BULLETIN (New Series) of the American Mathematical Society

MANUSCRIPT, PROOF AND COPYING INFORMATION

SUBMISSION OF MANUSCRIPT

Articles submitted for publication should be typewritten, double spaced, and no more than 11 ($8\frac{1}{2}'' \times 11''$) pages long. The *Manual for Authors*, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet.

For Research-Expository Articles and Research Announcements, the first footnote should include *subject classification numbers* representing the primary and secondary subjects of the article. The AMS (MOS) Subject Classification Scheme (1970) can be found in the December index volumes of Mathematical Reviews. Be sure to use the AMS (MOS) subject classification numbers and not the MR subject classification numbers that will appear in the same volume.

COPYRIGHT TRANSFER AGREEMENT

The signing of a Copyright Transfer Agreement is a requirement of publication in the BULLETIN. A copy of the agreement is sent to authors upon receipt of a manuscript in the Providence Office of the Society; in case of joint authors, copies are sent to the author who is designated to receive galley proof. Authors are urged to return the form immediately to prevent delays in processing and publishing of the manuscript. The 1978 edition of the *Manual for Authors* has a description of Society policy concerning copyright and a copy of the agreement.

PUBLICATION CHARGES

Research Announcements carry a page charge of $40.00 per page to help defray the cost of publication. This amount is charged to the institution or to a contract supporting the research reported in the published paper. The publication charge policy of the United States Federal Council for Science and Technology (FCST) is reported on page 112 of the February, 1975 issue of the NOTICES of the American Mathematical Society. In no case is the author personally responsible for paying the page charge, nor is acceptance of the author's paper for publication dependent upon payment of the page charge.

REPRINTS AND ADDRESS CHANGES

Any inquiries concerning a paper which has been accepted for publication, including information regarding reprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

GALLEY PROOF

When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate which of them should receive galley proof in the event that the manuscript is accepted for publication.

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (For details write CCC Operations Staff, P.O. Box 765, Schenectady, New York 12301).

CONTENTS January 1979

RESEARCH – EXPOSITORY PAPERS

Richard D. Brauer *by Walter Feit* 1

Blocks of characters and structure of finite groups *by Richard Brauer* 21

An introduction to the classification of finite simple groups *by Michael Aschbacher* 39

The classification of finite simple groups I. Simple groups and local analysis *by Daniel Gorenstein* 43

BOOK REVIEWS

Abstract analytic function theory and Hardy algebras *by Klaus Barbey and Heinz König* – Reviewed by *Patrick Ahern* 201

The theory of partitions *by George E. Andrews* – Reviewed by *Richard Askey* 203

Nonlinearity and functional analysis *by Melvin S. Berger* – Reviewed by *P. M. Fitzpatrick* 210

Combinatorial set theory *by Neil H. Williams* – Reviewed by *James E. Baumgartner* 217

Introduction to operator theory. I. Elements of functional analysis *by Arlen Brown and Carl Pearcy* – Reviewed by *H. S. Bear* 220

Boolean-valued models and independence proofs in set theory *by J. L. Bell* – Reviewed by *Paul C. Eklof* 221

Proof theory *by Kurt Schütte* – Reviewed by *Solomon Feferman* 224

Linear estimation and stochastic control *by M. H. A. Davis* – Reviewed by *Wendell H. Fleming* 228

Classical Banach spaces. I *by Joram Lindenstrauss and Lior Tzafriri* – Reviewed by *W. B. Johnson* 230

Induced representations and Banach *-algebraic bundles *by J. M. G. Fell* – Reviewed by Marc A. Rieffel 232

Topological algebras *by E. Beckenstein, L. Narici and C. Suffel* – Reviewed by *J. H. Williamson* 237

Finite element Galerkin methods for differential equations *by Graeme Fairweather* Reviewed by *Robert E. Barnhill* 245

RESEARCH ANNOUNCEMENTS

Classification of the irreducible representations of $\mathfrak{sl}(2,C)$ *by Richard E. Block* 247

The homotopy type of homeomorphisms of 3-manifolds *by Eugénia César de Sá and Colin Rourke* 251

Maximal functions: A proof of a conjecture of A. Zygmund *by Antonio Córdoba* 255

Homotopy inverses for nerve *by Rudolf Fritsch and Dana May Latch* 258

Boundary regularity and embedded solutions for the oriented plateau problem *by Robert Hardt and Leon Simon* 263

Selfadjoint operator extensions satisfying the Weyl commutation relations *by Palle E. T. Jørgensen* 266

Ends of maps and applications *by Frank Quinn* 270
