IMS LECTURE NOTES — MONOGRAPH SERIES

This series provides an avenue for the rapid, but carefully refereed, publication of important research results in comprehensive form and expository style. These volumes should be of great value to researchers and advanced students in statistics, probability, and related fields. The series editor is Shanti S. Gupta, Purdue University.

4 ZONAL POLYNOMIALS

by Akimichi Takemura

A self-contained development of zonal polynomials in the framework of standard multivariate analysis.

Zonal polynomials have been used extensively in the study of noncentral multivariate distributions. This easily understood treatment uses only the standard tools of linear algebra and multivariate normal distribution theory.

110 pages

5 INEQUALITIES IN STATISTICS AND PROBABILITY

edited by Y. L. Tong

Proceedings of the Symposium on Inequalities in Statistics and Probability held in Lincoln, Nebraska during October 1982.

This volume reports on the recent rapid growth in the field of inequalities due, in part, to widespread applications in reliability theory, in multivariate nonnormal analysis, and in optimization and constraint problems. The volume contains thirty expository and research papers by leaders in the field.

263 pages
List price $25
IMS members $15

6 THE LIKELIHOOD PRINCIPLE

by James Berger and Robert Wolpert

A comprehensive presentation and criticism of the likelihood principle and its generalizations.

This book provides a non-technical development of the likelihood principle with attention to some of its surprising implications for such areas as randomization analysis, censoring, significance testing, and sequential analysis. The authors also discuss generalizations and implementations of the likelihood principle.

The Annual Index to the Statistical
Literature of the World

CURRENT INDEX TO STATISTICS

APPLICATIONS, METHODS AND THEORY

VOLUME 10 (1984) – NOW AVAILABLE

- Nearly 8400 articles from "core" and "related" journals and books indexed for 1984.
- Complete coverage of 63 journals in statistics and related fields.
- Statistics articles selected and indexed from over 300 other journals.
- Subject index lists each article alphabetically according to each *important word* in its title.
- Subject index also lists articles alphabetically according to *key words* not appearing in the title.
- Author index lists each article under the name of each author.
- Reasonable prices:

IMS/ASA Members	—$15
Other individuals	—$20
Other institutions	—$40

Published jointly by the Institute of Mathematical Statistics and the American Statistical Association. Volumes 1-10 are available now at the above prices. Publication of Volume 11(1985) is expected late in 1986. Orders for Volume 11 are now being accepted at the above prices, with shipping upon availability. Please specify applicable rate and volume number(s) desired. Order prepaid from:

The Annals of Statistics

Volume 14 **September 1986** **No. 3**

Invited Paper

Influence functionals for time series ..... R. Douglas Martin and Victor J. Yohai
Discussion ..... David R. Brillinger
Discussion ..... J. Franke and E. J. Hannan
Discussion ..... Hans R. Künsch
Discussion ..... Robert B. Miller and Jae June Lee
Discussion ..... H. Vincent Poor
Discussion ..... P. M. Robinson
Discussion ..... Ruey S. Tsay
Discussion ..... Edward J. Wegman
Discussion ..... Mike West
Rejoinder ..... R. Douglas Martin and Victor J. Yohai

Articles

Likelihood and observed geometries ..... O. E. Barndorff-Nielsen
Rectangular lattice designs: Efficiency factors and analysis ..... R. A. Bailey and T. P. Speed
Conservative confidence bands in curvilinear regression ..... Daniel Q. Naiman
Spherical regression ..... Ted Chang
Asymptotic conditional inference for the offspring mean of a supercritical Galton–Watson process ..... T. J. Sweeting
Nonparametric Bayesian regression ..... Daniel Barry
Bayes rules for a clinical-trials model with dichotomous responses ..... Gordon Simons
An extreme value theory for sequence matching ..... Richard Arratia, Louis Gordon and Michael Waterman
Skewness and asymmetry: Measures and orderings ..... H. L. MacGillivray
On the asymptotic formula for the probability of a Type I error of mixture type power one tests ..... Moshe Pollak
The shape of Bayes tests of power one ..... Hans Rudolf Lerche
Very weak expansions for sequential confidence levels ..... Michael Woodroofe
Asymptotic properties of Neyman–Pearson tests for infinite Kullback–Leibler information ..... Arnold Janssen
Stochastic complexity and modeling ..... Jorma Rissanen
Asymptotic optimality of C_L and generalized cross-validation in ridge regression with application to spline smoothing ..... Ker-Chau Li
Asymptotically minimax estimators for distributions with increasing failure rate ..... Jane-Ling Wang
Estimation of a unimodal distribution function ..... Shaw-Hwa Lo
On asymptotically efficient estimation in semiparametric models ..... Anton Schick
Asymptotic behavior of the empiric distribution of M-estimated residuals from a regression model with many parameters ..... Stephen Portnoy
The use of subseries values for estimating the variance of a general statistic from a stationary sequence ..... Edward Carlstein
A minimum distance estimator for first-order autoregressive processes ..... Chamont W. H. Wang
Minimum distance estimation and goodness-of-fit tests in first-order autoregression ..... Hira L. Koul
Second-order risk structure of GLSE and MLE in a regression with a linear process ..... Yasuyuki Toyooka
Bayesian statistical inference for sampling a finite population ..... Albert Y. Lo

Short Communications

The total time on test plot and the cumulative total time on test statistic for a counting process ..... R. D. Gill
Local convergence of empirical measures in the random censorship situation with application to density and rate estimators ..... Helmut Schäfer
Bahadur representations for robust scale estimators based on regression residuals ..... A. H. Welsh
On a converse to Scheffé's theorem ..... T. J. Sweeting
The efficiency of Good's nonparametric coverage estimator ..... Warren W. Esty

NEW IN 1986
First Issue - February

NOW AVAILABLE

STATISTICAL SCIENCE

a review journal of the institute of mathematical statistics

EXECUTIVE EDITOR: **Morris H. DeGroot,** *Carnegie-Mellon University*
EDITORS: **David R. Brillinger,** *University of California, Berkeley*
J. A. Hartigan, *Yale University*
Ingram Olkin, *Stanford University*

On the occasion of its fiftieth anniversary, the Institute of Mathematical Statistics announces publication of *Statistical Science,* a new quarterly review journal in statistics and probability. *Statistical Science* will present the full range of contemporary statistical thought at a modest technical level accessible to the broad community of practitioners, teachers, researchers, and students in statistics and probability.

Featuring

Volume 1 Number 1 February 1986

Freedman & Navidi on
MODELS FOR ADJUSTING THE CENSUS

Efron & Tibshirani on
THE BOOTSTRAP

Le Cam on
THE CENTRAL LIMIT THEOREM
AROUND 1935

Geisser on
THE COLLECTED WORKS OF
GEORGE E. P. BOX

Genest & Zidek on
COMBINING PROBABILITY
DISTRIBUTIONS

Interviews with
DAVID BLACKWELL & T. W. ANDERSON

- discussions of methodological and theoretical topics of current interest and importance,
- surveys of substantive research areas with promising statistical applications,
- evaluations of research papers in specific areas of statistics and probability,
- discussions of classic articles from the literature with commentary on their impact on contemporary thought and practice,
- comprehensive book reviews, and
- interviews with distinguished statisticians and probabilists.

Statistical Science joins the Institute's distinguished journals, *The Annals of Statistics* and *The Annals of Probability,* in February 1986 and is included as a privilege of membership. Nonmember subscriptions are available to individuals and organizations. All subscriptions to the *Annals* include a subscription to *Statistical Science* for 1986. For additional information on how to receive *Statistical Science,* please write to the IMS Business Office.
