

THE ANNALS of MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938

EDITED BY S. S. WILKS, 1938-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE
OF MATHEMATICAL STATISTICS

Contents

	PAGE
Some Validity Criteria for Statistical Inferences	ROBERT J. BUEHLER 845
Conditional Confidence Level Properties	DAVID L. WALLACE 864
An Example of Wide Discrepancy Between Fiducial and Confidence Intervals	
	CHARLES STEIN 877
Optimum Invariant Tests	E. L. LEHMANN 881
The Weighted Compounding of Two Independent Significance Tests	
	M. ZELEN AND L. S. JOEL 885
Bayes Acceptance Sampling Procedures for Large Lots	
	D. GUTHRIE, JR. AND M. V. JOHNS, JR. 896
Optimum Tolerance Regions and Power When Sampling from Some Non-Normal Uni- verses	IRWIN GUTTMAN 926
Properties of Model II—Type Analysis of Variance Tests, A: Optimum Nature of the F-Test for Model II in the Balanced Case	LEON H. HERBACH 939
Some Remarks on Herbach's Paper, "Optimum Nature of the F-Test for Model II in the Balanced Case"	WERNER GAUTSCHI 960
The Most-Economical Character of Some Bechhofer and Sobel Decision Rules	
	WM. JACKSON HALL 964
The Admissibility of Pitman's Estimator of a Single Location Parameter	
	CHARLES STEIN 970
The Use of Sample Quasi-Ranges in Estimating Population Standard Deviation	
	H. LEON HARTER 980
The Joint Cumulants of True Values and Errors of Measurement	FREDERIC M. LORD 1000
Some Tests of Permutation Symmetry	R. WORMLEIGHTON 1005
Contributions to the Theory of Rank Order Statistics—The One-Sample Case	
	I. RICHARD SAVAGE 1018
The Distribution of a Generalized D_n^* Statistic	MEYER DWASS 1024
Null Distribution of the Hodges Bivariate Sign Test	JEROME KLOTZ 1029
Exact Nonparametric Tests for Randomized Blocks	JOHN E. WALSH 1034
A Generalization of Partially Balanced Incomplete Block Designs	B. V. SHAH 1041
The Non-Existence of Certain PBIB Designs	MANOHAR NARHAR VARTAK 1051
A Necessary Condition for Existence of Regular and Symmetrical Experimental De- signs of Triangular Type, with Partially Balanced Incomplete Blocks	
	JUNJIRO OGAWA 1063
Optimal Spacing in Regression Analysis	H. A. DAVID AND BEVERLY E. ARENS 1072
Third Order Rotatable Designs for Exploring Response Surfaces	
	D. A. GARDINER, A. H. E. GRANDAGE, AND R. J. HADER 1082
Second Order Rotatable Designs in Three Dimensions	
	R. C. BOSE AND NORMAN R. DRAPER 1097

(Continued on outside back cover)

Vol. 30, No. 4 — December, 1959

THE ANNALS OF MATHEMATICAL STATISTICS

Subscription Rates. Current issues are \$12 per volume (four issues of one calendar year) in the U. S. and Canada, \$10 per volume elsewhere. Single issues are \$3.50. Back numbers are \$12 per volume, \$3.50 per issue, \$200 for the first 25 volumes, \$10 per additional volume purchased at the same time as Volume I through XXV.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning **subscriptions, back numbers, payment of dues, etc.**, should be addressed to A. H. Bowker, Treasurer, Department of Statistics, Stanford University, Stanford, Calif.

Communications concerning **membership, changes of address, etc.**, should be addressed to George E. Nicholson, Jr., Secretary, Department of Statistics, University of North Carolina, Chapel Hill, N. C. Changes of address which are to become effective for a given issue of the *Annals* should be reported to the Secretary on or before the 10th of the month preceding the month of issue.

Editorial Office. Department of Statistics, Eckhart Hall, University of Chicago, Chicago 37, Illinois. William Kruskal, Editor.

Preparation of manuscripts. Manuscripts should be submitted to the editorial office. Each manuscript should be typewritten, double spaced, with wide margins at sides, top, and bottom, and the original should be submitted with one additional copy, on paper that will take corrections. Dittoed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or a bibliography at the end of the paper; formulae in footnotes should be avoided. References should follow current *Annals* style, and should be numbered alphabetically according to authors' names.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter l, numeral 1 used as superscript and prime ('), alpha and a, kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g., $\log x$) and underlined letters (e.g., x) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol exp. In writing square roots the fractional exponent is preferable to the radical sign. Fractions *in the body of the text* (as opposed to displayed expressions) and fractions occurring in the numerators or denominators of fractions are preferably written with the solidus; thus $(a + b)/(c + d)$ rather than $\frac{a + b}{c + d}$.

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

Mail to the *Annals of Mathematical Statistics* should be addressed to either the Editor or the Treasurer, as described above. It should *not* be addressed to Waverly Press.

COMPOSED AND PRINTED AT THE
WAVERLY PRESS, INC., BALTIMORE, MARYLAND, U. S. A.

Second-class postage paid at Baltimore, Maryland
