

THE ANNALS of PROBABILITY

AN OFFICIAL JOURNAL OF
THE INSTITUTE OF MATHEMATICAL STATISTICS

Articles

On existence and non-existence of proper, regular, conditional distributions	DAVID BLACKWELL AND LESTER E. DUBINS	741
SLLNs and CLTs for infinite particle systems	S. C. PORT, C. J. STONE AND N. A. WEISS	753
A functional law of the iterated logarithm for weighted empirical distributions	BARRY R. JAMES	762
Limit theorems for extreme values of chain-dependent processes	G. E. DENZEL AND G. L. O'BRIEN	773
Limit theorems for a $GI/G/\infty$ queue	NORMAN KAPLAN	780
The first birth problem for an age-dependent branching process	J. F. C. KINGMAN	790
On the rate of convergence in the central limit theorem in two dimensions and its application	M. H. AFGHAHI	802
On errors of normal approximation	R. N. BHATTACHARYA	815
A maximal inequality and dependent strong laws	D. L. MCLEISH	829
Coefficient properties of random variable sequences	WILLIAM J. BARLOW	840
Conditions for finite moments of the number of zero crossings for Gaussian processes	JACK CUZICK	849
Explicit construction of invariant measures for a class of continuous state Markov processes	S. HALFIN	859
Stable measures and seminorms	ALEJANDRO DE ACOSTA	865

Short Communications

Note on a limit theorem	D. A. DARLING	876
A strong law of large numbers for random compact sets	ZVI ARTSTEIN AND RICHARD A. VITALE	879
A conditional local limit theorem for recurrent random walk	W. D. KAIGH	883
Weak comparative probability on infinite sets	PETER C. FISHBURN	889
A simpler expression for K th nearest neighbor coincidence probabilities	RAYMOND J. HUNTINGTON AND JOSEPH I. NAUS	894
Generalisation and application of some results of Ibragimov on convergence to normality	JULIAN LESLIE	897
A nonuniform bound on convergence to normality	C. C. HEYDE	903

Vol. 3, No. 5—October 1975

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

OFFICERS

President:

Donald L. Burkholder, Department of Mathematics, University of Illinois, Urbana, Illinois 61801

President-Elect:

C. Radhakrishna Rao, Indian Statistical Institute, Yojana Bhavan, New Delhi-1, India 38 44 95

Past President:

Frederick Mosteller, Department of Statistics, Science Center, Room 603, Harvard University, One Oxford Street, Cambridge, Massachusetts 02138

Executive Secretary:

George J. Resnikoff, Dept. of Statistics, California State University, Hayward, 25800 Hillary Street, Hayward, California 94542

Treasurer:

Robert M. Elashoff, M.R. IV-Room 111, University of California, San Francisco, California 94143
IMS Business Office, 1367 Laurel Street, San Carlos, California 94070

Program Secretary:

William L. Harkness, Pennsylvania State University, University Park, Pennsylvania 16801

Editor: *Annals of Statistics*

I. R. Savage, Department of Statistics, P.O. Box 2179, Yale Station, New Haven, Connecticut 06520

Editor: *Annals of Probability*

Ronald Pyke, Department of Mathematics, University of Washington, Seattle, Washington 98195

Managing Editor:

Donald R. Truax, Department of Mathematics, University of Oregon, Eugene, Oregon 97403

Membership. Membership dues including a subscription to one *Annals* and *The Institute of Mathematical Statistics Bulletin* are \$18.00 per year for residents of the United States or Canada and \$12.00 per year for residents of other countries. Special rates of \$9.00 per year are available to students. Rates in each category are one-third higher for members who wish both *Annals* as well as the *Bulletin*. Inquiries regarding membership in the Institute should be sent to the Treasurer of the Institute.

Subscription Rates. Current volumes (six issues per calendar year) of the *Annals of Probability* and the *Annals of Statistics* are each \$25.00. Members of the Institute of Mathematical Statistics pay different rates (see above). Single issues are \$5.00. Back numbers of both *Annals* and the *Annals of Mathematical Statistics* (Volumes 1 through 43) may be purchased from the Treasurer.

The Annals of Probability, Volume 3, Number 5, October 1975. Published bimonthly in February, April, June, August, October, and December by The Institute of Mathematical Statistics, IMS Business Office, 1367 Laurel Street, San Carlos, California 94070.

Mail to the *Annals of Probability* should be addressed to either the Editor, Managing Editor or the Treasurer, as described above. It should not be addressed to Waverly Press

PRINTED AT THE
WAVERLY PRESS, INC., BALTIMORE, MARYLAND 21202 U.S.A.

Second-class postage paid at San Francisco, California and at additional mailing offices

INGRAM OLKIN, 1970-1972

EDITORIAL POLICY

The main aim of the *Annals of Probability* and the *Annals of Statistics* is to publish original contributions related to the theory of statistics and probability. The emphasis is on quality, importance and interest; formal novelty and mathematical correctness alone are not sufficient. Particularly appropriate for the *Annals* are important theoretical papers and applied contributions which either stimulate theoretical interest in important new problems or make substantial progress in existing applied areas. Of special interest are authoritative expository or survey articles, whether on theoretical areas of vigorous recent development, or on specific applications. All papers are refereed.

