

THE ANNALS of STATISTICS

AN OFFICIAL JOURNAL OF
THE INSTITUTE OF MATHEMATICAL STATISTICS

Articles

Robust location estimates.....	RUDOLF BERAN	431
Minimum Hellinger distance estimates for parametric models.....	RUDOLF BERAN	445
Asymptotic relations of M -estimates and R -estimates in linear regression model	JANA JUREČKOVÁ	464
A Glivenko-Cantelli theorem and strong laws of large numbers for functions of order statistics.....	JON A. WELLNER	473
A law of the iterated logarithm for functions of order statistics.....	JON A. WELLNER	481
Association and probability inequalities.....	KUMAR JOGDEO	495
A concept of positive dependence for exchangeable random variables	MOSHE SHAKED	505

Short Communications

Improved rates in the empirical Bayes monotone multiple decision problem with MLR family.....	DENNIS C. GILLILAND AND JAMES HANNAN	516
Asymptotic efficiency of minimum variance unbiased estimators	STEPHEN PORTNOY	522
Mean integrated square error properties of density estimates	KATHRYN BULLOCK DAVIS	530
The strong uniform consistency of nearest neighbor density estimates	LUC P. DEVROYE AND T. J. WAGNER	536
An estimator for the spectral density of a stationary time sequence	A. C. BUTCHER	541
A paradox in admissibility.....	SHERALI MAVJIBHAI MAKANI	544
On the completeness of minimal sufficient statistics with censored observations	G. K. BHATTACHARYYA, RICHARD A. JOHNSON AND K. G. MEHROTRA	547
Asymptotic behavior of least-squares estimates for autoregressive processes with infinite variances.....	VICTOR J. YOHAI AND RICARDO A. MARONNA	554
On the existence and construction of a complete set of orthogonal $F(4t; 2t, 2t)$ -squares design.....	WALTER T. FEDERER	561
A note on orthogonal partitions and some well-known structures in design of experiments.....	DENNIS C. GILLILAND	565
On the exponential boundedness of stopping times of invariant SPRT'S	HOLGER ROOTZÉN AND GORDON SIMONS	571
A note on independence of multivariate lifetimes in competing risks models	DOUGLAS R. MILLER	576
A characteristic property of the exponential distribution.....	M. AHSANULLAH	580

Book Review

Review of <i>Characterization Problems in Mathematical Statistics</i> (translated from the Russian by B. Ramachandran) by A. M. Kagan, Yu. V. Linnik and C. Radhakrishna Rao.....	P. DIACONIS, I. OLKIN AND S. G. GHURYE	583
---	--	-----

Note

Correction to "Comparison of some bounds in estimation theory"	P. K. SEN AND B. K. GHOSH	593
--	---------------------------	-----

Vol. 5, No. 3—May 1977

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

OFFICERS

President:

C. R. Rao, Indian Statistical Institute, 7, S.J.S. Sansanwal Marg, New Delhi 110001, India

President-Elect:

Elizabeth Scott, Department of Statistics, University of California, Berkeley, California 94720

Past President:

Donald L. Burkholder, Department of Mathematics, University of Illinois, Urbana, Illinois 61801

Executive Secretary:

George J. Resnikoff, Department of Statistics, California State University, 25800 Hillary St., Hayward, California 94542

Treasurer:

Robert M. Elashoff, IMS Business Office, 3401 Investment Blvd., Suite 6, Hayward, California 94545

Program Secretary:

William L. Harkness, Pennsylvania State University, University Park, Pennsylvania 16801

Editor: *Annals of Statistics*

Rupert G. Miller, Jr., Department of Statistics, Stanford University, Stanford, California 94305

Editor: *Annals of Probability*

Patrick Billingsley, Department of Statistics, University of Chicago, Chicago, Illinois 60637

Managing Editor:

Donald R. Truax, Department of Mathematics, University of Oregon, Eugene, Oregon 97403

Membership. Membership dues including a subscription to one *Annals* and *The Institute of Mathematical Statistics Bulletin* are \$24.00 per year for residents of the United States or Canada and \$16.00 per year for residents of other countries. Special rates of \$12.00 per year are available to students. Rates in each category are one-third higher for members who wish both *Annals* as well as the *Bulletin*. Inquiries regarding membership in the Institute should be sent to the Treasurer at the Business Office.

Subscription Rates. Current volumes (six issues per calendar year) of the *Annals of Probability* and the *Annals of Statistics* are each \$30.00. Members of the Institute of Mathematical Statistics pay different rates (see above). Single issues are \$7.00. Back numbers of both *Annals* and the *Annals of Mathematical Statistics* (Volume 1 through 43) may be purchased from the Treasurer.

The Annals of Statistics, Volume 5, Number 3, May 1977. Published bimonthly in January, March, May, July, September, and November by The Institute of Mathematical Statistics, IMS Business Office, 3401 Investment Blvd., Suite 6, Hayward, California 94545.

Mail to the *Annals of Statistics* should be addressed to either the Editor, Managing Editor or the Treasurer, as described above. It should *not* be addressed to Waverly Press.

