## **Directions in Time Series**

This book is a published report of the Special Topics Meeting on Time Series Analysis, sponsored by the Institute of Mathematical Statistics, May 1-3, 1978 at Iowa State University, Ames, Iowa. The purpose was to survey the state of the art on the theory and application of time series. The timeliness of the subject matter of the conference is illustrated first by its choice for a special topics meeting and further by the large and enthusiastic group that attended the meeting. It is anticipated that the publication of these proceedings containing, as it does, papers surveying the principal areas of time series analysis today, will excite the interest of the many practitioners and researchers in time series who were unable to attend the meetings themselves.

The keynote address was delivered by J.W. Tukey, "Can we predict where time series analysis should go next?". Some of the papers presented were: Time Series Models, Computer Packages and Graphics, Econometric Models, Special Topics, Control Theory and Engineering, Robust Methods for Time Series, Continuous Processes and Periodic Models.

# CURRENT INDEX TO STATISTICS: APPLICATIONS, METHODS AND THEORY

*An annual computerized index to the statistical literature*

**Coverage**—Over 7,000 articles in “core” and “related” journals are indexed. Author index and index by key words. Example of subject index (complete reference to journal, volume, pages, etc., is given):

*Important word*

Asymptotic Properties of Non-linear Least Squares Estimators • R. I. Jennrich  
Interval Estimation of Non-linear Parametric Functions • Halpern, Mantel  
Interval Estimation of Non-linear Parametric Functions, II • M. Halpern  
On a Problem in Non-linear Prediction Theory • J. B. Robertson  
Convergence in Non-linear Regression • T. Tornheim  
Non-linear Regression with Minimal Assumptions • H. M. Wagner  
Non-linear  
Discrimination Among Mechanistic Models • G.E.P. Box  
New Analysis of Variance Model for Nonadditive Data • J. Mandel  
Simplified Experimental Design • M. J. Box

*Key word*

**Who should subscribe**—All individuals who spend any significant fraction of their time doing statistics. Anyone who spends more than *one hour per year* looking for an article on a particular topic in statistics or redeveloping some technique that already exists in the literature will find it cost effective to have a personal copy of this index.

**Editor**—Brian L. Joiner, University of Wisconsin. **Assistant Editor**—Jessie M. Gwynne

**Management Committee**—Donald A. Gardiner, Chairman; Heebok Park, Seymour Geisser, David Hoaglin, David L. Wallace
