THE ANNALS *of* MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938
EDITED BY S. S. WILKS, 1938-1949
THE OFFICIAL JOURNAL OF THE INSTITUTE OF MATHEMATICAL STATISTICS

Contents

		PAGE
Contributions to the "Two-Armed Bandit" Problem	DORIAN FELDMAN	847
Team Decision Problems	R. RADNER	857
Merging of Opinions With Increasing Information	DAVID BLACKWELL AND LESTER DUBINS	882
Successive Conditional Expectations of an Integrable Function	D. L. BURKHOLDER	887
Limiting Distribution of the Maximum Term in Sequences of Dependent Random Variables	SIMEON M. BERMAN	894
On a Generalization of the Finite Arcsine Law	GLEN BAXTER	909
Invariants under Mixing which Generalize de Finetti's Theorem	DAVID A. FREEDMAN	916
Poisson Processes with Random Arrival Rate	DAVID A. FREEDMAN	924
Approximations for the Entropy for Functions of Markov Chains	JOHN J. BIRCH	930
Some Theoretical Aspects of Diffusion Theory in Population Genetics	G. A. WATTERSON	939
Random Subdivisions of Space into Crystals	E. N. GILBERT	958
On the Transient Behavior of a Queueing System with Bulk Service and Finite Capacity	P. D. FINCH	973
Location and Scale Parameters in Exponential Families of Distributions	THOMAS S. FERGUSON	986
Conditions for Wishartness and Independence of Second Degree Polynomials in a Normal Vector	C. G. KHATRI	1002
Multivariate Pareto Distributions	K. V. MARDIA	1008
The Distribution of the Product of Two Central or Non-Central Chi-Square Variates	W. T. WELLS, R. L. ANDERSON, AND JOHN W. CELL	1016
The Role of Sufficiency and of Estimation in Thermodynamics	BENOIT MANDELBROT	1021
Sequential Inference Procedures of Stein's Type for a Class of Multivariate Regression Problems	SHOUTIR KISHORE CHATTERJEE	1039
On Estimation of a Probability Density Function and Mode	EMANUEL PARZEN	1065
On Linear Estimation for Regression Problems on Time Series	N. DONALD YLVISAKER	1077
Testing the Hypothesis of No Fixed Main-Effects in Scheffé's Mixed Model	J. P. IMHOF	1085

(Continued on back cover)

Vol. 33, No. 3 — September, 1962

Institute of Mathematical Statistics is collaborating with JSTOR to digitize, preserve, and extend access to *The Annals of Mathematical Statistics.* www.jstor.org

THE ANNALS OF MATHEMATICAL STATISTICS

Subscription Rates. Current issues are $15 per volume (four issues of one calendar year) in the U. S. and Canada, $12 per volume elsewhere. Single issues are $4. Back numbers for all issues up to and including 1956 (Vol. XXVII) are $12 per volume, $3.50 per issue; issues from 1957 on are $15 per volume, $4 per issue; for complete sets, $200 for the first 25 volumes, $10 per additional volume purchased at the same time as Volumes I through XXV.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning **subscriptions, back numbers, payment of dues, membership, changes of address,** etc., should be addressed to Gerald Lieberman, Treasurer, Institute of Mathematical Statistics, Department of Statistics, Stanford University, Stanford, Calif.

Editorial Office, Department of Statistics, University of California, Berkeley 4, California. J. L. Hodges, Jr. Editor.

Preparation of manuscripts. Manuscripts should be submitted to the editorial office. Each manuscript should be typewritten, double spaced, with wide margins at sides, top, and bottom, and the original should be submitted with one additional copy, on paper that will take corrections. Dittoed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or bibliography at the end of the paper; formulae in footnotes should be avoided. References should follow the new style, described in the Notice on page 1213 of this issue.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter l, numeral 1 used as superscript and prime (′), alpha and a, kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g., $\overline{\log x}$) and underlined letters (e.g., $\underline{x}$) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol exp. In writing square roots the fractional exponent is preferable to the radical sign. Fractions *in the body of the text* (as opposed to displayed expressions) and fractions occurring in the numerators or denominators of fractions are preferably written with the solidus; thus $(a + b)/(c + d)$ rather than $\frac{a+b}{c+d}$.

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

Mail to the *Annals of Mathematical Statistics* should be addressed to either the Editor or the Treasurer, as described above. It should *not* be addressed to Waverly Press.

COMPOSED AND PRINTED AT THE

WAVERLY PRESS, INC., BALTIMORE, MARYLAND, U. S. A.

Second-class postage paid at Baltimore, Maryland
