

THE ANNALS *of* MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938

EDITED BY S. S. WILKS, 1938-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE
OF MATHEMATICAL STATISTICS

Contents

| | PAGE |
|--|---|
| Invariance Theory and a Modified Minimax Principle..... | OSCAR WESLER 1 |
| On Linear Associative Algebras Corresponding to Association Schemes of Partially Balanced Designs..... | R. C. BOSE AND DALE M. MESNER 21 |
| On a Characterization of the Triangular Association Scheme..... | S. S. SHRIKHANDE 39 |
| On a Generalisation of the Kronecker Product Designs..... | B. V. SHAH 48 |
| Application of a Measure of Information to the Design and Comparison of Regression Experiments..... | M. STONE 55 |
| Note on Estimating Information..... | COLIN R. BLYTH 71 |
| Unbiased Sequential Estimation for Binomial Populations..... | MORRIS H. DEGROOT 80 |
| A Single-Sample Multiple-Decision Procedure for Selecting the Multinomial Event Which Has the Highest Probability | ROBERT E. BECHHOFER, SALAH ELMAGHRABY, AND NORMAN MORSE 102 |
| A Property of the Multinomial Distribution..... | HARRY KESTEN AND NORMAN MORSE 120 |
| A Classification Problem Involving Multinomials..... | OSCAR WESLER 128 |
| On the Limiting Distribution of the Number of Coincidences Concerning Telephone Traffic..... | L. TAKÁCS 134 |
| On the Integrodifferential Equation of Takács. II..... | EDGAR REICH 143 |
| Symmetrizable Markov Matrices..... | H. P. KRAMER 149 |
| On Some Statistical Tests for Mth Order Markov Chains..... | LEO A. GOODMAN 154 |
| Consensus of Subjective Probabilities: The Pari-Mutuel Method | EDMUND EISENBERG AND DAVID GALE 165 |
| A Note on Perfect Probability..... | GOPINATH KALLIANPUR 169 |
| On the Distribution of the Kolmogorov-Smirnov D-Statistic | PEDRO EGYDIO DE OLIVEIRA CARVALHO 173 |
| Equality of More Than Two Variances and of More Than Two Dispersion Matrices Against Certain Alternatives..... | R. GNANADESIKAN 177 |
| On the Theory of BAN Estimates..... | ROBERT A. WIJSMAN 185 |
| Estimation of the Medians for Dependent Variables..... | OLIVE JEAN DUNN 192 |
| A Consistent Estimator of a Component of a Convolution.... | WILLIAM R. GAFFEY 198 |
| Bayes and Minimax Procedures in Sampling from Finite and Infinite Populations | OM P. AGGARWAL 206 |
| An Approximation Useful in Univariate Stratification..... | GUNNAR EKMAN 219 |
| Truncation and Tests of Hypotheses..... | OM P. AGGARWAL AND IRWIN GUTTMAN 230 |

(Continued on outside back cover)

Vol. 30, No. 1 — March, 1959

THE ANNALS OF MATHEMATICAL STATISTICS

Subscription Rates. Current issues are \$12 per volume (four issues of one calendar year) in the U. S. and Canada, \$10 per volume elsewhere. Single issues are \$3.50. Back numbers are \$12 per volume, \$3.50 per issue, \$200 for the first 25 volumes, \$10 per additional volume purchased at the same time as Volume I through XXV.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning subscriptions, back numbers, payment of dues, etc., should be addressed to A. H. Bowker, Treasurer, Department of Statistics, Stanford University, Stanford, Calif.

Communications concerning membership, changes of address, etc., should be addressed to George E. Nicholson, Jr., Secretary, Department of Statistics, University of North Carolina, Chapel Hill, N. C. Changes of address which are to become effective for a given issue of the *Annals* should be reported to the Secretary on or before the 10th of the month preceding the month of issue.

Editorial Office. Department of Statistics, Eckhart Hall, University of Chicago, Chicago 37, Illinois, William Kruskal, Editor.

Preparation of manuscripts. Manuscripts should be submitted to the editorial office. Each manuscript should be typewritten, double spaced, with wide margins at sides, top, and bottom, and the original should be submitted with one additional copy, on paper that will take corrections. Dittoed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or a bibliography at the end of the paper; formulae in footnotes should be avoided. References should follow current *Annals* style, and should be numbered alphabetically according to authors' names.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter l, numeral 1 used as superscript and prime ('), alpha and a, kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g., $\overline{\log x}$) and underlined letters (e.g., \underline{x}) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol exp. In writing square roots the fractional exponent is preferable to the radical sign. Fractions *in the body of the text* (as opposed to displayed expressions) and fractions occurring in the numerators or denominators of fractions are preferably written with the solidus; thus $(a + b)/(c + d)$ rather than $\frac{a + b}{c + d}$.

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

Second-class postage paid at Baltimore, Maryland

COMPOSED AND PRINTED AT THE
WAVERLY PRESS, INC., BALTIMORE, MARYLAND, U. S. A.