ANNALS OF PROBABILITY

RONALD PYKE 1972-1975

EDITORIAL POLICY

The main purpose of the *Annals of Statistics* and the *Annals of Probability* is to publish contributions to the theory of statistics and probability and to their applications. The emphasis is on importance and interest, not formal novelty and correctness. Especially appropriate are authoritative expository papers and surveys of areas in vigorous development. All papers are refereed.

NOTICE

Manuscripts submitted to the *Annals of Statistics* should now be sent to the Editor at this address:

THE ANNALS OF STATISTICS

INSTRUCTIONS FOR AUTHORS

Submission of Papers. Papers to be submitted for publication should be sent to the Editor of the *Annals of Statistics*. (For current address, see the latest issue of the *Annals*.) The original (or xerox copy) should be submitted with three additional copies on paper that will take ink corrections. The manuscript will *not* normally be returned to the author; when expressly requested by the author, one copy of the manuscript will be returned.

Preparation of Manuscripts. Manuscripts should be typewritten, entirely double-spaced, including references, with wide margins at sides, top and bottom. Dittoed or mimeographed papers are acceptable only if completely legible; xerox copies are preferable. When technical reports are submitted, all extraneous sheets and covers should be removed.

Submission of Reference Papers. Copies (preferably two) of unpublished or not easily available papers cited in the manuscript should be submitted with the manuscript.

Title and Abbreviated Title. The title should be descriptive and as concise as is feasible, i.e., it should indicate the topic of the paper as clearly as possible, but every word in it should be pertinent. An abbreviated title to be used as a running head is also required, and should be given below the main title. This should normally not exceed 35 characters. For example, a title might be "A Limit Theorem for Conditioned Recurrent Random Walk Attracted to a Stable Law," with the running head "Limit Theorem for Recurrent Random Walk" or possibly "Recurrent Random Walk Attracted to a Stable Law," depending on the emphasis to be conveyed.

Summary. Each manuscript is required to contain a summary, which will be printed immediately after the title, clearly separated from the rest of the paper. Its main purpose is to inform the reader quickly of the nature and results of the paper; it may also be used as an aid in retrieving information. The length of a summary will clearly depend on the length and difficulty of the paper, but in general it should not exceed 150 words. It should be typed on a separate page, under the heading "Summary," followed by the title of the paper. Formulas should be used as sparingly as possible. The summary should not make reference to results or formulas in the body of the paper—it should be self-contained.

Footnotes. Footnotes should be reduced to a minimum and, where possible, should be replaced by remarks in the text or in the references; formulas in footnotes should be avoided. Footnotes in the text should be identified by superscript numbers and typed together, double-spaced, on a separate page.

Key Words. Included as the first footnote on page 1 should be the headings:

American Mathematical Society 1970 subject classifications. Primary—; Secondary—.
Key words and phrases.

The classification numbers representing the primary and secondary subjects of the article may be found with instructions for its use, as an Appendix to *Mathematical Reviews* Index to Volume 39, June 1970. (See, also, *The Notices of the American Mathematical Society*, June 1970, *Bulletin of the Institute of Mathematical Statistics*, September 1974; or a current index issue of *Mathematical Reviews*.) The key words and phrases should describe the subject matter of the article; generally they should be taken from the body of the paper.

Identification of Symbols. Manuscripts for publication should be clearly prepared to insure that all symbols are properly identified. Distinguish between "oh" and "zero"; "ell" and "one"; "kappa" and "kay," etc. Indicate also when special type is required (Greek, German, script, boldface, etc.); other letters will be set in italics. Acronyms should be introduced sparingly.

Figures and Tables. Figures, charts, and diagrams should be prepared in a form suitable for photographic reproduction and should be professionally drawn twice the size they are to be printed. (These need not be submitted until the paper has been accepted for publication.) Tables should be typed on separate pages with accompanying footnotes immediately below the table.

Formulas. Fractions in the text are preferably written with the solidus or negative exponent; thus, $(a + b)/(c + d)$ is preferred to $\frac{a + b}{c + d}$, and

$(2\pi)^{-1}$ or $1/(2\pi)$ to $\frac{1}{2\pi}$. Also, $a^{b(c)}$ and $a_{b(c)}$ are preferred to a^{bc} and a_{bc} , respectively. Complicated exponentials should be represented with the symbol exp. A fractional exponent is preferable to a radical sign.

References. References should be typed double-spaced and should follow the style:

[5] Wilks, S. S. (1938). The large-sample distribution of the likelihood ratio for testing composite hypotheses. *Ann. Statist.* 1 60-62.

In textual material, the format "... Wilks (1938) ..." is normally preferred to "... Wilks [5] ..." Multiple references can be distinguished as "... Wilks (1938a) ..." Abbreviations for journals should be taken from a current index issue of *Mathematical Reviews*.

Proofs. Author will ordinarily receive galley proofs. Corrected galley proofs should be sent to the Managing Editor of the *Annals of Statistics*. (For current address, see the latest issue of the *Annals*.)
