

# THE ANNALS *of* MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938

EDITED BY S. S. WILKS, 1939-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE  
OF MATHEMATICAL STATISTICS

## *Contents*

	PAGE
The Future of Data Analysis.....	JOHN W. TUKEY 1
Infinitely Divisible Distributions: Recent Results and Applications	MAREK FISZ 68
Limit Theorems for Randomly Selected Partial Sums	PATRICK BILLINGSLEY 85
A Law of Large Numbers for the Maximum in a Stationary Gaussian Sequence.....	SIMEON M. BERMAN 93
A "Renewal" Limit Theorem for General Stochastic Processes	V. E. BENEŠ 98
Mixtures on Markov Processes.....	DAVID A. FREEDMAN 114
Some Aspects of the Emigration-Immigration Process....	HAROLD RUBEN 119
A Transient Discrete Time Queue with Finite Storage..	JOHN R. KINNEY 130
A General Model for the Reliability Analysis of Systems Under Various Preventive Maintenance Policies.....	B. J. FLEHINGER 137
Approximations to the Moments of the Sample Median...	M. M. SIDDIQUI 157
Recurrence Relations Between the PDF's of Order Statistics, and some Applications.....	K. S. SRIKANTAN 169
Enumeration of Linear Graphs for Mappings of Finite Sets..	JOHN RIORDAN 178
Asymptotic Power of Certain Test Criteria (Based on First and Second Differences) for Serial Correlation Between Successive Observations	A. R. KAMAT AND Y. S. SATHE 186
Ante-Dependence Analysis of an Ordered Set of Variables..	K. R. GABRIEL 201
A Classification Problem in which Information about Alternative Distributions is Based on Samples.....	BOB E. ELLISON 213

*(Continued on back cover)*

Vol. 33, No. 1 — March, 1962

# THE ANNALS OF MATHEMATICAL STATISTICS

**Subscription Rates.** Current issues are \$15 per volume (four issues of one calendar year) in the U. S. and Canada, \$12 per volume elsewhere. Single issues are \$4. Back numbers for all issues up to and including 1956 (Vol. XXVII) are \$12 per volume, \$3.50 per issue; issues from 1957 on are \$15 per volume, \$4 per issue; for complete sets, \$200 for the first 25 volumes, \$10 per additional volume purchased at the same time as Volumes I through XXV.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning **subscriptions, back numbers, payment of dues, membership, changes of address, etc.**, should be addressed to Gerald Lieberman, Treasurer, Institute of Mathematical Statistics, Department of Statistics, Stanford University, Stanford, Calif.

**Editorial Office,** Department of Statistics, University of California, Berkeley 4, California. J. L. Hodges, Jr. Editor. (See note on next page about change of Editor).

**Preparation of manuscripts.** Manuscripts should be submitted to the editorial office. Each manuscript should be typewritten, double spaced, with wide margins at sides, top, and bottom, and the original should be submitted with one additional copy, on paper that will take corrections. Dittoed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or bibliography at the end of the paper; formulae in footnotes should be avoided. References should follow the new style, described in the Notice on page 313 of this issue.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter l, numeral 1 used as superscript and prime ('), alpha and a, kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g.,  $\log \bar{x}$ ) and underlined letters (e.g.,  $\underline{x}$ ) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol exp. In writing square roots the fractional exponent is preferable to the radical sign. Fractions *in the body of the text* (as opposed to displayed expressions) and fractions occurring in the numerators or denominators of fractions are preferably written with the solidus; thus  $(a + b)/(c + d)$  rather than  $\frac{a + b}{c + d}$ .

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

---

Mail to the *Annals of Mathematical Statistics* should be addressed to either the Editor or the Treasurer, as described above. It should *not* be addressed to Waverly Press.

---

COMPOSED AND PRINTED AT THE  
WAVERLY PRESS, INC., BALTIMORE, MARYLAND, U. S. A.

Second-class postage paid at Baltimore, Maryland
