INSTITUTE OF MATHEMATICAL STATISTICS

Articles

- Functional linear regression that's interpretable
GARETH M. JAMES, JING WANG AND JI ZHU 2083
- Some sharp performance bounds for least squares regression with L_1
regularization TONG ZHANG 2109
- Near-ideal model selection by ℓ_1 minimization
EMMANUEL J. CANDÈS AND YANIV PLAN 2145
- High-dimensional variable selection LARRY WASSERMAN AND KATHRYN ROEDER 2178
- Estimating the degree of activity of jumps in high frequency data
YACINE AÏT-SAHALIA AND JEAN JACOD 2202
- Estimating linear functionals in nonlinear regression
with responses missing at random URSULA U. MÜLLER 2245
- Nonparametric estimation by convex programming
ANATOLI B. JUDITSKY AND ARKADI S. NEMIROVSKI 2278
- Deconvolution with unknown error distribution JAN JOHANNES 2301
- Consistent estimates of deformed isotropic Gaussian random fields
on the plane ETHAN ANDERES AND SOURAV CHATTERJEE 2324
- Asymptotic theory for the semiparametric accelerated failure time model
with missing data BIN NAN, JOHN D. KALBFLEISCH AND MENGANG YU 2351
- A semiparametric model for cluster data
WENYANG ZHANG, JIANQING FAN AND YAN SUN 2377
- On asymptotically optimal tests under loss of identifiability in semiparametric models
RUI SONG, MICHAEL R. KOSOROK AND JASON P. FINE 2409
- Asymptotic equivalence of empirical likelihood and Bayesian MAP
MARIAN GRENDÁR AND GEORGE JUDGE 2445
- Bayesian frequentist hybrid inference AO YUAN 2458
- Consistency of a recursive estimate of mixing distributions
SURYA T. TOKDAR, RYAN MARTIN AND JAYANTA K. GHOSH 2502
- Hypothesis test for normal mixture models: The EM approach
JIAHUA CHEN AND PENGFEI LI 2523
- Efficient randomized-adaptive designs
FEIFANG HU, LI-XIN ZHANG AND XUMING HE 2543
- Quarter-fraction factorial designs constructed via quaternary codes
FREDERICK K. H. PHOA AND HONGQUAN XU 2561
- Asymptotic normality of a nonparametric estimator of sample coverage
CUN-HUI ZHANG AND ZHIYI ZHANG 2582
