ESTADISTICA

Journal of the Inter American Statistical Institute

Vol. X, No. 37 December 1952

Contents

Utilización de los Datos Censales en el Cálculo de Ingreso y Producto Nacional y en el Análisis Económico ..... MIGUEL FADUL

Methodology and Summary Results of the 1950 Birth Registration Test in the United States ..... SAM SHAPIRO AND JOSEPH SCHACHTER

Muestras y Censos ..... ENRIQUE CANSADO

Document Sensing in Large-Scale Enumerative Surveys
RUTH D. BOTHWELL AND DANIEL B. LEVINE

Identificación Rural Previa como Sustituto de la Cartografía: IV Censo Agropecuario de la República Dominicana ..... MILCIADES D. HERRERA B.

El Concepto de Actividad Productiva ..... IRVING H. SIEGEL

Utilización de los Resultados del Censo de las Américas en el Servicio Social

Resultados Censales Preliminares Obtenibles por Elaboración Adelantada de una Muestra

Intensive Orientation Program in Labor Force Statistics—Programa de Orientación Intensiva en Estadísticas de Fuerza del Trabajo ..... EDWIN D. GOLDFIELD

Inter-American Training Center for Economic and Financial Statistics, Santiago, Chile, 1953

Institute Affairs. Statistical News. Publications.

Published quarterly; annual subscription price $3.00 (U.S.); single copies $1.00 (U.S.)

Inter American Statistical Institute, % Pan American Union, Washington 6, D.C., U. S. A.

JOURNAL OF THE AMERICAN STATISTICAL ASSOCIATION

1108 16th St., N.W. Washington 6, D. C.

December 1952
VOL. 47 NO. 260

Use of Ranks in One-Criterion Variance Analysis
WILLIAM H. KRUSKAL AND W. ALLEN WALLIS

Serial Number Analysis ..... LEO A. GOODMAN

Confidence Intervals for Medians and Other Position Measures (One Chart)
RALPH S. WOODRUFF

Problems in Inter-spatial Comparisons of Worker Efficiency: Illustrations from Puerto Rico
SIMON ROTTENBERG

Evolving Mechanisms for the Production of International Health Statistics
HALBERT L. DUNN

A Generalization of Sampling Without Replacement From a Finite Universe
D. G. HORVITZ AND D. J. THOMPSON

Book Reviews

ASA

THE AMERICAN STATISTICAL ASSOCIATION INVITES AS MEMBERS ALL PERSONS INTERESTED IN:

1. Development of new theory and method
2. Improvement of basic statistical data
3. Application of statistical methods to practical problems.

Institute of Mathematical Statistics is collaborating with JSTOR to digitize, preserve, and extend access to *The Annals of Mathematical Statistics.* www.jstor.org

BIOMETRIKA

A Journal for the Statistical Study of Biological Problems

Volume 39 Contents Parts 3 and 4, December 1952

1. Estimation of population parameters from data obtained by means of capture-recapture method. Part II. By P. H. LESLIE. 2. Tensor notation and the sampling cumulants of k-statistics. By E. L. KAPLAN. 3. Estimation in double sampling. By D. R. COX. 4. Sampling from bivariate, non-normal universes. By H. HYRENIUS. 5. The truncated Poisson distribution. By P. G. MOORE. 6. Upper 5% and 1% points of the ratio s^2max/s^2min. By H. DAVID. 7. Conditions under which Gram-Charlier and Edgeworth curves are positive definite and unimodal. By D. E. BARTON and K. E. DENNIS. 8. On a two-sided sequential t-test. By S. RUSHTON. 9. Properties of distribution based on certain simple transformation of the normal curve. By J. DRAPER. 10. Estimation of the mean and standard deviation of a normal population from a censored sample. By A. K. GUPTA. 11. The rank analysis of incomplete block designs. By R. A. BRADLEY and M. E. TERRY. 12. The statistical structure of ecological communities. By J. G. SKELLAM. 13. The growth, survival, wandering and variation of the long-tailed field mouse. Part III—Wandering and recapture. By H. P. and H. S. HACKER. 14. Use of scores for the analysis of association in contingency tables. By E. J. WILLIAMS. 15. Statistical significance of odd bits of information. By M. S. BARTLETT. 16. Tests of fit in time series. By P. WHITTLE. 17. The fitting of grouped truncated and grouped censored normal distributions. By P. M. GRUNDY. 18. MISCELLANEA: Samples with the same number in each stratum. By W. L. STEVENS. Comparison of analysis of variance power functions in the parametric and random models. By N. L. JOHNSON. Approximation to the probability integral of the distribution of range. By N. L. JOHNSON. Discrimination in time series analysis. By A. RUDRA. Statistical control of counting experiments. By H. O. LANCASTER. Exact grouping corrections to moments and cumulants. By M. KUPPERMAN.

The subscription price, *payable in advance*, is 45s. inland, 54s. export (per volume including postage). Cheques should be drawn to Biometrika and sent to "The Secretary, Biometrika Office, Department of Statistics, University College, London, W.C. 1." All foreign cheques must be in sterling and drawn on a bank having a London agency.

ECONOMETRICA

Journal of the Econometric Society

Contents of Vol. 20, July, 1952, include:

JAN TINBERGEN
Four Alternative Policies to Restore Balance of Payments Equilibrium
T. M. BROWN.....Habit Persistence and Lags in Consumer Behavior
A. D. ROY.....Safety First and the Holding of Assets
WALTER ISARD.....A General Location Principle of an Optimum Space-Economy
RENÉ ROY.....Les Elasticites
de la Demande relative aux biens de Consommation et aux groups de biens
A. DVORETZKY, J. KIEFER, AND J. WOLFOWITZ
The Inventory Problem: II. Case of Unknown Distributions of Demand
Reports of the Boston and Tokyo Meetings
Review Articles, Book Reviews, and Notes

Published Quarterly Subscription rates available on request

The Econometric Society is an international society for the advancement of economic theory in its relation to statistics and mathematics.

