Volume 45

Contents

Parts 1 and 2, June 1958

Memoirs:

ARMITAGE, P. Numerical studies in the sequential estimation of a binomial parameter. LESLIE, P. H. A stochastic model for studying the properties of certain biological systems by numerical methods. SKELLAM, J. G. On the derivation and applicability of Neyman's Type A distribution. BLISS, C. I. & OWEN, A. R. G. Negative binomial distributions with a common k . BRASE, W. Simplified methods of fitting the truncated negative binomial distribution. COX, D. R. The interpretation of the effects of non-additivity in the latin square. ASHFORD, J. R. Quantal responses to mixtures of poisons under conditions of simple similar action—the analysis of uncontrolled data. MOORE, P. G. Some properties of runs in quality control procedures. WILLIAMS, E. J. Simultaneous regression equations in experimentation. RUSSELL, T. S. & BRADLEY, R. A. One-way variances in a two-way classification. FLACKETT, R. L. Studies in the history of probability and statistics. VII. The principle of the arithmetic mean. BROWN, R. L. & FEREDAY, F. Multivariate linear structural relations. OLKIN, I. Multivariate ratio estimation for finite populations. BARTON, D. E., DAVID, F. N. & MALLOW, C. L. Non-randomness in a sequence of two alternatives. I. Wilcoxon's and allied test statistics. GOODMAN, L. A. Simplified runs tests and likelihood ratio tests for Markoff chains. LEFNIK, R. B. Moment generating functions of quadratic forms in serially correlated normal variables. SAW, J. G. Moments of sample moments of censored samples from a normal population. HERDAN, G. The relation between the dictionary distribution and the occurrence distribution of word length and its importance for the study of quantitative linguistics. MACKENZIE, J. K. Second paper on statistics associated with the random disorientation of cubes. WAUGH, W. A. O'N. Conditioned Markov processes.

Miscellaneous: Contributions by D. E. BARTON, D. E. BARTON & F. N. DAVID, H. BERGSTRÖM, C. W. CLUNIES-ROES, H. R. B. HACK, M. HALPERIN & S. W. GREENHOUSE, G. HERDAN, A. HUITSON, N. L. JOHNSON, J. E. KERRICH, R. D. LORD, R. MAURICE

Corrigenda: F. N. DAVID & M. G. KENDALL: A. J. MAYNE: E. L. CROW

Colloquium Publications, Volume XXXI, Revised edition.

FUNCTIONAL ANALYSIS AND SEMI-GROUPS

by EINAR HILLE and RALPH S. PHILLIPS

This is a completely revised and largely rewritten edition of the Colloquium volume of the same name by the first author. The framework of the earlier book has been kept, but the subject matter has been rearranged and much expanded. The algebraic tools are introduced much earlier and put to important use throughout the treatise. Functional analysis occupies almost one third of the book. The sections devoted to the analytical theory of semi-groups have been augmented by new material on perturbation theory, adjoint theory, spectral theory, operational calculus, and stochastic theory.

CONTENTS

Statistical Approach to Cosmology.....	By J. NEYMAN and ELIZABETH SCOTT. (With Discussion)
On Chi-Square Goodness-of-Fit Tests for Continuous Distributions....	By G. S. WATSON. (With Discussion)
The Matching Distributions: Poisson Limiting Forms and Derived Methods of Approximation	D. E. BARTON.
The Lindisfarne Scribes' Problem.....	By S. D. SILVEY.
Fiducial Distributions and Bayes' Theorem.....	By D. V. LINDLEY.
On the Exact Distribution of a Test in Multivariate Analysis.....	By D. P. BANERJEE.
The Inspection of a Markov Process.....	By S. R. BROADBENT.
The Fitting of Markoff Serial Variation Curves.....	By HILDA M. DAVIES AND G. H. JOWETT.
The Asymptotic Powers of Certain Tests of Goodness of Fit for Time Series.....	By E. J. HANNAN.
Bandwidth and Variance in Estimation of the Spectrum.....	By ULF GRENANDER.
The Comparison of Correlations in Time-Series.....	By M. H. QUENOUILLE.
A Difference Equation Technique Applied to the Simple Queue.....	By B. W. CONOLLY.
A Difference Equation Technique Applied to the Simple Queue with Arbitrary Arrival Distribution	By B. W. CONOLLY.
The Continuous Time Solution of the Equations of the Single Channel Queue with a General Class of Service-time Distributions by the Method of Generating Functions.....	By GEORGE LUCHAK.
The Effect of the Size of the Waiting Room on a Simple Queue.....	By P. D. FINCH.
Interval Analysis and the Logarithmic Transformation.....	By P. G. MOORE.
The Analysis of Latin Square Designs with Individual Curvatures in One Direction.....	By C. P. COX.
Dilution Series: A Statistical Test of Technique.....	By W. L. STEVENS.

