

THE ANNALS of STATISTICS

ISSN (0090-5364)

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

Special Invited Paper

Theoretical comparison of bootstrap confidence intervals	PETER HALL	927
Discussion	CHONGEN BAI AND RICHARD A. OLSHEN	953
Discussion	RUDOLF BERAN	956
Discussion	PETER J. BICKEL	959
Discussion	STEPHEN T. BUCKLAND, PAUL H. GARTHWAITE AND HOWARD G. LOVELL	962
Discussion	THOMAS J. DICICCIO AND JOSEPH P. ROMANO	965
Discussion	B. EFRON	969
Discussion	WEI-YIN LOH	972
Discussion	J. ROBINSON	976
Discussion	REGINA Y. LIU AND KESAR SINGH	978
Discussion	MICHAEL R. VEALL	979
Rejoinder	PETER HALL	981

Articles

On resampling methods for variance and bias estimation in linear models	JUN SHAO	986
Differential geometry, profile likelihood, L -sufficiency and composite transformation models	O. E. BARNDORFF-NIELSEN AND P. E. JUPP	1009
Estimation in the presence of infinitely many nuisance parameters—geometry of estimating functions	SHUN-ICHI AMARI AND MASAYUKI KUMON	1044
Large sample theory of empirical distributions in biased sampling models	RICHARD D. GILL, YEHUDA VARDI AND JON A. WELLNER	1069
Strong embedding of the estimator of the distribution function under random censorship	P. MAJOR AND L. REJTŐ	1113
A note on the asymptotic normality in the Cox regression model	E. ARJAS AND P. HAARA	1133
A class of k -sample tests for comparing the cumulative incidence of a competing risk	ROBERT J. GRAY	1141
Conditional inference for restricted randomization designs	R. T. SMYTHE	1155
Asymptotic performance bounds for the kernel estimate	LUC DEVROYE	1162
A lower bound on the error in nonparametric regression type problems	YANNIS G. YATRACOS	1180
Minimum cost trend-free run orders of fractional factorial designs	DANIEL C. COSTER AND CHING-SHUI CHENG	1188
Block designs for first and second order neighbor correlations	JOHN P. MORGAN AND I. M. CHAKRAVARTI	1206
Efficient D_g -optimal designs for multivariate polynomial regression on the q -cube	YONG B. LIM AND W. J. STUDDEN	1225
Robust fixed size confidence procedures for a restricted parameter space	MEHMET ZEYTINGLU AND MAX MINTZ	1241
Best invariant estimation of a distribution function under the Kolmogorov-Smirnov loss function	YAAKOV FRIEDMAN, ALEXANDER GELMAN AND ESWAR PHADIA	1254
Loss functions for loss estimation	ANDREW L. RUKHIN	1262
On empirical Bayes testing with sequential components	ROHANA J. KARUNAMUNI	1270
On the strong approximation of the distributions of estimators in linear stochastic models, I and II: Stationary and explosive AR models	P. JEGANATHAN	1283
Weighted least squares estimators on the frequency domain for the parameters of a time series	SHEAN-TSONG CHIU	1315

Short Communications

On the stochastic ordering of absolute univariate Gaussian random variables	PAUL S. HORN	1327
Lower rate of convergence for locating a maximum of a function	HUNG CHEN	1330
Convergence rates for empirical Bayes estimation in the uniform $U(0, \theta)$ distribution	YOSHIKO NOGAMI	1335
Addendum to: "Local asymptotics for linear rank statistics with estimated score functions"	GEORG NEUHAUS	1342

Vol. 16, No. 3—September 1988

INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

The purpose of the Institute is to foster the development and dissemination of the theory and applications of statistics and probability.

OFFICERS AND EDITORS

- President:** Ram Gnanadesikan, Morris Research and Engineering Center, Bell Communications Research, 435 South Street, Morristown, New Jersey 07960-1961
- President-Elect:** Shanti S. Gupta, Department of Statistics, Purdue University, West Lafayette, Indiana 47907
- Past President:** Bradley Efron, Department of Statistics, Sequoia Hall, Stanford University, Stanford, California 94305
- Executive Secretary:** Peter Purdue, Department of Operations Research, Code 55, Naval Postgraduate School, Monterey, California 93943
- Treasurer:** Jessica Utts, Division of Statistics, University of California, Davis. *Please send correspondence to:* IMS Business Office, 3401 Investment Boulevard #7, Hayward, California 94545
- Program Secretary:** Lynne Billard, Department of Statistics, University of Georgia, Athens, Georgia 30602
- Editor, *The Annals of Statistics*:** Willem R. van Zwet, Department of Mathematics, University of Leiden, P.O. Box 9512, 2300 RA Leiden, The Netherlands
- Editor, *The Annals of Probability*:** Peter Ney, Department of Mathematics, Van Vleck Hall, University of Wisconsin, 480 Lincoln Drive, Madison, Wisconsin 53706
- Executive Editor, *Statistical Science*:** Morris H. DeGroot, Department of Statistics, Carnegie Mellon University, Pittsburgh, Pennsylvania 15213
- Editor, *The IMS Bulletin*:** George P. H. Styan, Department of Mathematics and Statistics, Burnside Hall, McGill University, 805 Sherbrooke Street West, Montreal PQ, Canada H3A 2K6
- Editor, *The IMS Lecture Notes—Monograph Series*:** Robert J. Serfling, Department of Mathematical Sciences, Johns Hopkins University, Baltimore, Maryland 21218
- Managing Editor:** Paul Shaman, Department of Statistics, University of Pennsylvania, Philadelphia, Pennsylvania 19104

