

THE ANNALS of MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938

EDITED BY S. S. WILKS, 1938-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE
OF MATHEMATICAL STATISTICS

Contents

	PAGE
The Statistical Work of David van Dantzig (1900-1959) . . . J. HEMELRIJK	269
Stochastic Comparison of Tests R. R. BAHADUR	276
Slippage Problems SAMUEL KARLIN AND DONALD TRUAX	296
Effect on the Minimal Complete Class of Tests of Changes in the Testing Problem D. L. BURKHOLDER	325
Some Properties of a Class of Bayes Two-Stage Tests . . . MORRIS SKIBINSKY	332
Lower Bounds for the Expected Sample Size and the Average Risk of a Sequential Procedure WASSILY Hoeffding	352
Sampling Inspection as a Minimum Loss Problem B. L. VAN DER WAERDEN	369
Simplified Estimation From Censored Normal Samples . . . W. J. DIXON	385
Estimating the Mean of a Finite Population J. ROY AND I. M. CHAKRAVARTI	392
A Measure of Predictive Precision in Regression Analysis . . H. LINHART	399
A Generalized Pitman Efficiency for Non-parametric Tests . . H. WITTING	405
Contributions to the Theory of Rank Order Statistics: the Two-sample Cen- sored Case V. R. RAO, I. R. SAVAGE, AND M. SOBEL	415
On a result by M. Rosenblatt concerning the Von Mises-Smirnov Test M. FISZ	427
A Sequential Design for the Two Armed Bandit WALTER VOGEL	430
An Asymptotic Minimax Theorem for the Two Armed Bandit Problem WALTER VOGEL	444
Elementary Proof of the AEP of Information Theory . . . A. J. THOMASIAN	452
Products of Random Matrices H. FURSTENBERG AND H. KESTEN	457
An Exponential Bound for Functions of a Markov Chain MELVIN L. KATZ AND A. J. THOMASIAN	470
Application of Storage Theory to Queues With Poisson Arrivals N. U. PRABHU	475
A One-sided Analog of Kolmogorov's Inequality . . . ALBERT W. MARSHALL	483

(Continued on back cover)

Vol. 31, No. 2 — June, 1960

THE ANNALS OF MATHEMATICAL STATISTICS

Subscription Rates. Current issues are \$12 per volume (four issues of one calendar year) in the U. S. and Canada, \$10 per volume elsewhere. Single issues are \$3.50. Back numbers are \$12 per volume, \$3.50 per issue, \$200 for the first 25 volumes, \$10 per additional volume purchased at the same time as Volume I through XXV.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning **subscriptions, back numbers, payment of dues, etc.**, should be addressed to A. H. Bowker, Treasurer, Department of Statistics, Stanford University, Stanford, Calif.

Communications concerning **membership, changes of address, etc.**, should be addressed to George E. Nicholson, Jr., Secretary, Department of Statistics, University of North Carolina, Chapel Hill, N. C. Changes of address which are to become effective for a given issue of the *Annals* should be reported to the Secretary on or before the 10th of the month preceding the month of issue.

Editorial Office, Department of Statistics, Eckhart Hall, University of Chicago, Chicago 37, Illinois. William Kruskal, Editor.

Preparation of manuscripts. Manuscripts should be submitted to the editorial office. Each manuscript should be typewritten, double spaced, with wide margins at sides, top, and bottom, and the original should be submitted with one additional copy, on paper that will take corrections. Dittoed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or a bibliography at the end of the paper; formulae in footnotes should be avoided. References should follow current *Annals* style, and should be numbered alphabetically according to authors' names.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter l, numeral 1 used as superscript and prime ('), alpha and a, kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g., $\overline{\log x}$) and underlined letters (e.g., \underline{x}) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol exp. In writing square roots the fractional exponent is preferable to the radical sign. Fractions *in the body of the text* (as opposed to displayed expressions) and fractions occurring in the numerators or denominators of fractions are preferably written with the solidus; thus $(a + b)/(c + d)$ rather than $\frac{a + b}{c + d}$.

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

Mail to the *Annals of Mathematical Statistics* should be addressed to either the Editor or the Treasurer, as described above. It should *not* be addressed to Waverly Press.

COMPOSED AND PRINTED AT THE
WAVERLY PRESS, INC., BALTIMORE, MARYLAND, U. S. A.

Second-class postage paid at Baltimore, Maryland
