

THE ANNALS of PROBABILITY

AN OFFICIAL JOURNAL OF
THE INSTITUTE OF MATHEMATICAL STATISTICS

Special Invited Paper

Sojourns and extremes of stationary processes SIMEON M. BERMAN 1

Articles

- Laplace's method for Gaussian integrals with an application to
statistical mechanics RICHARD S. ELLIS AND JAY S. ROSEN 47
- A stability criterion for attractive nearest neighbor spin systems on \mathbb{Z}
..... LAWRENCE GRAY AND DAVID GRIFFEATH 67
- The oscillation behavior of empirical processes WINFRIED STUTE 86
- Properties of the empirical distribution function for independent non-
identically distributed random vectors MARTIEN C. A. VAN ZUIJLEN 108
- Asymptotic behaviour of symmetric polynomial statistics
..... F. T. MÓRI AND G. J. SZÉKELY 124
- Intersections of traces of random walks with fixed sets I. Z. RUZSA AND G. J. SZÉKELY 132
- The asymptotic distribution of the strength of a series-parallel system
with equal load-sharing RICHARD L. SMITH 137
- Functional limit theorems for extreme values of arrays of independent
random variables RICHARD SERFOZO 172
- Almost sure approximations to the Robbins-Monro and Kiefer-Wolfowitz
processes with dependent noise DAVID RUPPERT 178
- Channel entropy and primitive approximation
..... DAVID L. NEUHOFF AND PAUL C. SHIELDS 188
- Additive amarts G. A. EDGAR 199
- The spectral decomposition of a diffusion hitting time JOHN T. KENT 207
- The proportion of Brownian sojourn outside a moving boundary KŌHEI UCHIYAMA 220

Short Communications

- On the integral of the absolute value of the pinned Wiener process L. A. SHEPP 234
- The integral of the absolute value of the pinned Wiener process - calculation
of its probability density by numerical integration S. O. RICE 240
- A new proof of Spitzer's result on the winding of two dimensional
Brownian motion RICHARD DURRETT 244
- On a conjecture in geometric probability regarding asymptotic normality
of a random simplex A. M. MATHAI 247
- On the convergence of the empiric age distribution for one dimensional
supercritical age dependent branching processes THOMAS KUCZEK 252
- A class of multivariate new better than used distributions
..... ALBERT W. MARSHALL AND MOSHE SHAKED 259
- Closure of phase type distributions under operations arising in reliability
theory DAVID ASSAF AND BENNY LEVIKSON 265
- On the unimodality of high convolutions
..... PATRICK L. BROCKETT AND J. H. B. KEMPERMAN 270

Vol. 10, No. 1—February 1982

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

OFFICERS

President:

Mark Kac, Rockefeller University, New York, New York 10021.

President-Elect:

Patrick Billingsley, Department of Statistics, University of Chicago, Chicago, Illinois 60637

Past-President:

Peter Bickel, Department of Statistics, University of California, Berkeley, California 94720

Executive Secretary:

Kjell Doksum, Department of Statistics, University of California, Berkeley, California 94720

Treasurer:

Heebok Park, Department of Statistics, California State University, Hayward, California 94542
IMS Business Office, 3401 Investment Blvd., Suite 6, Hayward, California 94545

Program Secretary:

Richard Johnson, Department of Statistics, University of Wisconsin, 1210 West Dayton St., Madison, Wisconsin 53706.

Editor: *Annals of Statistics*

David V. Hinkley, Department of Applied Statistics, University of Minnesota, St. Paul Campus, St. Paul, Minnesota 55108

Editor: *Annals of Probability*

Harry Kesten, Department of Mathematics, Cornell University, Ithaca, N.Y. 14853.

Managing Editor:

Jagdish S. Rustagi, Department of Statistics, The Ohio State University, Columbus, Ohio 43210.

Membership. Membership dues including a subscription to one *Annals* and *The Institute of Mathematical Statistics Bulletin* are \$37 per year for all members. Special rates of \$17.00 per year are available to students. The dues are approximately 25% higher for members who wish both *Annals* as well as the *Bulletin*. Inquiries regarding membership in the Institute should be sent to the Treasurer at the business office.

Subscription Rates. Current volumes (four issues per calendar year) of the *Annals of Probability* are \$48.00. Single issues are \$13 each. Current volumes (four issues per calendar year) of the *Annals of Statistics* are \$55.00. Single issues are \$15.00 each. Members of the Institute of Mathematical Statistics pay different rates (see above). Back numbers of both *Annals* and the *Annals of Mathematical Statistics* (Volumes 1 through 43) may be purchased from the Treasurer.

The Annals of Probability, Volume 10, Number 1, February 1982. Published in February, May, August, and November by The Institute of Mathematical Statistics, IMS Business Office, 3401 Investment Blvd., Suite 6, Hayward, California 94545.

Mail to the *Annals of Probability* should be addressed to either the Editor, Managing Editor or the Treasurer, as described above. It should *not* be addressed to Waverly Press.

Printed at the
WAVERLY PRESS, INC., BALTIMORE, MARYLAND 21202 U.S.A.

Second-class postage at Hayward, California and at additional mailing offices

Copyright © 1982 by the Institute of Mathematical Statistics

NOTICE

Beginning with the calendar year 1982, the two journals of The Institute of Mathematical Statistics will be printed quarterly. The total numbers of pages per volume will be approximately the same as before. Months of publication for 1982 are as follows.

