

THE ANNALS of STATISTICS

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

Articles

- Adaptive variance function estimation in
heteroscedastic nonparametric regression T. TONY CAI AND LIE WANG 2025
- Robust nonparametric estimation via wavelet median regression
LAWRENCE D. BROWN, T. TONY CAI AND HARRISON H. ZHOU 2055
- Analysis of variance, coefficient of determination and F -test
for local polynomial regression LI-SHAN HUANG AND JIANWEI CHEN 2085
- Estimation of distributions, moments and quantiles in deconvolution problems
PETER HALL AND SOUMENDRA N. LAHIRI 2110
- Choice of neighbor order in nearest-neighbor classification
PETER HALL, BYEONG U. PARK AND RICHARD J. SAMWORTH 2135
- A class of Rényi information estimators for multidimensional densities
NIKOLAI LEONENKO, LUC PRONZATO AND VIPPAL SAVANI 2153
- Learning by mirror averaging A. JUDITSKY, P. RIGOLLET AND A. B. TSYBAKOV 2183
- Gibbs posterior for variable selection in high-dimensional classification and data mining
WENXIN JIANG AND MARTIN A. TANNER 2207
- Profile-kernel likelihood inference with
diverging number of parameters CLIFFORD LAM AND JIANQING FAN 2232
- Moments of minors of Wishart matrices
MATHIAS DRTON, HÉLÈNE MASSAM AND INGRAM OLKIN 2261
- Trimming and likelihood: Robust location and dispersion estimation in the elliptical model
JUAN A. CUESTA-ALBERTOS, CARLOS MATRÁN AND AGUSTÍN MAYO-ISCAR 2284
- Local antithetic sampling with scrambled nets ART B. OWEN 2319
- Limit theorems for weighted samples with applications to
sequential Monte Carlo methods RANDAL DOUC AND ERIC MOULINES 2344
- On the Behrens–Fisher problem: A globally convergent algorithm and a finite-sample study
of the Wald, LR and LM tests ALEXANDRE BELLONI AND GUSTAVO DIDIER 2377
- An algorithmic and a geometric characterization of coarsening at random
RICHARD D. GILL AND PETER D. GRÜNWARD 2409
- Evaluation of formal posterior distributions via Markov chain arguments
MORRIS L. EATON, JAMES P. HOBERT, GALIN L. JONES AND WEN-LIN LAI 2423
- Residual empirical processes for long and short
memory time series NGAI HANG CHAN AND SHIQING LING 2453
- Tilted Euler characteristic densities for Central Limit random fields, with application
to “bubbles” N. CHAMANDY, K. J. WORSLEY, J. TAYLOR AND F. GOSSELIN 2471
- Multiple local Whittle estimation in stationary systems P. M. ROBINSON 2508
- Stein estimation for the drift of Gaussian processes using
the Malliavin calculus NICOLAS PRIVAULT AND ANTHONY RÉVEILLAC 2531
