THE ANNALS of MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938

EDITED BY S. S. WILKS, 1938-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE OF MATHEMATICAL STATISTICS

Contents

	PAGE
Admissible Bayes Character of T^2-, R^2-, and Other Fully Invariant Tests for Classical Multivariate Normal Problems ... J. KIEFER AND R. SCHWARTZ	747
Gaussian Processes on Several Parameters ... R. M. DUDLEY	771
Moments of Randomly Stopped Sums ... Y. S. CHOW, HERBERT ROBBINS AND HENRY TEICHER	789
A Sharper Form of the Borel-Cantelli Lemma and the Strong Law ... LESTER E. DUBINS AND DAVID A. FREEDMAN	800
On the Convergence of Moments in the Central Limit Theorem ... BENGT VON BAHR	808
On the Lifting Property (V) ... A. IONESCU TULCEA	819
Invariant Conditional Distributions ... J. A. BATHER	829
On Some Robust Estimates of Location ... PETER J. BICKEL	847
Bounds on the Maximum Sample Size of a Bayes Sequential Procedure ... S. N. RAY	859
Sequential Compound Estimators ... ESTER SAMUEL	879
On Information in Statistics ... D. A. S. FRASER	890
Order Statistics and Statistics of Structure (d) ... HERBERT DAVID	897
Exact Moments and Percentage Points of the Order Statistics and the Distribution of the Range from the Logistic Distribution ... SHANTI S. GUPTA AND BHUPENDRA K. SHAH	907
Quantiles and Medians ... M. ROSENBLATT-ROTH	921
Some Basic Properties of the Incomplete Gamma Function Ratio ... S. H. KHAMIS	926
Properties of the Extended Hypergeometric Distribution ... W. L. HARKNESS	938
Renewal Theory in the Plane ... PETER J. BICKEL AND JOSEPH A. YAHAV	946
Bernard Friedman's Urn ... DAVID A. FREEDMAN	956
Spectral Analysis With Randomly Missed Observations: The Binomial Case ... PERRY A. SCHEINOK	971
Asymptotic Inference in Markov Processes ... G. G. ROUSSAS	978
Extreme Values in Uniformly Mixing Stationary Stochastic Processes ... R. M. LOYNES	993
On the Asymptotic Power of the One-Sample Kolmogorov-Smirnov Tests ... DANA QUADE	1000
Several k-Sample Kolmogorov-Smirnov Tests ... W. J. CONOVER	1019
Estimation of Probability Density ... V. K. MURTHY	1027
Estimation of Jumps, Reliability and Hazard Rate ... V. K. MURTHY	1032
Notes	
A Limit Theorem for Sums of Minima of Stochastic Variables ... ULF GRENANDER	1041
The Expected Number of Zeros of a Stationary Gaussian Process ... N. DONALD YLVISAKER	1043
Density Estimation in a Topological Group ... K. J. CRASWELL	1047
A Nonparametric Estimate of a Multivariate Density Function ... D. O. LOFTSGAARDEN AND C. P. QUESENBERRY	1049
A Note on Midrange ... E. J. GUMBEL, P. G. CARLSON AND C. K. MUSTAFI	1052
Some Bounds for Expected Values of Order Statistics ... MIR M. ALI AND LAI K. CHAN	1055

(Continued on back cover)

Vol. 36, No. 3—June 1965

Institute of Mathematical Statistics is collaborating with JSTOR to digitize, preserve, and extend access to *The Annals of Mathematical Statistics.* www.jstor.org

THE ANNALS OF MATHEMATICAL STATISTICS

Subscription Rates. Current issues are $20 per volume (six issues of one calendar year) in the U.S. and Canada, $15 per volume elsewhere. Single issues are $5.25. Back numbers for all issues up to and including 1956 (Vol. XXVII) are $12 per volume, $3.50 per issue; issues from 1957 on are $20 per volume, $5.25 per issue; for complete sets, $200 for the first 25 volumes, $10 per additional volume purchased at the same time as Volumes I through XXV.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning **subscriptions, back numbers, payment of dues, membership, changes of address**, etc., should be addressed to Professor George J. Resnikoff, Treasurer, Department of Statistics, California State College, Hayward, California 94542.

Papers to be submitted for publication should be sent to the Editor, D. L. Burkholder, Department of Mathematics, University of Illinois, Urbana, Illinois 61803. **Abstracts** and **corrected galley proofs** should be sent to the Managing Editor, P. L. Meyer, Department of Mathematics, Washington State University, Pullman, Washington 99163.

Preparation of manuscripts. Each manuscript should be typewritten, double spaced with wide margins at sides, top, and bottom, and the original should be submitted with one additional copy, on paper that will take corrections. Dittoed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or bibliography at the end of the paper; formulae in footnotes should be avoided. References should follow the new style.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter l, numeral 1 used as superscript and prime (′), alpha and a, kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g., $\overline{\log x}$) and underlined letters (e.g., $\underline{x}$) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol exp. In writing square roots the fractional exponent is preferable to the radical sign. Fractions *in the body of the text* (as opposed to displayed expressions) and fractions occurring in the numerators or denominators of fractions are preferably written with the solidus; thus $(a + b)/(c + d)$ rather than $\frac{a + b}{c + d}$, and ab/cd rather than $\frac{ab}{cd}$.

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

Mail to the *Annals of Mathematical Statistics* should be addressed to either the Editor, Managing Editor or the Treasurer, as described above. It should *not* be addressed to Waverly Press.

COMPOSED AND PRINTED AT THE

WAVERLY PRESS, INC., BALTIMORE, MARYLAND, U. S. A.

Second-class postage paid at Baltimore, Maryland
