

Was This The Last Time You Bought Insurance?

Face it — it's been a long time. A lot has changed since then. Your family. Maybe your job. And more than likely, the amount of insurance coverage you need. That's why you need insurance that can easily adapt to the way your life changes — IMS Term Life Insurance.

We Understand You.

Finding insurance that's right for you can be difficult and time consuming. But we've done the work for you. Through our research, we've found a Term Life Plan designed to help members of our profession provide for the future of their families. What's more, with insurance purchased through IMS, you can be sure that the plan is constantly being evaluated to better meet the needs of our members.

We're Flexible.

Updating your insurance doesn't have to be a hassle. With

our Term Life Plan, as your needs change, so can your coverage. Insurance through your association is designed to grow with you — it even moves with you when you change jobs.

We're Affordable.

What good would all these benefits be if no one could afford them? That's why we offer our members the additional benefit of reasonable rates, negotiated using our group purchasing power. Find out more about Term Life through IMS; call 1 800 424-9883 or, in Washington, DC, (202) 457-6820, between 8:30 a.m. and 5:30 p.m. Eastern Time.

IMS Insurance

Designed for the way you live today.
And tomorrow.

**Current Issues in
Statistical Inference:
Essays in Honor of D. Basu**

edited by
M. Ghosh & P. K. Pathak

D. Basu's emphasis has always been on foundations and underlying concepts rather than on technicalities. In keeping with his philosophy, essays in this festschrift volume, dedicated to Basu on the occasion of his 65th birthday, place the major emphasis on the foundational issues of statistical inference. Most of the papers in this volume are review articles written by his friends and colleagues in those areas of statistics that have interested Basu most during his active research career—information, likelihood, ancillarity, randomization, fiducial probabilities, logical foundations of survey sampling, and many related concepts. These papers are also written in a narrative style which has typified so much of Basu's own writings in statistics.

Weighted Empiricals and Linear Models

by Hira L. Koul

An empirical process that assigns possible different non-random (random) weights to different observations is called a *weighted (randomly weighted) empirical process*. These processes are as basic to linear regression and autoregression models as the ordinary process is to one sample models. However, their usefulness in studying linear regression and autoregression models has not been fully exploited. This monograph addresses this question to a large extent.

Contents

Introduction

Weighted empirical processes; M -, R -, and scale estimators; Minimum distance estimators and goodness-of-fit tests; Randomly weighted empirical processes

Asymptotic Properties of Weighted Empiricals

Introduction; Weak convergence; Asymptotic uniform linearity (A.U.L.) of residual w.e.p.'s; Some further probabilistic results for w.e.p.'s

Linear Rank and Signed Rank Statistics

Introduction; AUL of linear rank statistics; AUL of linear signed rank statistics; Weak convergence of rank and signed rank w.e.p.'s

M , R , and Some Scale Estimators

Introduction; M -estimators; Distribution of some scale estimators; R -estimators; Estimation of $Q(f)$

Minimum Distance Estimators

Introduction; Definitions of M . D. estimators; Finite sample properties and existence; Asymptotics of minimum dispersion estimators: A general case; Asymptotic uniform quadraticity; Asymptotic distributions, efficiencies, and robustness

Goodness-of-Fit Tests for the Errors

Introduction; The supremum distance tests; L_2 -distance tests; Testing with unknown scale; Testing for symmetry of the errors

Autoregression

Introduction; Asymptotic uniform linearity of W_n and F_n ; GM - and R -estimators; $M.D.$ Estimation; Goodness-of-fit testing