NOTICE

Manuscripts submitted for the *Annals of Probability* should be sent to the Editor at the following address:

Until December 31, 1975

RON PYKE
Department of Mathematics
University of Washington
Seattle, Washington 98195

After January 1, 1976

PATRICK BILLINGSLEY

THE ANNALS OF PROBABILITY

INSTRUCTIONS FOR AUTHORS

Submission of Papers. Papers to be submitted for publication should be sent to the Editor of the *Annals of Probability* (For current address, see the latest issue of the *Annals*.) The original (or xerox copy) should be submitted with two additional copies on paper that will take ink corrections. The manuscript will *not* normally be returned to the author; when expressly requested by the author, one copy of the manuscript will be returned.

Preparation of Manuscripts. Manuscripts should be typewritten, entirely double-spaced, including references, with wide margins at sides, top and bottom. Dittoed or mimeographed papers are acceptable only if completely legible; xerox copies are preferable. When technical reports are submitted, all extraneous sheets and covers should be removed.

Submission of Reference Papers. Copies (preferably two) of unpublished or not easily available papers cited in the manuscript should be submitted with the manuscript.

Title and Abbreviated Title. The title should be descriptive and as concise as is feasible, i.e., it should indicate the topic of the paper as clearly as possible, but every word in it should be pertinent. An abbreviated title to be used as a running head is also required, and should be given below the main title. This should normally not exceed 35 characters. For example, a title might be "A Limit Theorem for Conditioned Recurrent Random Walk Attracted to a Stable Law," with the running head "Limit Theorem for Recurrent Random Walk" or possibly "Recurrent Random Walk Attracted to a Stable Law", depending on the emphasis to be conveyed.

Summary. Each manuscript is required to contain a summary which will be printed immediately after the title, clearly separated from the rest of the paper. Its main purpose is to inform the reader quickly of the nature and results of the paper; it may also be used as an aid in retrieving information. The length of a summary will clearly depend on the length and difficulty of the paper, but in general it should not exceed 150 words. It should be typed on a separate page, under the heading "Summary", followed by the title of the paper. Formulas should be used as sparingly as possible. The summary should not make reference to results or formulas in the body of the paper—it should be self-contained.

Footnotes. Footnotes should be reduced to a minimum and, where possible, should be replaced by remarks in the text or in the references; formulas in footnotes should be avoided. Footnotes in the text should be identified by superscript numbers and typed together, double-spaced on a separate page.

Key Words. Included as the first footnote on page 1 should be the headings:

American Mathematical Society 1970 subject classifications. Primary—; Secondary—.
Key words and phrases.

The classification numbers representing the primary and secondary subjects of the article may be found with instructions for its use, as an Appendix to *Mathematical Reviews* Index to Volume 39, June 1970. (See, also, *The Notices of the American Mathematical Society*, June 1970, pp. 616–618, for more details.) The key words and phrases should describe the subject matter of the article; generally they should be taken from the body of the paper.

List of Symbols. A completely typewritten list of symbols, identified typographically, not mathematically, should be attached to the manuscript on a separate page. Distinguish between "oh" and "zero"; "ell" and "one"; "kappa" and "kay"; etc. Indicate also when special type is required (Greek, German, script, boldface, etc.); other letters will be set in italics.

Figures and Tables. Figures, charts, and diagrams should be prepared in a form suitable for photographic reproduction and should be professionally drawn twice the size they are to be printed. (These need not be submitted until the paper has been accepted for publication.) Tables should be typed on separate pages with accompanying footnotes immediately below the table.

Formulas. Fractions in the text are preferably written with the solidus or negative exponent;

thus, $(a + b)/(c + d)$ is preferred to $\frac{a + b}{c + d}$, and

$(2\pi)^{-1}$ or $1/(2\pi)$ to $\frac{1}{2\pi}$. Also, $a^{b(c)}$ and $a_{b(c)}$ are pre-

ferred to a^{bc} and a_{bc} , respectively. Complicated exponentials should be represented with the symbol exp. A fractional exponent is preferable to a radical sign.

References. References should be typed double-spaced and should follow the style:

[5] Doob, J. L. (1944). The elementary Gaussian processes. *Ann. Math. Statist.* 15 229–282.

In textual material, the format "... Doob (1944) ..." is normally preferred to "... Doob [5] ...". Multiple references can be distinguished as "... Doob (1944a) ...". Abbreviations for journals should be taken from *Mathematical Reviews* Index to Volume 40, 1970, pp. 1683–1702.

Proofs. Author will ordinarily receive galley proofs. Corrected galley proofs should be sent to the Managing Editor of the *Annals of Probability* (For current address, see the latest issue of the *Annals*.)
