EXECUTIVE RECRUITMENT**

INTERNATIONAL JOURNAL OF ABSTRACTS STATISTICAL THEORY AND METHOD

A Journal of the International Statistical Institute

The aim of this journal of abstracts is to give complete coverage of published papers in the field of statistical theory (including associated aspects of probability and other mathematical methods) and new published contributions to statistical method.

All contributions in the following five journals—being wholly devoted to this field—are abstracted: *Annals of Mathematical Statistics*; *Biometrika*; *Journal, Royal Statistical Society (Series B)*; *Bulletin of Mathematical Statistics*; *Annals, Institute of Statistical Mathematics*; and a further group of six journals are abstracted on a virtually complete basis as follows: *Biometrics*; *Metrika*; *Metron*; *Review, International Statistical Institute*; *Technometrics*; *Sankhyā*. There are about 250 other journals partly devoted to statistical theory and method from which the appropriate papers are abstracted.

The abstracts are about 400 words long—the recommendation of UNESCO for the “long” abstract service: they are in the English language although the original language of the paper is noted on the abstract together with the name of the abstractor. In addition the address of the author(s) are given in detail to facilitate contact in order to obtain further detail or request an off-print. The journal is published quarterly and contains approximately 1000 abstracts per year.

A scheme of classification has been developed for the abstracts that is flexible and facilitates the transfer of code numbers to punched cards. A unique aspect of this journal is that the pages are colour-tinted according to the main sections of classification. This method of colour-coding the pages provides a distinctive and powerful visual aid in the identification of abstracts in whatever manner the journal is filed for reference.

Annual Subscription £5 (U.S.A. and Canada \$16.00)

Single Number 30s. (U.S.A. and Canada \$4.50)

OLIVER AND BOYD LTD.

Tweeddale Court, 14 High Street, Edinburgh, 1

The first two volumes in the Statistical Research Monographs series sponsored by the Institute of Mathematical Statistics and by the University of Chicago

The Passage Problem for a Stationary Markov Chain

By J. H. B. Kemperman. Presents systematically a number of methods useful in studying the problems of first passage and absorption in a Markov chain; in particular, methods for obtaining exact formulae for the probabilities under consideration or their moments. Numerous illustrations show adequately how each method serves as a natural tool for handling a large number of practical problems. \$5.00

Statistical Inference for Markov Processes

By Patrick Billingsley. A general mathematical theory for the statistical problems of determining whether Markov models fit empirical data and of estimating any parameters upon which the models may depend. The applications which illustrate the mathematical results make the book useful to workers in the applied fields as well as to mathematicians, statisticians, and graduate students in statistics. \$4.00

PSAM Vol. XII

PROCEEDINGS OF THE SYMPOSIUM ON THE
STRUCTURE OF LANGUAGE AND ITS
MATHEMATICAL ASPECTS

The twenty articles in this book are texts of addresses which were delivered at the symposium held in April, 1960.

The authors contributing papers to this book are: W. V. Quine; Noam Chomsky; Hilary Putnam; H. Hiz; Nelson Goodman; Haskell B. Curry; Yuen Ren Chao; Murray Eden; Morris Halle; Robert Abernathy; Hans G. Herzberger; Anthony G. Oettinger; Victor H. Yngve; Gordon E. Peterson and Frank Harary; Joachim Lambek; H. A. Gleason, Jr.; Benoit Mandelbrot; Charles F. Hockett; Rulon Wells; Roman Jakobson.

Stone*; Statistical Programs for High Speed Computers Notices

Technometrics is published quarterly in February, May, August, and November. To members of the American Statistical Association and the American Society for Quality Control the rate is \$6.00. The annual non-member subscription rate is \$8.00. Checks should be made payable to *Technometrics* and addressed to *Technometrics*, Post Office Box 587, Benjamin Franklin Station, Washington 6, D. C.

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

OFFICERS

President:

A. H. Bowker, Department of Statistics, Stanford University, Stanford, California

President-Elect:

T. W. Anderson, Department of Mathematical Statistics, Columbia University, New York 27, New York

Secretary:

G. E. Nicholson, Jr., Department of Statistics, University of North Carolina, Chapel Hill, North Carolina

Treasurer:

Gerald Lieberman, Institute of Mathematical Statistics, Sequoia Hall, Stanford University, Stanford, California

Editor:

J. L. Hodges, Jr., Department of Statistics, University of California, Berkeley 4, California

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

Membership dues including a subscription to the ANNALS OF MATHEMATICAL STATISTICS are \$10.00 per year for residents of the United States or Canada and \$5.00 per year for residents of other countries. There are special rates for students and for some other classes of members. Inquiries regarding membership in the Institute should be sent to the Treasurer of the Institute.

Membership in the Institute of Mathematical Statistics is not required of authors of papers in the *Annals of Mathematical Statistics*, and the fact of membership or non-membership is given no weight in the consideration of submitted manuscripts.

MEETINGS OF THE INSTITUTE

TENTATIVE SCHEDULE

CENTRAL REGIONAL MEETING—Urbana, Illinois, November 24-25, 1961

EASTERN REGIONAL MEETING—New York City, December 27-30, 1961

EASTERN REGIONAL MEETING—
Chapel Hill, North Carolina, Week of April 18, 1962

EUROPEAN REGIONAL MEETING—
Dublin, Ireland, Week of September 3, 1962

ANNUAL MEETING—Minneapolis, Minnesota, September 7-10, 1962

Abstracts should be submitted in duplicate to the Editor, on abstract blanks, which can be found in the back of every *Annals*, beginning with the March 1961 issue or can be obtained from the IMS Secretary. Abstracts must be received at least 50 days before the first day of the meeting at which they are to be presented, indicating whether presented by title or in person. (Only one contributed paper may be given in person at any one meeting.) They may be printed prior to the publication of the report of the meeting. Those received by April 30 will appear in the September *Annals*, by July 31 in December, etc. Abstracts should be limited to 200 words or the equivalent, and should avoid displayed expressions and complicated formulae. They can be accepted from non-members of the IMS only if transmitted by members. Abstracts must follow the stylistic requests on the abstract blank, or they may be returned.
