INSTITUTE OF MATHEMATICAL STATISTICS*

Multivariate Set Estimation

- | | | |
|--|------------------------------------|------|
| Granulometric smoothing | GUENTHER WALTHER | 2273 |
| A plug-in approach to support estimation | ANTONIO CUEVAS AND RICARDO FRAIMAN | 2300 |

Experimental Design

- | | | |
|--|--|------|
| Lattice-based D -optimum design for Fourier regression | EVA RICCOMAGNO, RAINER SCHWABE AND HENRY P. WYNN | 2313 |
| Optimal repeated measurements designs: The linear optimality equations | H. B. KUSHNER | 2328 |

Testing

- | | | |
|---|---|------|
| An unbiased test for the bioequivalence problem | LAWRENCE D. BROWN, J. T. GENE HWANG AND AXEL MUNK | 2345 |
| Weights of $\bar{\chi}^2$ distribution for smooth or piecewise smooth cone alternatives | AKIMICHI TAKEMURA AND SATOSHI KURIKI | 2368 |
| Transformed empirical processes and modified Kolmogorov-Smirnov tests
for multivariate distributions | A. CABANÀ AND E. M. CABANÀ | 2388 |

Computational Methodology

- | | | |
|---|---|------|
| The properties of the cross-match estimate and split sampling | AUGUSTINE KONG, JUN S. LIU AND WING HUNG WONG | 2410 |
| Multiple-comparison procedures for steady-state simulations | MARVIN K. NAKAYAMA | 2433 |

Information and Entropy

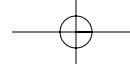

- | | | |
|---|--|------|
| Mutual information, metric entropy and cumulative relative entropy risk | DAVID HAUSSLER AND MANFRED OPPER | 2451 |
| Rates of convergence of estimates, Kolmogorov's entropy and the
dimensionality reduction principle in regression | THEODOROS NICOLERIS AND YANNIS G. YATRACOS | 2493 |

Nonparametric Function Estimation

- | | | |
|--|---------------------------------|------|
| Optimal pointwise adaptive methods in nonparametric estimation | O. V. LEPSKI AND V. G. SPOKOINY | 2512 |
| On nonparametric confidence intervals | MARK G. LOW | 2547 |
| On methods of sieves and penalization | XIAOTONG SHEN | 2555 |
| Piecewise convex function estimation: Pilot estimators | KURT S. RIEDEL | 2592 |
