THE ANNALS  
of  
MATHEMATICAL  
STATISTICS

*SIX DOLLARS PER ANNUM*

NOVEMBER

1932

PUBLISHED QUARTERLY BY  
AMERICAN STATISTICAL ASSOCIATION

*Publication Office*—Edwards Brothers, Inc., Ann Arbor, Michigan

*Business Office*—530 Commerce Bldg., New York Univ., New York, N. Y.

*Entered as second class matter at the Postoffice at Ann Arbor, Mich.,  
under the Act of March 3rd, 1879.*

STATEMENT OF OWNERSHIP  
UNDER ACT OF CONGRESS OF AUGUST 24, 1912

*Publisher*—American Statistical Association, New York City, New York.

*Editor*—H. C. Carver, University of Michigan.

*Managing Editor*—Rattan S. Sekhon, Ann Arbor, Michigan.

*Business Manager*—J. W. Edwards, Ann Arbor, Michigan.

*Owner*—American Statistical Association, 530 Commerce Bldg., New York  
City.

## EDITORIAL COMMITTEE

---

H. C. Carver, *Editor*

R. S. Sekhon, *Assistant Editor*

---

### *Associate Editors*

Burton H. Camp

Robert Henderson

Harold Hotelling

Henry Lewis Rietz

Henry Schultz

---

J. W. Edwards, *Business Manager*

## CONTENTS OF VOLUME III

---

Distribution of the Means Divided by the Standard Deviations of Samples from Non-Homogeneous Populations . . . . .	1
<i>G. A. Baker</i>	
A Statistical Approach to Mathematical Formulation of Demand-Supply-Price Relationships . . . . .	10
<i>Robert W. Burgess</i>	
The Distributions of the Precision Constant and Its Square in Samples of . . . . . from a Normal Population . . . . .	20
<i>H. M. Feldman</i>	
A Postulate for Observations . . . . .	32
<i>R. Henderson</i>	
A Short Method for Solving for a Co-efficient of Multiple Correlation . . . . .	40
<i>Paul Horst</i>	
A Short Method and Tables for the Calculation of the Average and Standard Deviation of Logarithmic Distribution . . . . .	45
<i>Thomas N. Jenkins</i>	
On Symmetric Functions of More than One Variable and of Frequency Functions . . . . .	56
<i>A. L. O'Toole, National Research Fellow</i>	
A Generalized Error Function . . . . .	64
<i>Albert Wertheimer</i>	
A Co-efficient of Linear Correlation Based on the Method of Least Squares and the Line of Best Fit . . . . .	79
<i>J. B. Coleman</i>	
A Study of the Distribution of Means Estimated from Small Samples by the Method of Maximum Likelihood for Pearson's Type II Curve . . . . .	86
<i>J. L. Carlson</i>	

## CONTENTS OF VOLUME III—Continued

- A New Theory of Depreciation of Physical Assets . . . . . 108  
*Robert E. Moritz*
- The Simultaneous Distribution of Mean and Standard Deviation in Small Samples . . . . . 126  
*Allen T. Craig*
- The Limits of a Measure of Skewness . . . . . 141  
*Harold Hotelling and Leonard M. Solomons*
- The Theory of Probability from the Point of View of Admissible Numbers . . . . . 143  
*Arthur H. Copeland*
- Relative Residuals Considered as Weighted Simple Residuals in the Application of the Method of Least Squares . . . 157  
*Walter A. Hendricks, Junior Biologist, Bureau of Animal Industry, United States Department of Agriculture*
- Moments and Distributions of Estimates of Population Parameters from Fragmentary Samples . . . . . 163  
*S. S. Wilks*
- On the Sampling Distribution of the Multiple Correlation Coefficient . . . . . 196  
*S. S. Wilks*
- Curve Approximation by Means of Functions Analogous to the Hermite Polynomials . . . . . 204  
*Herrick E. H. Greenleaf*
- Approximation and Graduation According to the Principle of Least Squares by Orthogonal Polynomials . . . . . 257  
*Charles Jordan*
- Concerning the Limits of a Measure of Skewness . . . . . 358  
*Raymond Garver*
- Trapezoidal Rule for Computing Seasonal Indices (Editorial) 361  
*Harry C. Carver*
