

THE ANNALS of STATISTICS

ISSN (0090-5364)

AN OFFICIAL JOURNAL OF
THE INSTITUTE OF MATHEMATICAL STATISTICS

Special Invited Paper

- Bayesianly justifiable and relevant frequency calculations for the applied
statistician DONALD B. RUBIN 1151

Articles

- Admissibility, difference equations and recurrence in estimating a Poisson
mean IAIN JOHNSTONE 1173
Average width optimality of simultaneous confidence bounds DANIEL Q. NAIMAN 1199
Bandwidth choice for nonparametric regression JOHN RICE 1215
The consistency of automatic kernel density estimates
LUC DEVROYE AND CLARK S. PENROD 1231
Distribution-free lower bounds in density estimation
LUC DEVROYE AND CLARK S. PENROD 1250
On a class of nonparametric density and regression estimators V. K. KLONIAS 1263
An asymptotically optimal window selection rule for kernel density
estimates CHARLES J. STONE 1285
Asymptotic behavior of M -estimators of p regression parameters when p^2/n is
large I. Consistency STEPHEN PORTNOY 1298
On the stability of Bayes estimators for Gaussian processes IAN W. MCKEAGUE 1310
Some model robust designs in regression JEROME SACKS AND DONALD YLVIKAKER 1324
Robust regression based on infinitesimal neighbourhoods P. J. BICKEL 1349
Asymptotic normality for a general class of statistical functions and applications
to measures of spread PAUL JANSSEN, ROBERT SERFLING
AND NOËL VERAVERBEKE 1369
Asymptotic efficiency of estimators of functionals of mixed distributions
LUKE TIERNEY AND DIANE LAMBERT 1380
Asymptotic properties of maximum likelihood estimates in the mixed Poisson
model DIANE LAMBERT AND LUKE TIERNEY 1388
Bootstrap and cross-validation estimates of the prediction error for linear
regression models OLAF BUNKE AND BERND DROGE 1400
Order selection in nonstationary autoregressive models RUEY S. TSAY 1425
Estimation of a noisy discrete-time step function: Bayes and empirical Bayes
approaches YI-CHING YAO 1434
All admissible linear estimators of the mean of a Gaussian distribution on a Hilbert
space AVI MANDELBAUM 1448
Tail estimates motivated by extreme value theory
RICHARD DAVIS AND SIDNEY RESNICK 1467
On analysis of variance in the mixed model K. G. BROWN 1488
Generating the intrablock and interblock subgroups for confounding in general
factorial experiments BRUCE JAY COLLINGS 1500

Short Communications

- A large deviation result for the likelihood ratio statistic in exponential
families STAVROS KOUROUKLIS 1510
Bahadur optimality of sequential experiments for exponential
families STAVROS KOUROUKLIS 1522
On Karlin's conjecture for random replacement sampling plans
O. KRAFFT, AND M. SCHAEFER 1528
The nature of simple random sampling S. K. MITRA AND P. K. PATHAK 1536
Estimating an endpoint of a distribution with resampling methods WEI-YIN LOH 1543
Turning probabilities into expectations MICHAEL GOLDSTEIN 1551
Detection of multivariate outliers in elliptically symmetric distributions
BIMAL KUMAR SINHA 1558
On nonnegative quadratic unbiased estimability of variance components
THOMAS MATHEW 1566

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

OFFICERS

President:

Oscar Kempthorne, Department of Statistics, 111B Snedecor Hall, Iowa State University, Ames, Iowa 50011

President-Elect:

Paul Meier, Department of Statistics, University of Chicago, 5734 University Avenue, Chicago, Illinois 60637

Past President:

Ingram Olkin, Department of Statistics, Sequoia Hall, Stanford University, Stanford, California 94305

Executive Secretary:

Francisco J. Samaniego, Division of Statistics, 469 Kerr Hall, University of California, Davis, California 95616

Treasurer:

Bruce E. Trumbo, Department of Statistics, California State University, Hayward, California 94542. *Send correspondence to:* IMS Business Office, 3401 Investment Blvd., Suite 6, Hayward, California 94545

Program Secretary:

