

# BAYESIAN ANALYSIS

Exact Bayesian Regression of Piecewise Constant Functions . . . . .	M. Hutter	635
Estimation of Faraday Rotation Measures of the Near Galactic Sky Using Gaussian Process Models . . . . .	M.B. Short, D.M. Higdon, and P.P. Kronberg	665
Invariant HPD credible sets and MAP estimators . . . . .	P. Druilhet and J-M. Marin	681
Nonparametric elicitation for heavy-tailed prior distributions . . . . .	J.P. Gosling, J.E. Oakley and A. O'Hagan	693
Bayesian Model Assessment Using Pivotal Quantities . . . . .	V.E. Johnson	719
Bayesian Diagnostic Techniques for Detecting Hierarchical Structure . . . . .	G. Yan and J. Sedransk	735
Ergodic averages for monotone functions using upper and lower dominating processes . . . . .	J. Møller and K. Mengersen	761
A Simulation Approach to Bayesian Emulation of Complex Dynamic Computer Models . . . . .	S. Bhattacharya	783
Bayesian Model Diagnostics Based on Artificial Autoregressive Errors . . . . .	M. Peruggia	817