Journals. The scientific journals of the Institute are *The Annals of Statistics*, *The Annals of Probability* and *Statistical Science*. The news organ of the Institute is *The Institute of Mathematical Statistics Bulletin*.

Individual, Institutional and Corporate Memberships. All *individual members* receive *The IMS Bulletin* for a basic annual dues rate of \$30. Each member must elect to receive at least one scientific journal for an additional amount, as follows: *Statistical Science* (\$5), one *Annals* (\$15) or both *Annals* (\$25). Dues allocations to each journal are set by Council resolution. Of the total dues paid, \$12 is allocated to *The IMS Bulletin* and the remaining amount is allocated equally among the scientific journal(s) received. Memberships are available at a reduced rate (40% of regular rates) for full-time students, permanent residents of developing countries and retired members. Retired members may also elect to receive the *Bulletin* only for \$12. *Institutional memberships* are available to nonprofit organizations at \$255 per year and *corporate memberships* are available to other organizations at \$550 per year. Institutional and corporate memberships include two multiple-readership copies of all IMS journals in addition to other benefits specified for each category (details available from the IMS Business Office).

Individual and General Subscriptions. Subscriptions are available on a calendar-year basis. *Individual subscriptions* are for the personal use of the subscriber and must be in the name of, paid directly by and mailed to an individual. Individual subscriptions for 1988 are available to both *Annals* and *Statistical Science* (\$96), one *Annals* and *Statistical Science* (\$60), both *Annals* (\$72), one *Annals* (\$45), *Statistical Science* (\$30) and *The IMS Bulletin* (\$20). *General subscriptions* are for libraries, institutions and any multiple-readership use. For 1988, all general subscriptions to one or both *Annals* automatically include one subscription to *Statistical Science*. General subscriptions for 1988 are available to both *Annals* and *Statistical Science* (\$170), one *Annals* and *Statistical Science* (\$100), *Statistical Science* only (\$45) and *The IMS Bulletin* (\$25). Air mail rates for overseas delivery of general subscriptions are \$40 per title.

Permissions policy. Authorization to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Institute of Mathematical Statistics, provided that the base fee of \$5.00 per copy, plus \$.00 per page is paid directly to the Copyright Clearance Center, 27 Congress Street, Salem, Massachusetts 01970. For those organizations that have been granted a photocopy license by CCC, a separate system of payment has been arranged. The fee code for users of the Transactional Reporting Service is: 0090-5364/88 \$5.00 + .00.

Correspondence. Mail to IMS should be sent to the IMS Business Office (membership, subscriptions, claims, copyright permissions, advertising, back issues), the Editor of the appropriate journal (submissions, editorial content) or the Managing Editor (production).

The Annals of Statistics (ISSN 0090-5364), Volume 16, Number 3, September 1988. Published in March, June, September and December by the Institute of Mathematical Statistics, 3401 Investment Boulevard #7, Hayward, California 94545. Second-class postage paid at Hayward, California and at additional mailing offices. **Postmaster:** Send address changes to *The Annals of Statistics*, Institute of Mathematical Statistics, 3401 Investment Boulevard #7, Hayward, California 94545.

HARRY KESTEN, 1982–1984
THOMAS M. LIGGETT, 1985–1987

EDITORIAL POLICY

The main purpose of *The Annals of Statistics* and *The Annals of Probability* is to publish significant contributions to the theory of statistics and probability and their applications. The emphasis is on importance and interest; formal novelty and mathematical correctness alone are not sufficient for publication. Especially appropriate are authoritative expository papers and surveys of areas in vigorous development. Because statistics is an evolving discipline, the Editors of *The Annals of Statistics* take a broad view of its domain and welcome papers in interface areas. Contributors to *The Annals of Statistics* should review the editorial in the January 1980 issue. All papers are refereed.

