

THE ANNALS of MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938

EDITED BY S. S. WILKS, 1938-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE
OF MATHEMATICAL STATISTICS

Contents

	PAGE
Properties of Probability Distributions With Monotone Hazard Rate RICHARD E. BARLOW, ALBERT W. MARSHALL AND FRANK PROSCHAN	375
A Renewal Theorem for Random Variables Which Are Dependent or Non-Identically Distributed..... Y. S. CHOW AND HERBERT ROBBINS	390
Average Renewal Loss Rates..... M. V. JOHNS, JR. AND R. G. MILLER, JR.	396
Combinatorial Results in Multi-Dimensional Fluctuation Theory CHARLES HOBBY AND RONALD PYKE	402
One Dimensional Random Walk With a Partially Reflecting Barrier..... G. LEHNER	405
On a Class of Simple Random Walks J. R. BLUM, D. L. HANSON AND S. V. PARTER	413
A Markov Process on Binary Numbers..... SIMEON M. BERMAN	416
Multivariate Wide-Sense Markov Processes and Prediction Theory FREDERICK J. BEUTLER	424
Central Limit Theorems for Families of Sequences of Random Variables F. EICKER	439
Asymptotic Normality and Consistency of the Least Squares Estimators for Families of Linear Regressions..... F. EICKER	447
The Limit of a Ratio of Convolutions..... P. E. NEY	457
Sequential Model Building for Prediction in Regression Analysis, I HAROLD J. LARSON AND T. A. BANCROFT	462
On the Estimation of the Probability Density, I G. S. WATSON AND M. R. LEADBETTER	480
Necessary and Sufficient Conditions for a Statistical Problem to Be Invariant Under a Lie Group..... DAVID R. BRILLINGER	492
Pairwise Comparison and Ranking in Tournaments HANS BÜHLMANN AND PETER J. HUBER	501
Pairwise Comparison and Ranking: Optimum Properties of the Row Sum Procedure PETER J. HUBER	511
Sampling Variances of the Estimates of Variance Components in the Unbalanced 3-Way Nested Classification..... D. M. MAHAMUNULU	521
On the Duals of Symmetric Partially-Balanced Incomplete Block Designs A. J. HOFFMAN	528
Correlations and Canonical Forms of Bivariate Distributions..... H. O. LANCASTER	532
On the Inadmissibility of Some Standard Estimates in the Presence of Prior In- formation..... M. SKIBINSKY AND L. COTE	539
A Sequential Decision Procedure for Choosing One of k Hypotheses Concerning the Unknown Mean of a Normal Distribution..... EDWARD PAULSON	549
On Testing More Than One Hypothesis..... J. N. DARROCH AND S. D. SILVEY	555
The Posterior t Distribution..... M. STONE	568
Shorter Confidence Intervals for the Mean of a Normal Distribution With Known Variance..... JOHN W. PRATT	574

(Continued on back cover)

Vol. 34, No. 2 — June, 1963

THE ANNALS OF MATHEMATICAL STATISTICS

Subscription Rates. Current issues are \$20 per volume (four issues of one calendar year) in the U. S. and Canada, \$15 per volume elsewhere. Single issues are \$5.25. Back numbers for all issues up to and including 1956 (Vol. XXVII) are \$12 per volume, \$3.50 per issue; issues from 1957 on are \$20 per volume, \$5.25 per issue; for complete sets, \$200 for the first 25 volumes, \$10 per additional volume purchased at the same time as Volumes I through XXV.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning **subscriptions, back numbers, payment of dues, membership, changes of address, etc.**, should be addressed to Gerald Lieberman, Treasurer, Institute of Mathematical Statistics, Department of Statistics, Stanford University, Stanford, Calif.

Editorial Office, Department of Statistics, University of California, Berkeley 4, California. J. L. Hodges, Jr. Editor.

Preparation of manuscripts. Manuscripts should be submitted to the editorial office. Each manuscript should be typewritten, double spaced, with wide margins at sides, top, and bottom, and the original should be submitted with one additional copy, on paper that will take corrections. Dittoed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or bibliography at the end of the paper; formulae in footnotes should be avoided. References should follow the new style.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter l, numeral 1 used as superscript and prime ('), alpha and a, kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g., $\overline{\log x}$) and underlined letters (e.g., \underline{x}) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol exp. In writing square roots the fractional exponent is preferable to the radical sign. Fractions *in the body of the text* (as opposed to displayed expressions) and fractions occurring in the numerators or denominators of fractions are preferably written with the solidus; thus $(a + b)/(c + d)$ rather than $\frac{a + b}{c + d}$, and ab/cd rather than $\frac{ab}{cd}$.

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

Mail to the *Annals of Mathematical Statistics* should be addressed to either the Editor or the Treasurer, as described above. It should *not* be addressed to Waverly Press.

COMPOSED AND PRINTED AT THE
WAVERLY PRESS, INC., BALTIMORE, MARYLAND, U. S. A.

Second-class postage paid at Baltimore, Maryland