Richard A. Johnson, Department of Statistics, University of Wisconsin, 1210 West Dayton St., Madison, Wisconsin 53706

Editor: *The Annals of Statistics*

Michael D. Perlman, Department of Statistics GN-22, University of Washington, Seattle, Washington 98195

Editor: *The Annals of Probability*

Harry Kesten, Department of Mathematics, Cornell University, Ithaca, New York 14853

Executive Editor: *Statistical Science*

Morris H. DeGroot, Department of Statistics, Carnegie-Mellon University, Pittsburgh, Pennsylvania 15213

Editor: *The IMS Bulletin*

William C. Guenther, Department of Statistics, University of Wyoming, Laramie, Wyoming 82071. *Send correspondence to:* Box 3332 University Station, Laramie, Wyoming 82071.

Editor: *IMS Lecture Notes-Monograph Series*

Shanti S. Gupta, Department of Statistics, Purdue University, West Lafayette, Indiana 47907

Managing Editor:

Prem K. Goel, Department of Statistics, 1958 Neil Avenue, The Ohio State University, Columbus, Ohio 43210

Official Journals. The official journals of the Institute are *The Annals of Statistics*, *The Annals of Probability*, and *The Institute of Mathematical Statistics Bulletin*.

Individual and Institutional Memberships. All individual members receive the *Bulletin*. Annual dues for individual membership depend upon the journals selected (\$52 for both *Annals*/ \$40 for one *Annals*). Dues allocations to each journal are set by Council resolution for regular members at \$6 for *The IMS Bulletin* and \$34 for one *Annals* or \$23 for each *Annals*. Subject to some restrictions, memberships are available at reduced rates for students (\$21/\$17), residents of developing countries (\$35/\$28), and retired members (\$11/\$6/\$1 for the *Bulletin* only). *Institutional memberships* are available at \$215 per year and include two copies for multiple readership of all three journals.

Individual and General Subscriptions. Subscriptions are available on a calendar year basis. *Individual subscriptions* are for the personal use of the subscriber and must be in the name of, paid directly by, and mailed to an individual. Individual subscriptions for 1985 are available to *The Annals of Statistics* (\$45), *The Annals of Probability* (\$45), and *The IMS Bulletin* (\$11).

General subscriptions are for libraries, institutions, and any multiple-readership use. General subscriptions for 1985 are available to *The Annals of Statistics* (\$75), *The Annals of Probability* (\$70), both *Annals* (\$140), and *The IMS Bulletin* (\$20). Air mail rates for overseas delivery of general subscriptions are \$40 per subscription.

Correspondence. Mail to IMS should be sent to the Business Office (membership, subscriptions, claims, copyright permissions, advertising, back issues), the Editor of the appropriate journal (submissions, editorial content), or the Managing Editor (production), and *not* to Waverly Press.

The Annals of Statistics, (ISSN 0090-5364), Volume 12, Number 4, December, 1984. Published in March, June, September and December by the Institute of Mathematical Statistics, 3401 Investment Blvd, #6, Hayward, California 94545. Printed at the Waverly Press, Inc., Baltimore, Maryland 21202. Second-class postage paid at Hayward, California and at additional mailing offices. **Postmaster.** Send address changes to *The Annals of Statistics*, Institute of Mathematical Statistics, 3401 Investment Blvd, #6, Hayward, California 94545.

EDITORIAL POLICY

The main purpose of *The Annals of Statistics* and *The Annals of Probability* is to publish significant contributions to the theory of statistics and probability and their applications. The emphasis is on importance and interest; formal novelty and mathematical correctness alone are not sufficient for publication. Especially appropriate are authoritative expository papers and surveys of areas in vigorous development. Because statistics is an evolving discipline, the Editors of the *Annals of Statistics* take a broad view of its domain and welcome papers in interface areas. Contributors to the *Annals of Statistics* should review the editorial in the January 1980 issue. All papers are refereed.

THE ANNALS OF STATISTICS

INSTRUCTIONS FOR AUTHORS

Submission of Papers. Papers to be submitted for publication should be sent to the Editor of the *Annals of Statistics*. (For current address, see the latest issue of the *Annals*.) Four copies should be submitted on paper that will take ink corrections. The manuscript will *not* normally be returned to the author; when expressly requested by the author, one copy of the manuscript will be returned.