Subscriptions to *Econometrica* and inquiries about the work of the Society and the procedure in applying for membership should be addressed to William B. Simpson, Secretary, The Econometric Society, The University of Chicago, Chicago 37, Illinois, U. S. A.

MATHEMATICAL REVIEWS

A journal containing reviews of the mathematical literature of the world, with full subject and author indices

Publication of this journal is sponsored by the American Mathematical Society, Mathematical Association of America, Institute of Mathematical Statistics, London Mathematical Society, Edinburgh Mathematical Society, Union Matematica Argentina, and others.

Subscriptions accepted to cover the calendar year only.
Issues appear monthly except July. $20.00 per year.

Send subscription order or request for sample copy to

AMERICAN MATHEMATICAL SOCIETY
80 Waterman Street, Providence 6, Rhode Island

JOURNAL OF THE
ROYAL STATISTICAL SOCIETY

Series B (Methodological)

Contents of Volume 14, No. 1, 1952

P. ARMITAGE.....The Statistical Theory of Bacterial Populations Subject to Mutation (with Discussion)
DAVID G. KENDALL
On the Choice of a Mathematical Model to Represent Normal Bacterial Growth
K. D. TOCHER....The Design and Analysis of Block Experiments (with Discussion)
S. C. PEARCE.....Some New Designs of Latin Square Type
I. J. GOOD.....Rational Decisions
MARTIN SANDELIUS
A Confidence Interval for the Smallest Proportion of a Binomial Population
A. M. WALKER.....Some Properties of the Asymptotic Power Function of Goodness-of-Fit Tests for Linear Autoregressive Schemes
A. GARDNER.....Greenwood's "Problem of Intervals": An Exact Solution for $N = 3$

The Royal Statistical Society, 4, Portugal Street, London, W.C.2.

SKANDINAVISK AKTUARIETIDSKRIFT

1952 - Parts 1 - 2

Contents

ERLING SVERDRUP
The Limit Distribution of a Continuous Function of Random Variables
JOHN E. WALSH.....Large Sample Validity of the Binomial Distribution for Lives with Unequal Mortality Rates
G. ARFWEDSON
A Semi-Convergent Series with Application to the Collective Theory of Risk
J. F. STEFFENSEN.....Inequalities in Makeham-graduated Tables
PETER WHITTLE.....Some Results in Time Series Analysis
TORE DALENIUS
The Problem of Optimum Stratification in a Special Type of Design
T. PENTIKÄINEN....On the Net Retention and Solvency of Insurance Companies

Annual subscription: 10 Swedish Crowns (Approx. $2.00).

Inquiries and orders may be addressed to the Editor,

SKÄRVIKSVÄGEN 7, DJURSHOLM (SWEDEN)

SANKHYĀ

The Indian Journal of Statistics

Edited by P. C. Mahalanobis

Vol. 11, Parts 3 and 4, 1951

Preface. By P. C. MAHALANOBIS. Dynamic systems of the recursive type—economic and statistical aspects. By HERMAN O. A. WOLD. The applicability of large sample tests for moving average and autoregressive schemes to series of short length—an experimental study: Part 1: Moving average. By ABRAHAM MATTHAI AND M. B. KANAN. Part 2: Autoregressive series. By S. RAJA RAO AND RANJAN K. SOM. Part 3: The discriminant function approach in the classification of time series (Part III of statistical inference applied to classificatory problems). By C. RADHAKRISHNA RAO. On the estimation of parameters in a recursive system. By A. C. DAS. Bias in estimation of serial correlation coefficients. By A. SREE RAMA SASTRY. Some moments of moment-statistics and their use in tests of significance in autocorrelated series. By A. SREE RAMA SASTRY. Elasticities of demand for certain Indian imports and exports. By V. NARASIMHA MURTI AND V. KASI SASTRI. Balance between income and leisure. By M. V. JAMBUNATHAN. The use of commercial punched card machines for statistical analysis with special reference to time series problems. By ABRAHAM MATTHAI. On simple difference sets. By T. A. EVANS AND H. B. MANN. Bounds on the distribution of chi-square. By SHANTI A. VORA. On the limit points of relative frequencies. By D. BASU. Indian Statistical Institute: Nineteenth Annual Report: 1950–51

Annual subscription: 30 rupees
Inquiries and orders may be addressed to the
Editor, Sankhyā, Presidency College, Calcutta, India.

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

OFFICERS FOR 1952

President:
M. A. GIRSHICK, Stanford University, Stanford, California

President-Elect:
M. H. HANSEN, Bureau of the Census, Washington, D. C.

Secretary-Treasurer:
K. J. ARNOLD, Michigan State College, East Lansing, Michigan

Editor:
T. W. ANDERSON, Columbia University, New York, New York

The purpose of the Institute of Mathematical Statistics is to stimulate research in the mathematical theory of statistics and to promote cooperation between the field of pure research and the fields of application.

Membership dues including subscription to the ANNALS OF MATHEMATICAL STATISTICS are $10.00 per year within the United States and Canada and $7.00 per year elsewhere. Dues and inquiries regarding membership in the Institute should be sent to the Secretary-Treasurer of the Institute.

MEETINGS OF THE INSTITUTE

ANNUAL MEETING—CHICAGO, ILLINOIS—December 27-29, 1952.

To be held in conjunction with the American Statistical Association and the Econometric Society.