Annals of Probability: February, May, August and November

Annals of Statistics: March, June, September and December

EDITORIAL POLICY

The main purpose of the *Annals of Probability* and the *Annals of Statistics* is to publish contributions to the theory of probability and statistics and to their applications. The emphasis is on importance and interest, not formal novelty and correctness. Especially appropriate are authoritative expository papers and surveys of areas in vigorous development. All papers are refereed.

**Announcing . . . A new landmark reference
to be published in 8 volumes over four years!**

**A complete, practical
information source and
guide to statistical methods,
techniques and applications
for virtually every professional
discipline and business**

ENCYCLOPEDIA OF STATISTICAL SCIENCES

Edited by **Samuel Kotz** and **Norman L. Johnson**

Here are practical accounts of all major areas where statistics are employed—along with detailed guidance to common applications—for fields from agriculture to zoology, prepared by nearly 1,000 leading authorities. The *Encyclopedia* also provides detailed coverage of statistical methods including philosophical foundations, theoretical bases and results and computational techniques. Entries are geared to be of practical use to non-specialists as well as practitioners needing information on techniques outside their specialization.

SAVE 15%!

Subscribe to the complete 8-volume set and save 15% off the regular single-volume price! For details and free prospectus, write to Jules Kazimir, John Wiley & Sons, Inc. Dept. 2-1609, 605 Third Avenue, New York, N.Y. 10158

THE ANNALS OF PROBABILITY

INSTRUCTIONS FOR AUTHORS

Submission of Papers. Papers to be submitted for publication should be sent to the Editor of the *Annals of Probability*. (For current address, see the latest issue of the *Annals*.) The original (or xerox copy) should be submitted with two additional copies on paper that will take ink corrections. The manuscript will *not* normally be returned to the author; when expressly requested by the author, one copy of the manuscript will be returned.

Preparation of Manuscripts. Manuscripts should be typewritten, entirely double-spaced, including references, with wide margins at sides, top and bottom. Dittoed or mimeographed papers are acceptable only if completely legible; xerox copies are preferable. When technical reports are submitted, all extraneous sheets and covers should be removed.

Submission of Reference Papers. Copies (preferably two) of unpublished or not easily available papers cited in the manuscript should be submitted with the manuscript.

Title and Abbreviated Title. This title should be descriptive and as concise as is feasible, i.e., it should indicate the topic of the paper as clearly as possible, but every word in it should be pertinent. An abbreviated title to be used as a running head is also required, and should be given below the main title. This should normally not exceed 35 characters. For example, a title might be "A Limit Theorem for Conditioned Recurrent Random Walk Attracted to a Stable Law," with the running head "Limit Theorem for Recurrent Random Walk" or possibly "Recurrent Random Walk Attracted to a Stable Law," depending on the emphasis to be conveyed.

Summary. Each manuscript is required to contain a summary which will be printed immediately after the title, clearly separated from the rest of the paper. Its main purpose is to inform the reader quickly of the nature and results of the paper; it may also be used as an aid in retrieving information. The length of a summary will clearly depend on the length and difficulty of the paper, but in general it should not exceed 150 words. It should be typed on a separate page, under the heading "Summary," followed by the title of the paper. Formulas should be used as sparingly as possible. The summary should not make reference to results or formulas in the body of the paper—it should be self-contained.

Footnotes. Footnotes should be reduced to a minimum and, where possible, should be replaced by remarks in the text or in the references; formulas in footnotes should be avoided. Footnotes in the text should be identified by superscript numbers and typed together, double-spaced on a separate page.

Key Words. Included as the first footnote on page 1 should be the headings:

American Mathematical Society 1980 subject classifications. Primary —; Secondary—. Key words and phrases.

The classification numbers representing the primary and secondary subjects of the article may be found with instructions for its use in the *Mathematical Reviews Annual Subject Index-1980*. The key words and phrases should describe the subject matter of the article; generally they should be taken from the body of the paper.

Identification of Symbols. Manuscripts for publication should be clearly prepared to insure that all symbols are properly identified. Distinguish between "oh" and "zero"; "ell" and "one"; "epsilon" and "element of"; "kappa" and "kay," etc. Indicate also when special type is required (Greek, German, script, boldface, etc.); other letters will be set in italics. Acronyms should be introduced sparingly.

Figures and Tables. Figures, charts, and diagrams should be prepared in a form suitable for photographic reproduction and should be professionally drawn twice the size they are to be printed. (These need not be submitted until the paper has been accepted for publication.) Tables should be typed on separate pages with accompanying footnotes immediately below the table.

Formulas. Fractions in the text are preferably written with the solidus or negative exponent;

thus, $(a + b)/(c + d)$ is preferred to $\frac{a + b}{c + d}$, and

$(2\pi)^{-1}$ or $1/(2\pi)$ to $\frac{1}{2\pi}$. Also, $a^{b(c)}$ and $a_{b(c)}$ are

preferred to a^{b^c} and a_{b^c} , respectively. Complicated exponentials should be represented with the symbol exp. A fractional exponent is preferable to a radical sign.

References. References should be typed double-spaced and should follow the style:

[5] Doob, J. L. (1944). The elementary Gaussian processes. *Ann. Math. Statist.* 15 229–282.

In textual material, the format "... Doob (1944) ..." is normally referred to "... Doob [5] ..." Multiple references can be distinguished as "... Doob (1944a) ..." Abbreviations for journals should be taken from a current index issue of *Mathematical Reviews*.

Proofs. Author will ordinarily receive galley proofs. Corrected galley proofs should be sent to the Managing Editor of the *Annals of Probability*. (For current address, see the latest issue of the *Annals*.)