Preparation of Manuscripts. Manuscripts should be typewritten, entirely double-spaced, including references, with wide margins at sides, top and bottom. All copies must be completely legible. When technical reports are submitted, all extraneous sheets and covers must be removed. Typists should check an issue of the *Annals* for style.

Submission of Reference Papers. Four copies of unpublished or not easily available papers cited in the manuscript should be submitted with the manuscript.

Title. The title should be descriptive and as concise as is feasible, i.e., it should indicate the topic of the paper as clearly as possible, but every word in it should be pertinent.

Abbreviated Title. An abbreviated title to be used as a running head is also required. This should normally not exceed 35 characters. For example, an article with the title "The Curvature of a Statistical Model, with Applications to Large-Sample Likelihood Methods," could have the running head "Curvature of Statistical Model" or possibly "Asymptotics of Likelihood Methods," depending on the emphasis to be conveyed.

Affiliation. Indicate your present institutional affiliation as you would like it to appear.

Summary. Each manuscript is required to contain a summary, clearly separated from the rest of the paper, which will be printed immediately after the title. Its main purpose is to inform the reader quickly of the nature and results of the paper; it may also be used as an aid in retrieving information. The length of a summary will clearly depend on the length and difficulty of the paper, but in general it should not exceed 150 words. Formulas should be used as sparingly as possible within the summary. The summary should not make reference to results or formulas in the body of the paper—it should be self-contained.

Footnotes. Footnotes should not be used, except as described under Title Page Footnotes below. Such information should be included within the text.

Title Page Footnotes. Included as a footnote on page 1 should be the headings:

American Mathematical Society 1980 subject classifications. Primary—; Secondary—.
Key words and phrases.

The classification numbers representing the pri-

mary and secondary subjects of the article may be found with instructions for its use in the *Mathematical Reviews Annual Subject Index-1980*. The key words and phrases should describe the subject matter of the article; generally they should be taken from the body of the paper.

Acknowledgment of support. Grants and contracts should also be included in this footnote.

Identification of Symbols. Manuscripts for publication should be clearly prepared to insure that all symbols are properly identified. Distinguish between "oh" and "zero"; "ell" and "one"; "epsilon" and "element of"; "summation" and "capital sigma," etc. Indicate also when special type is required (Greek, German, script, boldface, etc.); unless indicated otherwise, formula letters will be set in italics. Acronyms should be introduced sparingly. Any handwritten symbols should be clearly identified.

Figures and Tables. Figures, charts, and diagrams should be prepared in a form suitable for photographic reproduction and should be professionally drawn twice the size they are to be printed. (These need not be submitted until the paper has been accepted for publication.) The printer does not improve upon the quality of the figures submitted. Tables should be typed on separate pages with accompanying footnotes immediately below the table.

Formulas. Fractions *in the text* are preferably written with the solidus or negative exponent; thus,

$(a + b)/(c + d)$ is preferred to $\frac{a + b}{c + d}$, and $(2\pi)^{-1}$ or

$1/(2\pi)$ to $\frac{1}{2\pi}$. Also, $a^{b(c)}$ and $a_{b(c)}$ are preferred to a^{b^c}

and a_{b_c} , respectively. Complicated exponentials should be represented with the symbol exp. A fractional exponent is preferable to a radical sign.

References. References should be typed double-spaced and should follow the style:

Kiefer, J. C. (1976). Admissibility of conditional confidence procedures. *Ann. Statist.* 4 836–865.

In textual material, the format "... Kiefer (1976) ..." should be used. Multiple references can be distinguished as "... Kiefer (1976a) ...". Abbreviations for journals should be taken from a current index issue of *Mathematical Reviews*.

Addresses. The permanent address of each author should be typed following the references.

Galley Proofs. The author will ordinarily receive galley proofs. Corrected galley proofs should be sent to the Managing Editor of the *Annals of Statistics*. (For current address, see the latest issue of the *Annals*.)
