index for 1956–65

TECHNOMETRICS

A Journal of Statistics for the Physical, Chemical and Engineering Sciences

CONTENTS

TECHNOMETRICS, Vol. 8, No. 3, AUGUST 1966

Evolutionary Operation: A Review ..... *William G. Hunter and J. R. Kittrell*
A Communications Satellite Replenishment Policy ..... *George H. Weiss and Menachem Dishon*
A Comparison of Some Control Chart Procedures ..... *S. W. Roberts*
Estimation of Parameters for a Mixture of Normal Distributions ..... *Victor Hasselblad*
Discussion of "Estimation of Parameters for a Mixture of Normal Distributions" by Victor Hasselblad ..... *A. Clifford Cohen*
Extreme Vertices Design of Mixture Experiments ..... *R. A. McLean and V. L. Anderson*
Discussion of "Extreme Vertices Design of Mixture Experiments" by R. A. McLean and V. L. Anderson ..... *J. W. Gorman*
Sampling Distributions of Variance Components I. Empirical Studies of Balanced Nested Designs ..... *Fred C. Leone and Lloyd S. Nelson*
Augmenting 2^{n-1} Designs ..... *Peter W. M. John*
Cumulative Sum Control Charts and the Weibull Distribution ..... *N. L. Johnson*
A Power Comparison of Two Tests of Non-random Clustering ..... *Joseph I. Naus*
Optimization of Quality Control in the Chemical Laboratory ..... *Bartholomew P. Hsi*
NOTE:
Difficulties Involved in the Estimation of a Population Mean Using Transformed Sample Data ..... *R. L. Patterson*
QUERIES:
Life Testing and Early Failure ..... *Answered by A. Clifford Cohen*
BOOK REVIEWS
LETTERS TO THE EDITOR
NOTICES, ERRATA

The purpose of TECHNOMETRICS is to contribute to the development and use of statistical methods in the physical, chemical and engineering sciences. This objective places a high premium on succinct communication among the physical scientist, engineer, statistician and mathematician. The journal will accept for publication papers describing new statistical techniques expected to be useful in these sciences, papers illustrating the application of known statistical methods to new or novel environments, expository or tutorial papers on particular statistical methods, and papers dealing with the philosophy and problems of applying statistical methods to research, development, design and performance. Brief descriptions of problems requiring solution and short technical notes will also be accepted for publication.

For further information please contact TECHNOMETRICS Post Office Box 587 Benjamin Franklin Station Washington 4, D. C.

SANKHYĀ

The Indian Journal of Statistics

CONTENTS OF SERIES A, VOL. 28, PART 1, 1966

Estimation of correlation coefficient when no simultaneous observations on the variables are available ..... R. P. Bhargava
Latest investigations on Behrens-Fisher problem ..... Yu. V. Linnik
On stable transformations ..... Ashok Maitra
An estimation in PPS sampling for multiple characteristics ..... P. K. Pathak
Non-negativity of a variance estimator ..... P. K. Pathak and N. D. Shukla
Alternative estimators in PPS sampling for multiple characteristics ..... J. N. K. Rao
On the relative efficiency of some estimators in PPS sampling for multiple characteristics ..... J. N. K. Rao
Error areas under the operating characteristic curves ..... M. T. Subrahmanya
On Horvitz-Thomson and Des Raj estimators ..... K. Vijayan
A note on inverse sampling with equal probabilities ..... M. S. Chikkagoudar
An elementary treatment of the amount of information in an experiment ..... Herman Rubin
A note on generalized inflated binomial distribution ..... M. P. Singh
Corrigenda .....

Orders for the Journal for distribution outside India are to be sent to:

Pergamon Press Ltd., Headington Hill Hall, Oxford, England
or
Pergamon Press Inc., 122 East 55th Street, New York 22, USA

Orders for the Journal for distribution within India are to be sent to:

Statistical Publishing Society,

Calcutta-35, India

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

OFFICERS

President:

Herbert E. Robbins, Department of Mathematical Statistics, Columbia University, New York, N.Y. 10027

President-Elect:

Theodore E. Harris, Department of Mathematics, University of Southern California, Los Angeles, California 90007

Executive Secretary:

G. E. Nicholson, Jr., Department of Statistics, University of North Carolina, Chapel Hill, North Carolina 27515

Program Secretary:

Joan Raup Rosenblatt, National Bureau of Standards, Washington, D.C. 20234

Treasurer:

George J. Resnikoff, Department of Statistics, California State College, Hayward, California 94542

Editor:

D. L. Burkholder, Department of Mathematics, University of Illinois, Urbana, Illinois 61803

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

Membership dues including a subscription to the ANNALS of MATHEMATICAL STATISTICS are $20.00 per year for residents of the United States or Canada and $12.00 per year for residents of other countries. Special student rates of $10.00 per year are available to students residing in the U.S. and Canada. Inquiries regarding membership in the Institute should be sent to the Treasurer of the Institute.

Membership in the Institute of Mathematical Statistics is not required of authors of papers in the *Annals of Mathematical Statistics*, and the fact of membership or non-membership is given no weight in the consideration of submitted manuscripts.

Contents (Continued)

On the bivariate moments of order statistics from a logistic distribution..B. K. SHAH 1002
Characterization of normal and generalized truncated normal distributions using order statistics.....ZAKKULA GOVINDARAJULU 1011
On the block structures of certain partially balanced incomplete block designs S. M. SHAH 1016
Singularity in Hotelling's weighing designs and a generalized inverse K. S. BANERJEE 1021
On estimation and construction in fractional replication K. S. BANERJEE AND W. T. FEDERER 1033

Notes
The growth of a recurrent random walk.....CHARLES STONE 1040
A note on undiscounted dynamic programming.....ASHOK MAITRA 1042
A note on a biased estimator in sampling with probability proportional to size with replacement.....M. T. SUBRAHMANYA 1045
Duals of partially balanced incomplete block designs and some nonexistence theorems.....DAMARAJU RAGHAVARAO 1048
Correction Notes..... 1053

Book Reviews
DENNIS V. LINDLEY: *Introduction to Probability and Statistics from a Bayesian Viewpoint*.....HERMAN CHERNOFF 1056
K. ITO AND H. P. MCKEAN, JR.: *Diffusion Processes and their Sample Paths* F. SPITZER 1060
J. KUBILIUS: *Probabilistic Methods in the Theory of Numbers* W. J. LE VEQUE 1063
Abstracts of Papers..... 1066
News and Notices..... 1079
Report of the Brookhaven meeting..... 1081
Publications Received..... 1085

MEETINGS OF THE INSTITUTE

TENTATIVE SCHEDULE

ANNUAL MEETING - New Brunswick, New Jersey - August 30–September 2, 1966
EUROPEAN REGIONAL - London, England - September 5–10, 1966.

Abstracts should be submitted in duplicate to the Managing Editor, P. L. Meyer, Department of Mathematics, Washington State University, Pullman, Washington, on abstract blanks which may be obtained from him or from any Secretary or Associate Secretary. Abstracts must be received at least 50 days before the first day of the meeting at which they are to be presented, indicating whether presented by title or in person. (Only one contributed paper may be given in person at any one meeting.) They may be printed prior to the publication of the report of the meeting. Ordinarily, each issue will contain those abstracts received at least 75 days before it appears. Abstracts should be limited to 200 words or the equivalent and should avoid displayed expressions and complicated formulae. They can be accepted from non-members of the IMS only if introduced by members. Abstracts must follow the stylistic requests on the abstract blank, or they may be returned.
