

THE ANNALS of PROBABILITY

AN OFFICIAL JOURNAL OF
THE INSTITUTE OF MATHEMATICAL STATISTICS

Articles

Tail behaviour for suprema of empirical processes	ROBERT J. ADLER AND LAWRENCE D. BROWN	1
Weighted empirical and quantile processes	MIKLÓS CSÖRGŐ, SÁNDOR CSÖRGŐ, LAJOS HORVÁTH AND DAVID M. MASON	31
Normal and stable convergence of integral functions of the empirical distribution function	MIKLÓS CSÖRGŐ, SÁNDOR CSÖRGŐ, LAJOS HORVÁTH AND DAVID M. MASON	86
A process in a randomly fluctuating environment	NEAL MADRAS	119
A control problem arising in the sequential design of experiments	S. P. LALLEY AND G. LORDEN	136
Law of large numbers and central limit theorem for linear chemical reactions with diffusion	PETER KOTELENEZ	173
On the influence of the extremes of an i.i.d. sequence on the maximal spacings	PAUL DEHEUVELS	194
Exact convergence rate in the limit theorems of Erdős-Rényi and Shepp	PAUL DEHEUVELS, LUC DEVROYE AND JAMES LYNCH	209
Matrix normalized sums of independent identically distributed random vectors	PHILIP S. GRIFFIN	224
On the distributions of sums of symmetric random variables and vectors	HERMAN RUBIN AND THOMAS SELLKE	247
On strong invariance principles under dependence assumptions	ERNST EBERLEIN	260
On Itô stochastic integration with respect to p -stable motion: Inner clock, integrability of sample paths, double and multiple integrals	J. OSIŃSKI AND W. A. WOYCZYŃSKI	271
Asymptotic behaviour of stable measures near the origin	M. RYZNAR	287
Absolute continuity of stable seminorms	T. BYCZKOWSKI AND K. SAMOTIJ	299
Second-order approximation in the conditional central limit theorem	DIETER LANDERS AND LOTHAR ROGGE	313
Fisher information and detection of a Euclidean perturbation of an independent stationary process	J. MICHAEL STEELE	326
Entropy and the central limit theorem	ANDREW R. BARRON	336

Book Review

Reviews of <i>Introduction to Stochastic Integration</i> , by K. L. Chung and R. J. Williams, <i>Stochastic Calculus and Applications</i> , by R. J. Elliott, and <i>Semimartingales: A Course on Stochastic Processes</i> , by M. Metivier	PHILIP PROTTER	343

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

OFFICERS AND EDITORS

President:

Paul Meier, Department of Statistics, University of Chicago, 5734 University Avenue, Chicago, Illinois 60637

President-Elect:

Ronald Pyke, Department of Mathematics GN-50, University of Washington, Seattle, Washington 98195

Past President:

Oscar Kempthorne, Department of Statistics, 111B Snedecor Hall, Iowa State University, Ames, Iowa 50011

Executive Secretary:

Francisco J. Samaniego, Division of Statistics, 469 Kerr Hall, University of California, Davis, California 95616

Treasurer:

Nicholas P. Jewell, Group in Biostatistics, University of California, Berkeley. *Please send correspondence to:* IMS Business Office, 3401 Investment Boulevard #7, Hayward, California 94545

Program Secretary:

Richard A. Johnson, Department of Statistics, University of Wisconsin, 1210 West Dayton St., Madison, Wisconsin 53706

Editor: *The Annals of Statistics*

Willem R. van Zwet, Department of Mathematics, University of Leiden, P.O. Box 9512, 2300 RA Leiden, The Netherlands

Editor: *The Annals of Probability*

Thomas M. Liggett, Department of Mathematics, University of California, Los Angeles, California 90024

Executive Editor: *Statistical Science*

Morris H. DeGroot, Department of Statistics, Carnegie-Mellon University, Pittsburgh, Pennsylvania 15213