NOTICE

Manuscripts submitted for *The Annals of Statistics* should be sent to the Editor at the following address:

Until December 31, 1988

THE ANNALS OF STATISTICS

INSTRUCTIONS FOR AUTHORS

Submission of Papers. Papers to be submitted for publication should be sent to the Editor of *The Annals of Statistics*. (For current address, see the latest issue of the *Annals*.) Four copies should be submitted on paper that will take ink corrections. The manuscript will *not* normally be returned to the author; when expressly requested by the author, one copy of the manuscript will be returned. All manuscripts should be accompanied by a cover letter.

Preparation of Manuscripts. Manuscripts should be typewritten, entirely double-spaced, including references, with wide margins at sides, top and bottom. All copies must be completely legible. When technical reports are submitted, all extraneous sheets and covers must be removed. Typists should check an issue of the *Annals* for style.

Submission of Reference Papers. Four copies of unpublished or not easily available papers cited in the manuscript should be submitted with the manuscript.

Title. The title should be descriptive and as concise as is feasible, i.e., it should indicate the topic of the paper as clearly as possible, but every word in it should be pertinent.

Abbreviated Title. An abbreviated title to be used as a running head is also **required**. This should normally not exceed 35 characters. For example, an article with the title "The Curvature of a Statistical Model, with Applications to Large-Sample Likelihood Methods," could have the running head, "Curvature of Statistical Model" or possibly "Asymptotics of Likelihood Methods," depending on the emphasis to be conveyed.

Affiliation. Indicate your present institutional affiliation as you would like it to appear.

Summary. Each manuscript is required to contain a summary, clearly separated from the rest of the paper, which will be printed immediately after the title. Its main purpose is to inform the reader quickly of the nature and results of the paper; it may also be used as an aid in retrieving information. The length of a summary will clearly depend on the length and difficulty of the paper, but in general it should not exceed 150 words. Formulas should be used as sparingly as possible within the summary. The summary should not make reference to results or formulas in the body of the paper—it should be self-contained.

Footnotes. Footnotes should not be used, except as described under Title Page Footnotes below. Such information should be included within the text.

Title Page Footnotes. Included as a footnote on page 1 should be the headings:

American Mathematical Society 1980 subject classifications. Primary—; secondary—.
Key words and phrases.

The classification numbers representing the primary and secondary subjects of the article may be

found with instructions for its use in the *Mathematical Reviews Annual Subject Index-1980*. The key words and phrases should describe the subject matter of the article; generally they should be taken from the body of the paper.

Acknowledgment of support. Grants and contracts should also be included in this footnote.

Identification of Symbols. Manuscripts for publication should be clearly prepared to insure that all symbols are properly identified. Distinguish between "oh" and "zero"; "ell" and "one"; "epsilon" and "element of"; "summation" and "capital sigma," etc. Indicate also when special type is required (Greek, German, script, boldface, etc.); unless indicated otherwise, formula letters will be set in italics. Acronyms should be introduced sparingly. Any handwritten symbols should be clearly identified.

Figures and Tables. Figures, charts, and diagrams should be prepared in a form suitable for photographic reproduction and should be professionally drawn twice the size they are to be printed. (These need not be submitted until the paper has been accepted for publication.) The printer does not improve upon the quality of the figures submitted. Tables should be typed on separate pages with accompanying footnotes immediately below the table.

Formulas. Fractions *in the text* are preferably written with the solidus or negative exponent; thus,

$$(a + b)/(c + d) \text{ is preferred to } \frac{a + b}{c + d}, \text{ and } (2\pi)^{-1}$$

or $1/(2\pi)$ to $\frac{1}{2\pi}$. Also, $a^{b(c)}$ and $a_{b(c)}$ are preferred

to a^{b^c} and a_{b^c} , respectively. Complicated exponentials should be represented with the symbol *exp*. A fractional exponent is preferable to a radical sign.

References. References should be typed double-spaced and should follow the style:

Kiefer, J. C. (1976). Admissibility of conditional confidence procedures. *Ann. Statist.* 4 836–865.

In textual material, the format "... Keifer (1976)..." should be used. Multiple references can be distinguished as "... Kiefer (1976a)..." Abbreviations for journals should be taken from a current index issue of *Mathematical Reviews*.

Addresses. The permanent address of each author should be typed following the references.

Galley Proofs. The author will ordinarily receive galley proofs. Corrected galley proofs should be sent to AOS Redactory, Science Typographers, Inc., 15 Industrial Boulevard, Medford, NY 11763.

Correspondence. All correspondence with the Editor must refer to the manuscript number of the paper. This number will be on the card sent to the author acknowledging receipt of the article.
