

BULLETIN  
OF THE  
AMERICAN  
MATHEMATICAL SOCIETY

A HISTORICAL AND CRITICAL REVIEW  
OF MATHEMATICAL SCIENCE

EDITED BY

F. N. COLE            VIRGIL SNYDER            J. W. YOUNG  
ALEXANDER ZIWET            D. E. SMITH  
T. LEVI-CIVITA            R. C. ARCHIBALD

VOLUME XXIV., NUMBER 10

JULY, 1918

PUBLISHED BY THE SOCIETY  
LANCASTER, PA., AND NEW YORK  
1918

Entered at the Post Office at Lancaster, Pa., as second-class matter  
PUBLISHED MONTHLY, EXCEPT AUGUST AND SEPTEMBER

Whole No. 270

\$5.00 a year

An adequate and thorough preparation for the calculus and applied mathematics is provided in

SMITH AND GALE'S  
**New Analytic Geometry**

342 pages, \$1.50

Some of the distinctive features are the simplicity, the numerous tables, the large number of tested problems and the omission of answers to these when any useful purpose is served, the attention given to curve plotting, a chapter on the setting up and graphical study of functions arising from concrete problems, the concise treatment of the parabola, ellipse, and hyperbola, the expression of the simpler formulas in determinant form, the variety of locus problems, the attention paid to the careful sketching of loci in space, and a chapter on the derivation of empirical equations to fit observed data.

GINN AND COMPANY  
70 Fifth Avenue NEW YORK

**Lectures on the Calculus of  
Variations**

(The Weierstrassian Theory)

BY

HARRIS HANCOCK, Ph.D. (Berlin), Dr.Sc. (Paris)

*Professor of Mathematics in the University of Cincinnati*

Published (1904) and for Sale by