Editor: *The IMS Bulletin*

William C. Guenther, Department of Statistics, University of Wyoming, Laramie. *Please send correspondence to:* Box 3332 University Station, Laramie, Wyoming 82071

Editor: *The IMS Lecture Notes—Monograph Series*

Shanti S. Gupta, Department of Statistics, Purdue University, West Lafayette, Indiana 47907

Managing Editor:

Paul Shaman, Department of Statistics, University of Pennsylvania, Philadelphia, Pennsylvania 19104

Journals. The scientific journals of the Institute are *The Annals of Statistics*, *The Annals of Probability*, and *Statistical Science*. The news organ of the Institute is *The Institute of Mathematical Statistics Bulletin*.

Individual, Institutional, and Corporate Memberships. All individual members receive *Statistical Science* and *The IMS Bulletin* for a basic annual dues rate of \$30. Individual members may elect to receive one *Annals* for an additional \$10 or both *Annals* for an additional \$20. Dues allocations to each journal are set by Council resolution. Of the total dues paid, \$8 is allocated to *The IMS Bulletin* and the remaining amount is allocated equally among the scientific journals received. Memberships are available at a reduced rate (40% of regular rates) for full-time students, permanent residents of developing countries, and retired members. Retired members may also elect to receive the *Bulletin* only for \$10. *Institutional memberships* are available to nonprofit organizations at \$225 per year and *corporate memberships* are available to other organizations at \$500 per year. Institutional and corporate memberships include two multiple-readership copies of all IMS journals in addition to other benefits specified for each category (details available from the IMS Business Office).

Individual and General Subscriptions. Subscriptions are available on a calendar-year basis. For 1986, all subscriptions to one or both *Annals* automatically include one subscription to *Statistical Science*. *Individual subscriptions* are for the personal use of the subscriber and must be in the name of, paid directly by, and mailed to an individual. Individual subscriptions for 1986 are available to both *Annals* and *Statistical Science* (\$79), one *Annals* and *Statistical Science* (\$52), *Statistical Science* only (\$25), and *The IMS Bulletin* (\$15). *General subscriptions* are for libraries, institutions, and any multiple-readership use. General subscriptions for 1986 are available to both *Annals* and *Statistical Science* (\$155), *The Annals of Statistics* and *Statistical Science* (\$85), *The Annals of Probability* and *Statistical Science* (\$80), *Statistical Science* only (\$40), and *The IMS Bulletin* (\$20). Air mail rates for overseas delivery of general subscriptions are \$40 per title.

Correspondence. Mail to IMS should be sent to the IMS Business Office (membership, subscriptions, claims, copyright permissions, advertising, back issues), the Editor of the appropriate journal (submissions, editorial content), or the Managing Editor (production).

***The Annals of Probability* (ISSN 0091-1789)**, Volume 14, Number 1, January 1986. Published in January, April, July, and October by the Institute of Mathematical Statistics, 3401 Investment Boulevard #7, Hayward, California 94545. Second-class postage paid at Hayward, California and at additional mailing offices. **Postmaster:** Send address changes to *The Annals of Probability*, Institute of Mathematical Statistics, 3401 Investment Boulevard #7, Hayward, California 94545.

DAVID V. HINKLEY, 1980–1982
MICHAEL D. PERLMAN, 1983–1985

EDITORIAL POLICY

The main purpose of *The Annals of Probability* and *The Annals of Statistics* is to publish contributions to the theory of probability and statistics and to their applications. The emphasis is on importance and interest; formal novelty and mathematical correctness alone are not sufficient. Especially appropriate are authoritative expository papers and surveys of areas in vigorous development. All papers are refereed.

THE ANNALS OF PROBABILITY

INSTRUCTIONS FOR AUTHORS

Submission of Papers. Papers to be submitted for publication should be sent to the Editor of *The Annals of Probability*. (For current address, see the latest issue of the *Annals*.) Three copies should be submitted on paper that will take ink corrections. The manuscript will *not* normally be returned to the author; when expressly requested by the author, one copy of the manuscript will be returned.

