

## OFFICIAL COMMUNICATIONS

### THE INTERNATIONAL CONGRESS OF MATHEMATICIANS

CAMBRIDGE, MASSACHUSETTS, September 4–12, 1940.

On invitation of the American Mathematical Society, an International Congress of Mathematicians will take place September 4–12, 1940, with Harvard University and the Massachusetts Institute of Technology as hosts. Plans are well under way for a notable scientific program and for interesting social events. See this Bulletin, September, 1938, p. 593. A preliminary notice containing many details will be sent out in the autumn of 1939.

### MEETINGS OF THE SOCIETY

MADISON, WISCONSIN, September 5–8, 1939.

Abstracts must be in the hands of Associate Secretary W. L. Ayres, Department of Mathematics, University of California, Los Angeles, Calif., not later than August 1. Abstracts received by this date will appear in the September Bulletin. There will be two sets of Colloquium Lectures: *Structure of algebras* by Professor A. A. Albert and *Convex bodies* by Professor M. H. Stone.

NEW YORK CITY, October 28, 1939.

Abstracts must be in the hands of Associate Secretary T. R. Hollcroft, 531 West 116th Street, New York, N. Y., not later than September 30. Abstracts received before August 1 will appear in the September issue of the Bulletin. By invitation of the Program Committee, Professor J. J. Gergen will give an address entitled *Double Fourier series*.

R. G. D. RICHARDSON, *Secretary of the Society*.

---

Articles for insertion in the BULLETIN should be typewritten, double spaced, and the author should keep a complete copy. Papers in algebra should be sent to A. A. ALBERT, University of Chicago, Chicago, Ill.; in analysis to L. M. GRAVES, University of Chicago, Chicago, Ill.; in other fields to P. A. SMITH, Barnard College, Columbia University, New York, N. Y. Reviews should be sent to VIRGIL SNYDER, 214 University Ave., Ithaca, N. Y., and items for Notes to H. W. KUHN, Ohio State University, Columbus, Ohio. All other communications to the editors should be addressed to the Managing Editor, TOMLINSON FORT, Lehigh University, Bethlehem, Pa.

The initial fees and the annual dues of members of the Society (see this BULLETIN, p. 322, May, 1930; and the List of Officers and Members, September, 1938, p. 75) are payable to the Treasurer of the Society, Professor B. P. GILL, Low Memorial Library, 531 West 116th St., New York, N. Y.

## CONTENTS

Vol. 45, No. 6                      JUNE, 1939                      Whole No. 477

	Page
A tensor analysis for a $V_k$ in a projective space $S_n$ . By V. G. GROVE.....	385
The Stieltjes moment problem for functions of bounded variation. By R. P. BOAS, JR.....	399
On fundamental systems of symmetric functions. By H. T. ENGSTROM.....	404
On Green's functions in the theory of heat conduction. By H. S. CARSLAW and J. C. JAEGER.....	407
Some remarks on linear differential systems. By W. T. REID..	414
On non-boundary sets. By A. D. WALLACE.....	420
Totally geodesic Einstein spaces. By AARON FIALKOW.....	423
Concerning the boundary of a complementary domain of a continuous curve. By F. B. JONES.....	428
On the singular point locus in the theory of fields of parallel vectors. By T. Y. THOMAS.....	436
Random sampling in the evaluation of a Lebesgue integral. By C. R. ADAMS and A. P. MORSE.....	442
A characterization of Dedekind structures. By MORGAN WARD.	448
Extension of a distributive lattice to a Boolean ring. By H. M. MACNEILLE.....	452
Spaces of uncountably many dimensions. By C. W. VICKERY...	456
Note on the location of zeros of the derivative of a rational function whose zeros and poles are symmetric in a circle. By J. L. WALSH.....	462
A note on the Weierstrass condition in the calculus of variations. By M. R. HESTENES and W. T. REID.....	471
On the number of sets conjugate to a matrix with linear elementary divisors. By H. S. THURSTON.....	474
Triple systems as ruled quadrics. By W. G. WARNOCK.....	476
