

THE ANNALS *of* PROBABILITY

AN OFFICIAL JOURNAL OF
THE INSTITUTE OF MATHEMATICAL STATISTICS

Special Invited Paper

- Subadditive ergodic theory. J. F. C. KINGMAN 883
Discussion on Professor Kingman's paper by D. L. Burkholder, Daryl Daley,
H. Kesten, P. Ney, Frank Spitzer and J. M. Hammersley

Articles

- Another note on the Borel-Cantelli lemma and the strong law with the Poisson
approximation as a by-product. DAVID FREDMAN 910
Self-annihilating branching processes. BRUCE K. ERICKSON 926
The multitype Galton-Watson process with immigration. NORMAN KAPLAN 947
The law of the iterated logarithm for Gaussian processes. HIROSHI OODAIRA 954
Continuity of Gaussian processes and random Fourier series. M. B. MARCUS 968
Limits of ratios of tails of measures. WALTER RUDIN 982
Ergodic behavior for nonnegative kernels
RICHARD W. MADSEN AND PATRICIA S. CONN 995
Limit theorems for reversible Markov processes
MICHAEL L. LEVITAN AND LAWRENCE H. SMOLOWITZ 1014
Local variation of diffusion in local time. FRANK B. KNIGHT 1026
A method for computing the asymptotic limit of a class of expected first passage times
WALTER A. ROSENKRANTZ 1035
Weak convergence of superpositions of randomly selected partial sums
RICHARD F. SERFOZO 1044

Short Communications

- A Tauberian theorem of E. Landau and W. Feller. E. SENETA 1057
A note on martingale square functions. JIA-ARNG CHAO 1059
A weak convergence theorem for Gaussian sequences. CHANDRAKANT M. DEO 1061
The growth of supercritical branching processes with random environments
NIELS KEIDING AND JOHN E. NIELSEN 1065
A bound on tail probabilities for quadratic forms in independent random variables
whose distributions are not necessarily symmetric. F. T. WRIGHT 1068
An estimate for $E(|S_n|)$ for variables in the domain of normal attraction of a stable
law of index α , $1 < \alpha < 2$ WILLIS L. OWEN 1071

Vol 1, No. 6—December 1973

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics

OFFICERS

President:

Lucien LeCam, Department of Statistics, University of California, Berkeley, California 94720.

President-Elect:

R. R. Bahadur, Indian Statistical Institute, 538 Yojana Bhavan, Parliament Street, New Delhi-1, India.

Executive Secretary:

Leo Katz, Statistical Laboratory, Michigan State University, East Lansing, Michigan 48823

Program Secretary:

R. V. Hogg, Department of Statistics, University of Iowa, Iowa City, Iowa 52240

Treasurer:

Robert Elashoff, MR IV- Room 131, University of California, San Francisco, California 94122

Editor: *Annals of Statistics*

Ingram Olkin, Department of Statistics, Stanford University, Stanford, California 94305

Editor: *Annals of Probability*

Ronald Pyke, Department of Mathematics, University of Washington, Seattle, Washington 98195

Managing Editor:

K. J. C. Smith, Department of Statistics, University of North Carolina, Chapel Hill North Carolina 27514

Membership. Membership dues including a subscription to one *Annals* and *The Institute of Mathematical Statistics Bulletin* are \$18.00 per year for residents of the United States or Canada and \$12.00 per year for residents of other countries. Special rates of \$9.00 per year are available to students. Rates in each category are one-third higher for members who wish both *Annals* as well as the *Bulletin*. Inquiries regarding membership in the Institute should be sent to the Treasurer of the Institute.

Subscription Rates. Current volumes (six issues per calendar year) of the *Annals of Probability* and the *Annals of Statistics* are each \$25.00. Members of the Institute of Mathematical Statistics pay different rates (see above). Single issues are \$5.00. Back numbers of both *Annals* and the *Annals of Mathematical Statistics* (Volumes 1 through 43) may be purchased from the Treasurer.

The Annals of Probability, Volume 1, Number 6, December 1973. Published bimonthly in February, April, June, August, October, and December by The Institute of Mathematical Statistics, MR IV-- Room 131, University of California, S. F., San Francisco, California 94122.

Mail to the *Annals of Probability* should be addressed to either the Editor, Managing Editor or the Treasurer, as described above. It should *not* be addressed to Waverly Press

PRINTED AT THE
WAVERLY PRESS, INC., BALTIMORE, MARYLAND 21202 U.S.A.

Second-class postage paid at San Francisco, California and at additional mailing offices

INGRAM OLKIN 1970-1972

Published bimonthly by the Institute of Mathematical Statistics in February,
April, June, August, October and December.

EDITORIAL POLICY

The main aim of the *Annals of Probability* and the *Annals of Statistics* is to publish original contributions related to the theory of statistics and probability. The emphasis is on quality, importance and interest; formal novelty and mathematical correctness alone are not sufficient. Particularly appropriate for the *Annals* are important theoretical papers and applied contributions which either stimulate theoretical interest in important new problems or make substantial progress in existing applied areas. Of special interest are authoritative expository or survey articles, whether on theoretical areas of vigorous recent development, or on specific applications. All papers are refereed.

THE ANNALS OF STATISTICS

VOLUME 2

JANUARY 1974

No. 1

SPECIAL INVITED PAPER

Edgeworth expansions in nonparametric statistics P. J. BICKEL

Articles

Improving on equivariant estimators . . . J. F. BREWSTER AND J. V. ZIDEK
Probability inequalities for the sum in sampling without replacement

R. J. SERFLING

The invariance principle for one-sample rank-order statistics

PRANAB KUMAR SEN

Asymptotically efficient adaptive rank estimates in location models

RUDOLF BERAN

Asymptotic sufficiency of the vector of ranks in the Bahadur sense

JAROSLAV HÁJEK

Multivariate distributions with exponential minimums

JAMES D. ESARY AND ALBERT W. MARSHALL

Estimation of models of autoregressive signal plus white noise

MARCELLO PAGANO

Asymptotic expansions of the non-null distributions of likelihood ratio
criteria for covariance matrices

C. G. KHATRI AND M. C. SRIVASTAVA

Rate of convergence in the sequence-compound squared-distance loss
estimation problem for a family of m -variate normal distributions

V. SUSARLA

Control charts based on weighted sums TZE LEUNG LAI

Resistant and susceptible BIB designs

A. HEDAYAT AND P. W. M. JOHN

On maximal rewards and ϵ -optimal policies in continuous time Markov
decision chains MARK R. LEMBERSKY

Short Communications

Note on Anderson's sequential procedures with triangular boundary

VÁCLAV FABIAN

Robustness of the Wilcoxon test to a certain dependency between samples

MYLES HOLLANDER, GORDON PLEDGER AND PI-ERH LIN

The intersection of random spheres and the noncentral radial error dis-
tribution for spherical models ANDRE G. LAURENT

Minimax estimation of powers of the variance of a normal population
under squared error loss WILLIAM E. STRAWDERMAN

On symmetric compound decision rules for dichotomies J. B. COPAS

Hyperadmissibility in survey sampling

JAN LANKE AND M. K. RAMAKRISHNAN

A convergence theorem in the theory of D -optimum experimental designs

A. PÁZMAN

On stationary policies—The general case MICHAEL ORKIN

Note

Correction to "Minimax tests and the Neyman-Pearson lemma for capac-
ities" PETER J. HUBER AND VOLKER STRASSEN