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

OFFICERS

President:

J. Wolfowitz, Department of Mathematics, Cornell University, Ithaca, New York

President-Elect:

John W. Tukey, Department of Mathematics, Princeton University, (mail to Box 708, Princeton, New Jersey), and Bell Telephone Laboratories, Inc., Murray Hill, New Jersey

Secretary:

G. E. Nicholson, Jr., Department of Statistics, University of North Carolina, Chapel Hill, North Carolina

Treasurer:

A. H. Bowker, Department of Statistics, Stanford University, Stanford, California

Editor:

W. H. Kruskal, Department of Statistics, Eckhart Hall, University of Chicago, Chicago 37, Illinois

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

Membership dues including a subscription to the ANNALS OF MATHEMATICAL STATISTICS are \$10.00 per year for residents of the United States or Canada and \$5.00 per year for residents of other countries. There are special rates for students and for some other classes of members. Inquiries regarding membership in the Institute should be sent to the Secretary of the Institute.

Contents (continued)

A Note on Incomplete Block Designs.....	A. M. KSHIRSAGAR	907
On A Minimax Property of a Balanced Incomplete Block Design.....	V. L. MOTE	910
A Characterization of the Normal Distribution.....	J. N. K. RAO	914
A Note on P.B.I.B. Design Matrices.....	W. A. THOMPSON, JR.	919
On a Factorization Theorem in the Theory of Analytic Characteristic Functions	R. G. LAHA	922
Bounds for Mills' Ratio for the Type III Population.....	A. V. BOYD	926
On the Commutativity of Operators in Stochastic Models for Learning	MANFRED KOCHEN	930
Addenda to "Intra Block Analysis for Factorials in Two-Associate Class Group Divisible Designs".....	RALPH ALLAN BRADLEY AND CLYDE YOUNG KRAMER	933
Acknowledgment of Priority.....	JOHN S. WHITE	935
Correction to "On the Power of Certain Tests for Independence in Bivariate Populations".....	H. S. KONIJN	935
Correction to "The WAGR Sequential <i>t</i> -Test Reaches a Decision with Probability One".....	HERBERT T. DAVID AND WILLIAM H. KRUSKAL	936
Abstracts of Papers.....		936
News and Notices.....		939
Report of the Ames, Iowa Meeting.....		943
Publications Received.....		946

MEETINGS OF THE INSTITUTE

TENTATIVE SCHEDULE

WESTERN REGIONAL MEETING—Monterey, California, November 14–15, 1958. CENTRAL REGIONAL MEETING—Cleveland, Ohio, April 2–4, 1959. EASTERN REGIONAL MEETING—Pittsburgh, Pennsylvania, March, 1959.

Abstracts should be submitted in duplicate to the Editor, preferably on abstract blanks, which can be obtained from the IMS Secretary. Abstracts must be received at least 50 days before the first day of the meeting at which they are to be presented, indicating whether presented by title or in person. (Only one contributed paper may be given in person at any one meeting) They may be printed prior to the publication of the report of the meeting. Those received by April 30 will appear in the September *Annals*, by July 31 in December, etc. Abstracts should be limited to 200 words or the equivalent, and should avoid displayed expressions and complicated formulae. They can be accepted from non-members of the IMS only if transmitted by members.
