

THE ANNALS *of* PROBABILITY

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

Articles

Unbiased shifts of Brownian motion GÜNTER LAST, PETER MÖRTERS AND HERMANN THORISSON	431
Asymptotics of cover times via Gaussian free fields: Bounded-degree graphs and general trees..... JIAN DING	464
Asymptotic independence of multiple Wiener–Itô integrals and the resulting limit laws IVAN NOURDIN AND JAN ROSIŃSKI	497
Localization on 4 sites for vertex-reinforced random walks on \mathbb{Z} ANNE-LAURE BASDEVANT, BRUNO SCHAPIRA AND ARVIND SINGH	527
Characterization of positively correlated squared Gaussian processes NATHALIE EISENBAUM	559
Quenched asymptotics for Brownian motion in generalized Gaussian potential..... XIA CHEN	576
Necessary and sufficient conditions for the asymptotic distributions of coherence of ultra-high dimensional random matrices..... QI-MAN SHAO AND WEN-XIN ZHOU	623
Nonconventional limit theorems in discrete and continuous time via martingales YURI KIFER AND S. R. S. VARADHAN	649
Levy multiplicative chaos and star scale invariant random measures RÉMI RHODES, JULIEN SOHIER AND VINCENT VARGAS	689
Random stable laminations of the disk..... IGOR KORTCHEMSKI	725
On martingale approximations and the quenched weak invariance principle CHRISTOPHE CUNY AND FLORENCE MERLEVÈDE	760
Komlós–Major–Tusnády approximation under dependence ISTVÁN BERKES, WEIDONG LIU AND WEI BIAO WU	794
Random attractors for stochastic porous media equations perturbed by space–time linear multiplicative noise..... BENJAMIN GESS	818
