THE AMERICAN MATHEMATICAL MONTHLY

OFFICIAL JOURNAL OF

THE MATHEMATICAL ASSOCIATION OF AMERICA

Is the Only Journal of Collegiate Grade in the Mathematical Field in This Country

This means that its mathematical contributions can be read and understood by those who have not specialized in mathematics beyond the Calculus.

The Historical Papers, which are numerous and of high grade, are based upon original research.

The Questions and Discussions, which are timely and interesting, cover a wide variety of topics.

Surveys of the contents of recent books and periodicals constitute a valuable guide to current mathematical literature.

The "Topics for Undergraduate Mathematical Clubs" have excited wide interest both in this country and in Great Britain.

The Notes and News cover a wide range of interest and information, both in this country and in foreign countries.

The Problems and Solutions hold the attention and activity of a large number of persons who are lovers of mathematics for its own sake.

There are other journals suited to the Secondary field, and there are still others of technical scientific character in the University field; but the monthly is the only journal of Collegiate grade in America suited to the needs of the non-specialist in mathematics.

Sample copy and all information may be obtained from the

SECRETARY OF THE ASSOCIATION

W. D. CAIRNS **OBERLIN, OHIO**

SICELOFF - WENTWORTH - SMITH

Analytic Geometry

A full year's course in analytic geometry is presented clearly, succinctly, and in the same practical manner that characterizes all the textbooks in the Wentworth–Smith Series.

Analytic Geometry: Brief Course

In an unusually simple and natural manner the essential features of the analytic method are brought within the limits of a single semester course.