Preparation of Manuscripts. Manuscripts should be typewritten, entirely double-spaced, including references, with wide margins at sides, top and bottom. All copies must be completely legible. When technical reports are submitted, all extraneous sheets and covers must be removed. Typists should check an issue of the *Annals* for style.

Submission of Reference Papers. Two copies of unpublished or not easily available papers cited in the manuscript should be submitted with the manuscript.

Title. The title should be descriptive and as concise as is feasible, i.e., it should indicate the topic of the paper as clearly as possible, but every word in it should be pertinent.

Abbreviated Title. An abbreviated title to be used as a running head is also required. This should normally not exceed 35 characters. For example, an article with the title "A Limit Theorem for Conditioned Recurrent Random Walk Attracted to a Stable Law" could have the running head, "Limit Theorem for Recurrent Random Walk" or possibly "Recurrent Random Walk Attracted to a Stable Law" depending on the emphasis to be conveyed.

Affiliation. Indicate your present institutional affiliation as you would like it to appear. List your permanent mailing address after the references.

Summary. Each manuscript is required to contain a summary, clearly separated from the rest of the paper, which will be printed immediately after the title. Its main purpose is to inform the reader quickly of the nature and results of the paper; it may also be used as an aid in retrieving information. The length of a summary will clearly depend on the length and difficulty of the paper, but in general it should not exceed 150 words. Formulas should be used as sparingly as possible within the summary. The summary should not make reference to results or formulas in the body of the paper—it should be self-contained.

Footnotes. Footnotes should not be used, except as described under Title Page Footnotes below. Such information should be included within the text.

Title Page Footnotes. Included as a footnote on page 1 should be the headings:

American Mathematical Society 1980 subject classifications. Primary—; secondary—.
Key words and phrases.

The classification numbers representing the primary and secondary subjects of the article may be found with instructions for its use in the *Mathematical Reviews Annual Subject Index-1980*. The key words and phrases should describe the subject matter of the article; generally they should be taken from the body of the paper.

Acknowledgment of support. Grants and contracts should also be included in this footnote.

Identification of Symbols. Manuscripts for publication should be clearly prepared to insure that all symbols are properly identified. Distinguish between "oh" and "zero"; "ell" and "one"; "epsilon" and "element of"; "summation" and "capital sigma," etc. Indicate also when special type is required (Greek, German, script, boldface, etc.); unless indicated otherwise, formula letters will be set in italics. Acronyms should be introduced sparingly. Any handwritten symbols should be clearly identified.

Figures and Tables. Figures, charts, and diagrams should be prepared in a form suitable for photographic reproduction and should be professionally drawn twice the size they are to be printed. (These need not be submitted until the paper has been accepted for publication.) The printer does not improve upon the quality of the figures submitted. Tables should be typed on separate pages with accompanying footnotes immediately below the table.

Formulas. Fractions *in the text* are preferably written with the solidus or negative exponent; thus,

$(a + b)/(c + d)$ is preferred to $\frac{a + b}{c + d}$, and $(2\pi)^{-1}$

or $1/(2\pi)$ to $\frac{1}{2\pi}$. Also, $a^{b(c)}$ and $a_{b(c)}$ are preferred

to a^{b^c} and a_{b^c} , respectively. Complicated exponentials should be represented with the symbol exp. A fractional exponent is preferable to a radical sign.

References. References should be typed double-spaced and should follow the style:

Révész, P. (1982). Admissibility of conditional confidence procedures. *Ann. Probab.* **10** 613–622.

In textual material, the format "...Révész (1982)..." should be used. Multiple references can be distinguished as "...Révész (1982a)..." Abbreviations for journals should be taken from a current index issue of *Mathematical Reviews*.

Galley Proofs. The author will ordinarily receive galley proofs. Corrected galley proofs should be sent to: AOP Redactory, Science Typographers, Inc., 15 Industrial Boulevard, Medford, NY 11763.
