Morris L. Eaton
University of Minnesota

Sponsored by the
Conference Board of the Mathematical Sciences
Supported by the
National Science Foundation
Published by the
Institute of Mathematical Statistics
and the
American Statistical Association

These lecture notes result from the CBMS/NSF Regional Conference held at the University of Michigan in June 1987. Topics in invariance with applications in statistics are discussed in nine chapters—including integrals and the Haar measure, group actions and relatively invariant integrals, invariant statistical methods, models invariant under compact groups, decomposable measures, invariant decision problems, random orthogonal matrices, finite deFinetti style theorems, and finite deFinetti style theorems for linear models.

The Institute of Mathematical Statistics and the American Statistical Association are proud to announce the publication of this new *Series*. The volumes in this *Series* are based on the CBMS/NSF regional research conferences and join SIAM's *CBMS Series in Applied Mathematics* and AMS's *CBMS Series in Mathematics*. Volume 1 will be available late in 1989 with one volume expected per year thereafter.

List Price \$25
IMS/ASA/CBMS Member Price \$15

Institutional standing orders to this *Series* provide for advance notification of publication dates for each volume and access to *prepublication discounts* of 20%. Members of IMS, ASA, and CBMS societies receive a 40% discount. Prepaid orders for individual volumes and requests for standing order enrollment should be sent to:

**Institute of Mathematical Statistics
3401 Investment Boulevard, Suite 7
Hayward, California 94545 (USA)**

CALL FOR PAPERS

THE ANNALS OF APPLIED PROBABILITY

Volume 1, Number 1, February 1991

The Institute of Mathematical Statistics will publish the first issue of its new journal, *The Annals of Applied Probability*, in February 1991.

In addition to welcoming papers in all the traditional areas of applied probability, the new *Annals* particularly hopes to attract work that develops and deepens the interplay of probability and other fields, including computer science, finance, network modeling, and biology.

Submissions are now being considered for publication and should be directed to:

J. Michael Steele, *Editor*
School of Engineering and Applied Science
E-220 Engineering Quadrangle
Princeton University
Princeton, NJ 08544 (USA)

Four copies should be submitted and authors are requested to follow the instructions which appear at the front of each issue of *The Annals of Probability* or *The Annals of Statistics*.

Articles

- Sample boundedness of stochastic processes under increment conditions
MICHEL TALAGRAND
- Diffusion in a singular random environment W. DAVID WICK
- Continuity of l^2 -valued Ornstein–Uhlenbeck processes
I. ISCOE, M. B. MARCUS, D. McDONALD, M. TALAGRAND AND J. ZINN
- Characterization of almost surely continuous 1-stable random Fourier series
and strongly stationary processes MICHEL TALAGRAND
- On extremal theory for stationary processes J. M. P. ALBIN
- A note on the approximation of the uniform empirical processes PETER MAJOR
- Loi fonctionnelle du logarithme itéré pour les processus de Markov récurrents
ABDERRAHMEN TOUATI
- Functional laws of the iterated logarithm for the product-limit estimator
of a distribution function under random censorship or truncation
MING GAO GU AND TZE LEUNG LAI
- Time-average control of martingale problems: Existence of a stationary solution
RICHARD H. STOCKBRIDGE
- Time-average control of martingale problems: A linear programming formulation
RICHARD H. STOCKBRIDGE
- Randomization in the two-armed bandit problem ROBERT C. DALANG
- A viscosity solution approach to the asymptotic analysis of queueing systems
PAUL DUPUIS, HITOSHI ISHII AND H. METÉ SONER
- Nearest neighbor analysis of a family of fractal distributions
COLLEEN D. CUTLER AND DONALD A. DAWSON
- Conditioned limit theorems of stopped critical branching Bessel processes
TZONG-YOW LEE
- Limit theorems for age-structured populations KARL OELSCHLÄGER
- Random tree-type partitions as a model for acyclic polymerization:
Holtmark ($3/2$ -stable) distribution of the supercritical gel
B. PITTEL, W. A. WOYCZYNSKI AND J. A. MANN
- Markov properties for point processes on the plane . ELY MERZBACH AND DAVID NUALART
- Positive dependence properties of point processes
ROBERT M. BURTON, JR. AND MARIE M. FRANZOSA
- An asymptotic expression for the probability of ruin within finite time . THOMAS HÖGLUND
- An Edgeworth expansion for U -statistics based on samples from finite populations
P. N. KOKIC AND N. C. WEBER
- On series representations of infinitely divisible random vectors JAN ROSINSKI

Book Review

- Two books on the Malliavin calculus: *The Malliavin Calculus* by Denis Bell and
Stochastic Differential Equations and Malliavin Calculus by S. Watanabe
DANIEL L. OCONE

Correction

- Recurrence, transience and bounded harmonic functions for diffusions in the plane
R. PINSKY

contents (continued)

Correction

Graphical models for associations between variables, some of which
are qualitative and some quantitative S. L. LAURITZEN AND N. WERMUTH 1916

Acknowledgment of Priority

A counterexample to a correlation inequality in finite sampling
KENNETH S. ALEXANDER 1917
